What it takes to make Better Seed

It isn't higher prices that make one Hybrid superior to another. There are some dealers and agents who would like to have you believe that is true. The real reasons are: 1. The quality and the characteristics of the inbreds used in the crossing process. 2. The degree of care taken in making the crosses. 3. The care used in harvesting, drying and grading the seed.

Hybrids for Yields and Quality

Berry's Hybrids are built from the leading inbred lines that have been developed by U. S. Govt. and State departments of Agriculture. This gives us the best that the nations finest research organizations have discovered. The crosses in our Hybrids combine inbreds that make big yields and high quality. Our basic seed stock used in our production are secured from experts whose integrity is unquestioned, thus getting the purest seed obtainable. Every step from there on is carefully supervised. Planting, isolation, detasseling, harvesting and drying.

Excellent Grading Process

Our grading plant first separates kernels according to thickness, next according to width. Then it goes

through a length grader and then over a special machine that separates kernels of equal size by weight, thus removing light weight kernels. Whether you buy flat or round grain they are all graded for accurate planting and all guaranteed of high germination. See page 5.

Our seed comes to you treated with a chemical dust. This is very effective in killing disease organisms that might attack your seed, especially during cool damp weather after planting.

Real Savings at Berry's Prices

We could charge \$8.00, \$9.00 or \$10.00 per bushel but that would not make our seed any better. Why pay anyone more than Berry's low price? We believe our varieties to be tops and the experience of our customers bears this out. Grow Berry's Hybrids this year.

BERRY'S 613

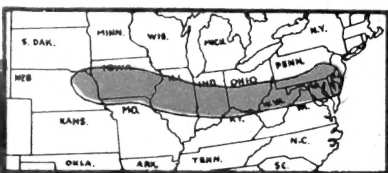

110 to 112 Day Maturity Single Ear, Deep Grain—Fine Feed

A beautiful Hybrid. Starts off with a bang after planting, making early cultivation easy. An abundance of vigorous dark green foliage borne on stiff, strong stalks. Pretty as a picture while growing and it yields as fine as it looks. The big single ears are borne at medium height. A fine corn for either hand or machine picking. The husks on the ear dries while stalks are still green, thus enabling the ear to make its fullest development. The kernels are deep and golden yellow in color. It is not a hard, flinty corn. Contains sufficient soft stock so all kinds of livestock can eat the grain readily but is not so starchy as to impair its high feeding value.

This Hybrid is resistant to drought, chinch bugs and disease. It is adapted to a wide range of soils. We consider it one of the heaviest yielders obtainable on rich land. Naturally on thin land it will produce less but compared with other kinds on the same soil it will prove its superior productiveness.

This variety is similar to U. S. 13 but earlier in maturity and can be grown well into north central Iowa and east and west in sections having similar conditions. Also grown in southern Iowa and sections further south when somewhat earlier maturity is desired.

In its maturity class we do not believe there is a Hybrid that will beat it for yields, quality and all around satisfactory performance and profit. See page 5 for information on Round Grain seed.

BERRY'S 615

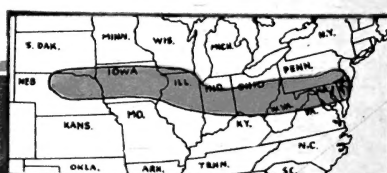

About 105 to 110 Day Maturity Single Ear. Fine Quality. Heavy Yields

A great many of our customers need a corn of fairly early maturity and, of course, still want top yields and quality. This variety will fill that need exactly for farmers living in sections similar to that from northern Iowa down south for about $\frac{2}{3}$ the way through the state. This takes in parts of Nebraska and goes east through Illinois, Indiana, Ohio, Pennsylvania and West Virginia.

Perhaps you may be acquainted with the Iowa 939 which is very widely grown throughout this area. Berry's 615 is made up of three of the same inbreds. By changing one inbred we have made a corn which has a longer ear and a straighter one. It is superior in strength of stalk and root and there is less ear dropage.

Thus the good, sound qualities of 939 have been retained and these superior factors added. If there is much difference between varieties as to adaptability to soil types we would consider this to be well adapted to thinner soils. However, it is also excellent for better land and responds to increased fertility by really rolling out the bushels. Because of its earlier maturity it is an excellent selection on land of medium to low fertility. In sections subject to heat and drought this earlier maturity is also a big advantage.

The grain is a rich yellow with a reddish tinge on the sides of the kernels. They are medium rough, easily eaten by live stock. Stalks are strong. Ears medium long. Fine for hand or machine picking. Good drought resistance and a very heavy yielder.

A Great Hybrid

About 110 to 115 Day Type

Last year we listed Illinois 960 in this space. It was a good corn and a heavy yielder but it had some features that did not meet with popular approval. Now we are selling a variety that we consider very definitely superior. It contains two of the same inbreds that are used in producing Ill. 960 but by changing the other two inbred lines we have a corn that is very outstanding.

It does not have the two ear tendency of 960 but is more of a single ear type. The stalk is strong, the ear larger and the grain is deeper. In maturity it is about the same.

It is a Hybrid adapted to a wide range extending from central Iowa, North central Illinois and southern and eastern Nebraska. It will go anywhere across the nation through sections having similar conditions. It can be grown south through Missouri, Kentucky, etc.

Yields Big Crops

Stalks grow up to 10 ft. Ear height is about 3 ft. 6 in. Dark leaves. Large Ears. Adapted on average to rich land. Good for hand or machine husking. Stands up well. It resists heat and drought. It is a fine all around Hybrid that we can recommend as one that will give you excellent satisfaction. The heavy yields give it front rank as a producer. Its excellent quality and soft kernels make it a fine feeding corn. You will find a lot of fine quality points in our 666.

Where we suggest planting Berry's 666

A Prize Winner

About 108-110 Day Type
A Single Ear Variety

A fine single eared Hybrid that is a great favorite with those who have grown it. It contains two of the same inbreds used in making U.S. 13. The ears are not quite as long as U.S. 13 but generally larger in circumference. Many ears have 20 rows of kernels. The grain is of good depth and medium rough. Beautiful golden yellow in color.

It is a good pollen producer giving assurance of good fertilization and well filled uniform ears. The ears are well protected by husks. Retains its ears well and is an excellent variety for machine as well as hand picking. It has a strong stalk. In yield it ranks with the best being a heavy producer on a wide range of soils.

Widely Adapted

It is a fine variety for conditions similar to north and south central Iowa, eastern Nebraska and in Illinois, Indiana, Penn., etc. It is used in southern Iowa, Missouri and other southern sections for an early feeding corn or for late planting. You really have to see this corn growing and harvest a crop to appreciate its quality. Buy Berry's Illinois 751 State Certified seed while it is available and get a quality product.

A Winner at Corn Shows

Even in southern Iowa we have many customers who pick it as their main crop variety. It has won first prize in many local corn shows this fall and took sweepstakes prizes over all other Hybrids. When you have a Hybrid that will do that down here among later Hybrids think how it can produce in the sections to which it is best adapted, that is north central and south central Iowa and similar sections. Make no mistake—this is a dandy.

BUY EARLY

Hybrid seed corn supplies are relatively short. We advise our customers to mail orders early and be sure of getting exactly what you want.

BERRY'S 405

Our Earliest Hybrid—A Heavy Yielder

About 97 to 102 Day

We have taken four outstanding inbreds to make this Hybrid. These are lines that have high factors for big yields, fine grain quality, strong stalks of good height and early maturity. This combination makes a Hybrid that we consider second to none in its maturity class. We do not know of any that will make larger ears, deeper grains or better stalks.

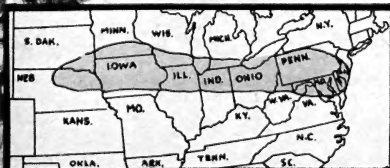

This corn starts fast in the spring and matures early in the fall. The strong stalks under average conditions grow around 9 feet and they are quite leafy. While it is grown chiefly for grain this leafy growth makes it well adapted for ensilage. The length of the ear and depth of the grain is extra good for such early maturity. That makes it produce exceptionally well.

This 405 has proven even a better yielder than some of the later maturing kinds. In actual tests it outyielded them by a big margin. It husks easily by hand and is good for machine picking. It is also very good for shredding. We know this is just the kind of corn many farmers are looking for and we recommend it highly to those wanting a top notch early maturing Hybrid. It is not flinty and the grain has fine feeding value.

We consider this corn adapted to sections having conditions similar to that from southern Minnesota to central Iowa. This would include southern Wisconsin and Michigan and considerable areas in states of Colorado, Nebraska, South Dakota, Illinois, Indiana, Ohio, Pennsylvania, New York and West Virginia. It can go farther north for ensilage and farther south when an early maturing variety is desired. It is adapted to a wide range of soils from high to low fertility and has done remarkably well on muck land.

You should find this a most profitable variety to grow. The performance of this corn last year has been so fine we wish we had grown double the acreage of seed. Late buyers may not be able to get this seed so in order to avoid disappointment we suggest you buy now.

ROUND GRAIN

TWO TOP RATERS

BERRY'S 813

U.S.-13

**About 120 Day Type
Contains 5 Inbreds**

If you could only hear the enthusiastic reports from farmers who have grown this great Hybrid we wouldn't have to say a word about it. The big long ears, the deep golden kernels, the large strong stalks, the fine feeding qualities and the tremendous yields are the things they talk about. Many of these farmers grew more than one Hybrid and to date we have found none who reported he had anything that outyielded or yielded as much as our 813.

We especially urge you to plant some of this variety because we feel confident you will find it to be one of the heaviest yielding and most satisfactory Hybrids grown.

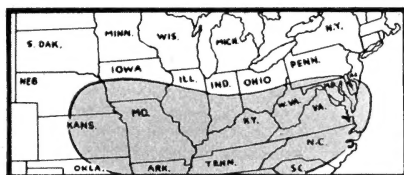

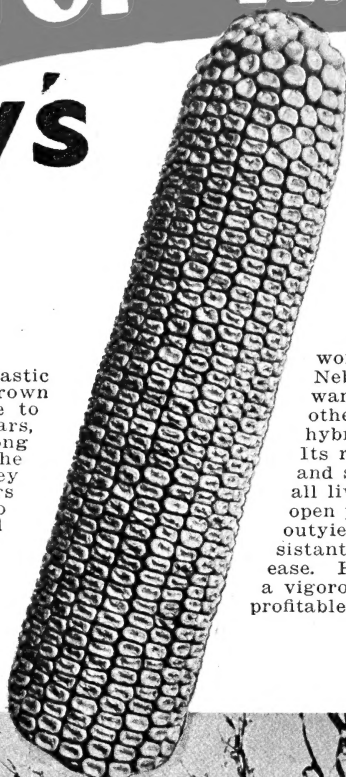

In test plantings we have the following reports on "witnessed" yields. 190.36 bu. per acre at 15% moisture, Andrew K. Hovden, Decorah, Iowa, 169.05 bu., U. S. Newcomber, Auburn, Indiana; 146.57 bu. from Green City, Iowa; 137.28 bu., Calmar, Iowa; 131.64 bu. Lakewood, Illinois. We do not claim these top yields for general farming operations but they do show the enormous capacity of this variety to yield. It is far above the average.

This corn is U. S. 13 complete. Nothing has been taken from it but something has been added. An extra later pollinating Inbred has been incorporated. Our purpose is to provide additional pollen to assure fertilization of the ears in event the main pollen crop shall be burned by excessively high temperatures.

Thus there is provided an extra assurance of better filled ears. This also has a tendency to lengthen the ears and it appears to reduce ear droppage. Thus you get U. S. 13—Plus these added factors. It is truly a great Hybrid.

Characteristics

One large ear per stalk. Easy to husk by hand or machine. Deep grains of high feeding value. Enough soft starch so live stock will eat it readily but not a real starchy kernel. Dark green foliage. Husks dry before stalk matures. Strong stalks. A vigorous grower. An exceptional drought resister. Resistant to chinch bugs and disease. High shelling percentage. A fine feeding corn. A longer pollinating period assuring better filled ears under adverse conditions. Adapted to a wide range of soils and suitable wherever U. S. 13 can be grown. Be sure to grow some this year.

**Big Single Ear
Deep Soft Grain
Extra Heavy Yields
About 120 Day Type**

This great variety has made a wonderful record in yield from Nebraska to Connecticut and Delaware and south into Kentucky and other states. It is a strong stalked hybrid bearing a large well shaped ear. Its rich golden kernels are large, deep and soft enough to be readily eaten by all live stock. Grain looks like the old open pollinated corn but far excels and outyields it. It stands up well, is resistant to drought, chinch bugs and disease. Has fine dark green foliage. It is a vigorous grower and is one of the most profitable and productive of hybrid varieties.

Yield Records

These are some recorded yields of official state tests: Iowa 108.4 bu. per acre, Ohio 123.0 bu., Nebraska 106 bu., Pennsylvania 97.7, Indiana 103.2, Missouri 121 bu., Illinois 112.6, in Maryland 134% over check variety. In Kentucky only a fraction of a bushel under first place and first in Connecticut in the late series test. This also shows the wide area to which this Hybrid is adapted. While ears shorten somewhat on thin soil it still will outyield almost any other variety thus indicating its adaptability to a wide range of soils.

Character of Berry's U.S. 13

All U. S. 13 seed is not equal in yielding ability. The quality of the foundation stock, the care used in crossing and processing may cause yields to vary from 10 to 15 bu. per acre. That is to say U. S. 13 seed produced by one grower may outyield U. S. 13 from another grower by that many bushel. We do not know where to obtain finer seed than we used in producing our seed stock and in crossing and processing we use great care so as to make Berry's U. S. 13 the best.

Most Seed Corn Companies sell U. S. 13 under a different name at much higher prices. A change of name does not change character; higher price will not improve the quality. We will supply you with high quality U. S. 13 at a genuine saving in cost. Please order early and get just what you want.

All varieties are made into six grades. Medium, Medium Large and Large in both Flat and Round grains. Specify which you prefer. Each lot graded for accurate planting. Round grades often do best. See page 5.

SAVE MONEY ON BERRY'S HYBRIDS

IOWA 939

A hybrid with a wonderful record. Won the Banner Trophy two years in succession as the corn with the highest performance score in the official Iowa State Yield Contest. Adapted to a very wide range of soils and climate. Widely grown from Nebraska on east to the coast and from northern Iowa south to the Ohio river. Especially adapted as a main crop corn to sections similar to the northern half of Iowa and to sections where less fertile soil types and dry spells require a corn that will mature in about 105 to 110 days.

It is a single ear hybrid. Medium rough type Kernels thicker than the average and soft so they can be readily eaten. Color deep yellow with reddish tinge on sides of kernels. In Nebraska it was the best yielder for a 6 year period. Colorado official yield averaged 132.1 bu. per acre for 3 years. Tops in central Penn. Illinois yield 107.8 bu. Top early hybrid in Ohio. Fine in West Va. and New York. Shortly before going to press Claude Nash of Stevensville, Michigan, writes, "I have been growing your hybrid corn for 3 years and your 939 is excellent." He sends a photo of himself and a write-up by his local paper showing a yield of 149 bu. per acre as found by his County Agent. You can't go wrong with this time tested hybrid.

FLAT
\$7.00 BU.
ROUND
\$5.50 BU.

BERRY'S U.S. 35

About 110 Day Type

This hybrid has three of the same Inbreds used in making U. S. 13. Change of the 4th inbred makes a definitely different variety. The kernels are just as soft or perhaps a bit softer. The grain is just as deep. Maturity a little earlier. It has a high shelling percentage. Ears are slightly more tapered than U. S. 13. Ear droppage is less. Color of grain a little lighter. Ears somewhat lower on the stalk.

We consider it superior for machine husking but it is not difficult to shuck by hand. The stalks are strong. It stands up well and resists heat and drought. You will find it an excellent variety for its yields are exceptionally heavy and will give you both quality and quantity production.

We consider this variety adapted to all sections having conditions similar to eastern Nebraska, Kansas, South Central and Southern Iowa and Northern Missouri. It is widely grown throughout these sections and on east to the Atlantic coast. Makes a fine corn further north for ensilage and further south where early maturity is desired. It is a time tested Hybrid that has proven itself one of the best.

FLAT
\$7.00 BU.
ROUND
\$5.50 BU.

HYBRIDS for Ensilage

\$4.25
PER BU.

Farmers from many sections and especially from Wisconsin, Minnesota, Michigan and other states where a lot of corn is planted for ensilage have said, "we would like to put in hybrids for ensilage but the seed is so expensive." They recognize the extra grain yield and the stronger stalks as a big factor in ensilage corn as well as for mature grain. Some have used hybrid seed in spite of materially higher seed costs.

Now you can plant hybrid as cheap or cheaper than open pollinated corn. We have some special grades of hybrids in the round grain that are admirably suited for ensilage planting. They will grow just as well and produce just as much as flat grain corn. In fact we consider it is better for early planting and that it will withstand more unfavorable weather in the spring. You might have to get plates for planting but you get the corn at a big discount.

You can select from any of the varieties on pages 3, 4 or 5. Just state variety wanted and that you want ENSILAGE GRADE ROUND. Figure it at only \$4.25 per bu. Seed is graded for accurate planting and is of guaranteed high germination.

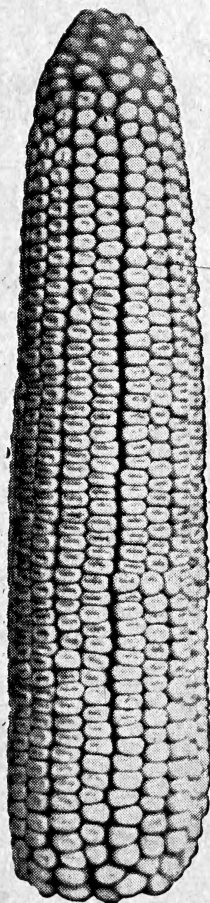

BERRY'S GRADES and GUARANTEE

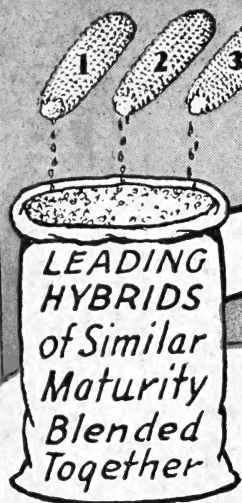

Our Hybrids Are Chemically Treated

This seed is first hand sorted, then dried and shelled. Then it passes through six machines. First the extra large and extra small is removed. Then the kernels are graded for thickness, for width and for length. Next another special machine takes kernels of the same size and grades, then for weight to remove light or chaffy grains. The next step is the application of a chemical dust. This kills diseases that might be prevalent especially in a cold wet spring. We guarantee our seed to germinate 90% or better. It is generally 94 to 96%. You can have 30 days to make any test desired. Write for shipping instructions if you are not completely satisfied. We will promptly refund the purchase price plus freight.

Round Grades for Best Yields

Our tests show that medium and large round kernels make the strongest stalks and tend to be superior to average flat grades in yield per acre. This apparently is due to the greater supply of plant food in the kernel. This helps give the plant a better start. This seems particularly true with unfavorable conditions at planting time. Our tests also indicate that all round grains seem to germinate better when cool weather follows planting. If your planter does not have proper plates they can be secured at reasonable cost. The saving on one bushel will more than pay for the plates. Get started planting round grains. You'll like it—Save Money—Get Big Yields.

Berry's

Hi-Yield

HYBRID BLENDS

\$3²⁵ BU.
ROUND GRAIN
\$3⁷⁵ BU.
THICK FLAT GRAIN

definite reason for making these blends. Most Hybrids have a short pollinating period. If hot, dry weather happens to strike at that time considerable pollen will be killed and this will result in poorly filled ears and thus lower yields. By using two or three varieties mixed, which mature at about the same time and yet have slightly different pollinating dates, this danger is reduced. It gives greater assurance of well filled ears and bigger yields.

Big Savings

Berry's Hi-Yield Blends are made up of the varieties listed in this catalog. We realize that farmers generally are not accustomed to blends but we have so much confidence in the merits of these blends that we are making these up special and selling them at a very low price to get you started using them. Think of it only \$3.25 per bu. for the Round Grain which frequently produces the best yields. That is less than the price of open pollinated corn and far superior to it in performance. Thick Flat at only \$3.75 per bu. which is way below the general price range for Hybrid Seed Corn. All of the varieties rank high in yield and quality. We take a back seat for no one on production.

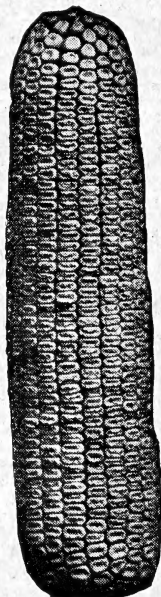

Guaranteed Quality

We guarantee that you will be completely satisfied with the shipment you will receive. The corn has been tested and will germinate 90% or better. The seed is treated to give you added assurance of good stands even under unfavorable conditions after planting. The seed both Round and Flat is graded for accurate planting. After you receive your shipment you can take up to 30 days to test it for germination and do anything you wish to satisfy yourself that you have a great value. If, for any reason whatsoever, you are not thoroughly pleased, drop us a line. We will give you shipping instructions and promptly refund the money you paid—plus freight charges.

THICK FLAT GRADE

\$3.75 Per Bu.

The Thick Flat is a grade in which the kernels are too thick to make the regular flat grades, although they have about the same length or depth. This in our opinion is the sturdiest and most vigorous kind of seed available. It is graded to plant accurately when proper plates are used. We believe you will prefer this to any other grade once you find out what it can do for you.

Better Filled Ears

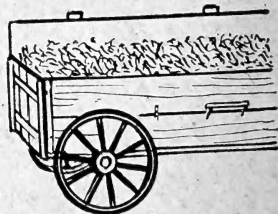

Improved Yields

In the average year any single Hybrid variety will pollinate very satisfactorily. It is during hot, dry spells that the blends are most outstanding. We have had reports from customers telling us that the blends or mixtures they made themselves almost doubled the yield of other single Hybrids and that they had by far the heaviest yielding fields in their neighborhood. Berry's Blends, therefore, are based on actual practical farm experience.

In making these blends we select varieties that are relatively close together in maturity as too wide a variation would result in mature and immature ears mixed in the field. Thus you can secure proper blends and secure this added assurance of big, well filled ears and bigger yields.

Medium and Later Maturity

We put up our Blends in two general maturity classes. The **Medium** which will average around 110 days and the **Later** around 120 days. Be sure to specify which you want when you order Hybrid Blend. The Medium Blend should be found suitable to sections having conditions similar to North and South central Iowa and the Later to South Central and Southern Iowa and on south of this. Either should prove suitable for ensilage purposes further north. Under favorable conditions Medium should mature in northern Iowa.

Larger Yields

ROUND GRAIN

\$3.25 Per Bu.

Because of more plant food in the kernels Round Grains will often produce stronger, more vigorous plants and therefore better yields. Under cold conditions after planting, it usually shows better germination. Graded for accurate planting. If your planter does not have plates for round corn the cost of a set is more than paid for by the saving in cost. Make big savings and get fine heavy producing seed.

SAVE MONEY on QUALITY SEEDS

EVERY POUND **GUARANTEED** TO PLEASE

J. F. SINN
President
Berry Seed Company

A farmer by birth and early training. A man who has had 39 years of experience in the seed business. Recognized as one of the foremost men in the farm seed trade. He strives to give our customers better seed values.

He is always at your service and glad to help you with your seed problems.

He has something special for you on Hybrid Corn and low prices on all seeds.

Dear Friends:

January 10, 1944

As we enter our third year of war, we are confronted with many new problems. Part of the seeds you need are now under OPA and while this prevents runaway prices on the short crops of Alsike, Alfalfa, Clover and Sweet Clover, it has had a tendency to stabilize the market, but on the other hand it has prevented seedsmen from obtaining their usual supply.

What I want to impress upon you is the great shortage prevailing and the importance of our customers of buying early while supplies are available. Don't hesitate to buy soon after you receive catalog. You can be assured early orders have the best chances of being filled and the best qualities will go first. Everyone who needs Alfalfa, Clover, Alsike and Sweet Clover will thank me for advising them to buy early, if they act and send us their order now.

The farmer never was any more prosperous than at this time and in order to produce more next year good seeds are essential. We have a splendid supply of most items. We are particularly fortunate in having a splendid crop of the best varieties of Hybrid corn it is possible to produce. Our prices are low and lower than they would be if we were anxious to make big profits. Taxes take 95% of excess profits, so we would rather share the profit with our customers. This explains why our prices are so low and our values the best money will buy.

Garden seed will again be in big demand. The Victory gardens were a big success and will be helpful again this year. The War Production Board is asking for a 25% increase in all gardens and this will mean even a larger demand for garden seeds which are very scarce so do not delay ordering. Nursery stock is also short, so get your orders in early. The early bird has the best chance to get his order filled.

You will find our prices under ceilings and we will be able to effect a nice savings for you. We guarantee the quality of seed shipped are fully equal to samples so do not hesitate placing your order. We ask for your order with this understanding, you must be satisfied or it is no trade. I know the wise buyers will want to place their order promptly so do not delay after receiving the catalog. We are now in the best shape to serve you, do your part and order at once.

Yours for biggest values,

J. F. Sinn

Greens Fork, Ind.
Dear Sirs:
Have bought several thousand dollars worth of seed from you. Have always found them prompt and reliable and have saved myself and neighbors several hundred dollars, always obtained seed of high germination.
D. W. HARRIS

Springville, Iowa
Gentlemen:
The Marvellous Mixture of grass seed that I have been buying from you for several years is the best. I have been getting good returns for my money, and can heartily recommend to others desiring good seed.

Yours truly,
C. F. BUTLER

Mount Clare, W. Va.
Dear Sirs:
I have been using your farm and garden seeds for some years and find them real money savers. Your descriptions and recommendations are accurate and reliable. Your courtesy and efficient service lead me to recommend you to all who wish to get the best seeds at a minimum cost. For purity and vitality your seeds are unsurpassed.
Truly yours, G. W. CONLEY

New Berlin, Ill.
Gentlemen:
I have been buying seeds from Berry's for 24 years. I have lately club ordered my seeds, inducing my farming friends to order with me. I have bought over \$18,800 of seeds from you in one year. Not one farmer returned better than expected. I always saved from \$4.00 to \$7.00 per bushel by ordering from you. I find your World Brand the very best buy.
J. W. GERHARDT

Hummelstown, Pa.
Dear Sirs: I have found your seeds OK and you have saved me lots of money. Your Lot Honest John Alfalfa has given me wonderful results. I sent you a photo showing the fine big growth. I am well satisfied with all dealings I have had with you.
Yours truly,
DANIEL BEHRENS

New Federal Seed Law Gives Added Protection to Mail Order Buyers

A new Federal seed law requires that all seed shipments in interstate commerce be tagged in accordance with the laws of the state into which it is shipped in respect to any noxious weed seeds. In addition the purity and germination tests are to be given. Thus shipments of seed ordered by mail are required to give you truthful information and correct tests on all state and interstate shipments.

Good Service—Safe Arrival

We maintain shipping points at Clarinda and Chicago although correspondence and orders are all handled through Clarinda. Be sure to remit Chicago prices if you wish shipment from there. Place orders early this year. If on arrival of your shipment there is any sign of loss or damage just have your agent mark it on the freight bill. Send it to us and we will make prompt adjustment. Address all letters to Clarinda, Iowa. We have no office in Chicago.

If you want a receipted invoice ask for it on your order.

Service on Seeding Problems

Perhaps you may be undecided as to what you should sow. You may desire further information on some crops. Possibly you have a farming problem that is hard to solve. If so, write to us. We may be able to help you. Our vice president and secretary, Mr. Joe Faassen, has made quite a study of farm crops. He is always glad to help whenever he can. His services are at your disposal. Feel free to write at any time.

Cleaned Seed

The seed we sell our trade is not as it comes from the grower. It is cleaned and graded either by ourselves or direct through our buying connections. Seed cleaning and grading requires experience and equipment. Often it is necessary to run seed over different kinds of cleaners to get the desired results. Careful adjustments and expert operation are needed to do the best work. This applies also to grading for not all grades are of equal quality. The size and weight of berries as well as color enter into making grades. Our aim in cleaning or in buying cleaned seed is always to give the customer the greatest possible seed value at the price he wants to pay.

GUARANTEE

We guarantee that our prices are lowest, considering quality. If upon receipt of your order you are not entirely satisfied you can return it and your money, plus transportation charges, will be promptly refunded. Or you can keep it 60 days and have the seed tested in order to satisfy yourself that the quality is good and that you have saved money and secured a big bargain. Then if you are not pleased you can return it, and have all money, including freight paid, refunded. You must be satisfied and we guarantee to save you money.

We also guarantee to replace, free of charge, any garden or flower seed that fails to grow on account of poor germination. Our nursery stock is guaranteed to arrive in good live planting condition or it will be replaced free of charge. Our guarantee protects the buyer and is lived up to, so it means just what it says.

DIRECT BUYING

The Sensible
Thing to Do

Supplies Short—Buy Early

Many dealers will not have a normal supply of seed this year. Sweet Clover is very short. Reports to us indicate only 25% to 35% of normal supply. Alfalfa seed is short. Never in all our years of experience have we seen such a scramble for alfalfa seed of hardy origin. Practically the same thing is true of Red and Alsike Clover. Sudan is short, so is Lespedeza. Several grasses are short like Brome Grass, Crested Wheat, Blue Grass and Red Top are scarcer. There definitely will not be enough seed in all lines to supply the demand. We advise you to buy early.

SAVINGS up to 40%

BERRY'S SEED GRADES

World Brand

This is our Extra Fancy grade. It is our purest and highest testing stock. For years it has been the choice of our most exacting and critical trade. We recommend this quality to those who demand the best and invite comparisons to any highest quality grade sold by any dealer.

Dealers Fancy

A high quality. Not quite as fine as the World Brand. It is still a very desirable grade and will pass for the best in many cases.

Planet Brand

This extra choice grade satisfies many customers. Not quite so bright and uniform but they report good seeding at low cost.

Square Brand

Our lowest priced grade. Smaller berried. A little lower germination but more seeds per pound, so it can perform well.

Special Lots

Some seed does not exactly fit into a regular grade or is secured for special prices. These are listed by name such as Lot Leader Red Clover, Honest John Alfalfa, etc.

Parcel Post Rates

Any package up to 70 lbs. in weight and not exceeding 100 inches in length and girth combined can be sent by parcel post. If you want anything shipped by parcel post that is not quoted postpaid be sure to remit to cover postage. First find the zone you are in and then figure the amount of postage from the following table:

	1st Lb. Costs	All Additional Pounds
Zone 1	8c	1c
Zone 2	8c	1c
Zone 3	9c	2c
Zone 4	10c	3 1/2c
Zone 5	11c	5 1/2c
Zone 6	12c	7c

For example, a 10-lb. package to the 3rd zone costs 9c for the first pound and 2c a pound for the next nine pounds. 9 + 18 = 27c total. For short distances or for small packages parcel post is cheaper. Otherwise express. Freight, of course, is cheapest excepting on packages of 35 lbs. or less.

A WORD ABOUT PRICES

The government has established price ceilings on some seeds like Alfalfa, Red Clover, Alsike, Sweet Clover and Timothy. These ceilings are based on purity, germination, weed content, etc., and include freight charges from producer to retailer.

Some of these seeds are so short that most dealers will unquestionably price them at top ceiling prices. You will find Berry prices on the average of the seeds covered by ceilings to be below the top limit that may be charged under government regulations. Thus you are assured of savings that are worth while.

A more important matter than prices will be the question of getting what you need. The prices given in this book will probably not vary a great deal. It is entirely probable however, that the stocks we have now will not last throughout the season and that they cannot be replaced at all. Some may be obtainable but if so we know we will have to charge the full ceiling prices because of the higher cost to us.

By ordering early you will have better assurance of getting what you need. You will have the season's lowest prices and you will have the seed on hand in plenty of time for your needs. Let us take care of your needs now.

HOW TO ORDER

It is easy to order by mail. Use our regular order blank form if you have one. If not, you can use any kind of paper or we will send you order blanks.

Give full name and complete address. Tell where you want the seed shipped to and whether to ship by freight, express or parcel post (see to left for postage rates). If your freight station is different from post office be sure to say so. In case there is no agent at your freight station, then include freight charges in your remittance or let us ship to the nearest station where there is an agent.

Figure up the cost of your order according to latest catalog or price list. If you want farm seeds shipped from Chicago remit Chicago prices as shown in catalog or price list.

Send your remittance with your order. You can send this in the form of a Postal or Express Money order, Bank draft or your own personal check on any going bank where you have funds to cover. Do not send stamps or coin when convenient to remit otherwise. We advise registering letters containing currency.

Address all mail and orders to Clarinda. We have no office at Chicago. Write to Clarinda only. If you want an A.A.A. receipt, ask for it on your order.

SAVE MONEY - BUY NOW

98%
PURE

ALFALFA COSSACK

Lot Choice

This is the same type as the Best or World Brand Cossack described on page 36. The seed is not quite as large and the color not so extra high. In yield, hardness and general character of the plant it is the same. All seed harvested is not equally nice, yet seed of this type is fully capable of producing excellent stands. Many customers report results fully equal to the more expensive seed. So long as the supply lasts it is a bargain in extra hardy heavy yielding Alfalfa.

98¹/₂%
PURE

GRIMM FANCY NORTHERN

Produced in states designated as Northern by U. S. Government under O.P.A. Seed of alfalfa that will stand extremes of cold and heat. We consider this hardy for any part of the nation and a very profitable kind to grow. Not quite as fine as the World Brand described on page 37 but a nice Fancy quality. Larger berries and better color than Lot Bonafide, page 36. Some dealers may sell this as the best. It is a very good quality lot and is priced to save you money. Guaranteed satisfactory.

\$27⁰⁰

98¹/₂%
PURE

WILT RESISTANT LADAK ALFALFA

\$27⁶⁰
BU.

Ladak Alfalfa is in big demand and is especially popular in sections bothered by bacterial wilt. When this wilt is present the leaves become spotted, then brownish in color and many plants are killed out. Ladak Alfalfa is resistant against wilt and besides is a very hardy alfalfa. We consider it fully as hardy as Grimm or Cossack and it gives you wilt resistance too.

It is only because of some special buying connections that we can offer this seed at all this year. We couldn't get much but while it lasts you can get it at a very attractive price. It is a fancy quality lot of northern grown seed. It has been carefully cleaned. Good purity and germination. Shipment guaranteed to please you. This is one of our most outstanding alfalfa seed values. Please be sure to order promptly if you want some of this Ladak Alfalfa. Get started with this valuable strain.

99⁴/₁₀%
PURE

WORLD BRAND KANSAS ALFALFA

The hardy character and extra heavy yields of Kansas alfalfa are not fully appreciated in some sections. Wisconsin farmers know the value of this seed better than some living further south. Kansas Alfalfa is more popular in Wisconsin than Nebraska grown seed. The yields are heavy and they find the hardness well suited to their needs. We have some beautiful Kansas seed, strictly high quality. You will get something extra fine when you order our World Brand Kansas seed. Free inoculation with order for 2 or more bushel.

1/3 RD
FARTHER

HULLED & SCARIFIED KOREAN

See page 28 of this catalog for description of Korean Lespedeza. This hulled and scarified Korean goes a third farther because the hulls are removed. The seed is less bulky and due to being scarified it germinates quicker. Only requires around 8 pounds of seed per acre. Better than regular or unhulled seed for late seeding. It takes considerable extra labor and expense to put seed in this shape but it means very fine quality and it is economical to use. Supply

COMPARING ATLAS GROWTH WITH HEGARI
SEE ALSO 2 FIELD PICTURES BELOW

ATLAS SORGO

THE HEAVIEST PRODUCING SWEET SORGO

See page 41 for Chicago prices

This is one of the most sensational forage crops ever developed. An enormous producer. Yielded up to 18.7 tons per acre, where corn yielded half as much. In dry seasons out produced corn 3 to 1. Nebraska and other states report it the heaviest forage producer.

A matchless drought resister. Corn if it is severely injured by drought will stop growing. Atlas will start again. In sections where drought completely dried up corn, Atlas remained green. Where grasshoppers almost completely wiped out a corn field an adjoining field of Sorgo was practically untouched.

Atlas makes a highly palatable and very nutritious feed. The juice is sweet and live stock, especially cattle, will leave most any kind of feed to get it. They thrive on it. In dry seasons farmers have brought their livestock through with nothing but this feed and had them fat and sleek in the spring. Makes wonderful ensilage.

State Certified or Grown from Certified Seed

There are many varieties of sweet sorgo but we consider Atlas the most profitable to grow. Compare the growth Atlas with Hegari as shown in the pictures on this page. All pictures were taken near Clarinda on the same day. The Hegari was on second bottom the Atlas on upland. Why grow a crop that grows 5 to 6 feet when you can get 10 to 12 feet. Atlas makes a leafy, sturdy growth. Very resistant against lodging. The white seed is very palatable.

The State Certified seed is priced above. The seed grown from Certified seed is about \$1.75 per bushel cheaper. Both are high quality lots. Shipment guaranteed entirely satisfactory.

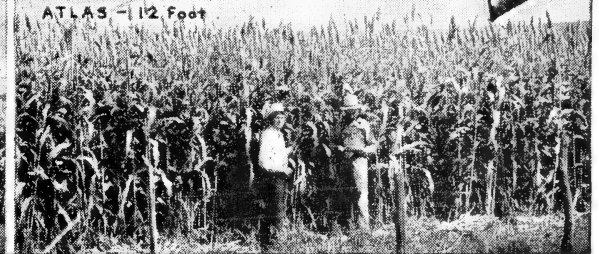

Atlas must have a warm seed bed. Drill it in with seeds 4 to 6 inches apart, 8 to 12 lbs. per acre are used for single row planting. Cut in fall a little before severe frost. Shock to cure.

PAGE 10

HEGARI - 6 Foot

ATLAS - 12 Foot

BILLION DOLLAR GRASS

A QUICK GROWER AND HEAVY PRODUCER

See page 41 for Chicago Prices

This is a tall growing variety of Millet, is a sensational producer. Yields of 26,000 to 50,000 lbs. of green feed per acre produced under favorable moisture conditions. Seed yields of 1000 to 2000 lbs. per acre. Also has made astonishing yields under dry conditions here in southern Iowa. See photo of seed field produced under dry conditions. It was the talk of the neighborhood. In Iowa, Missouri, Minnesota, Wisconsin and on east and up into New England states it has made big money making yields. No wonder these farmers like it. You too may find it one of the best profit makers on your farm. Make the acres you have in forage crops produce to the utmost.

A Fast Grower

Makes a hay crop in 6 to 8 weeks. May be sown during May, June or July. We recommend 20 lbs. per acre although some sow less. Grows up to 6 and even 8 feet high. Valuable feed for dairy and young cattle and sheep. Does not become poisonous due to drouth or frost. Generally makes its heaviest growth on fairly fertile moist land.

The seed we have for you is well recleaned. Our price on this seed is low. Costs only around \$1.25 an acre for seed.

Sudan Grass

**SPECIAL PRICES ON
LARGE QUANTITIES**100 lbs., \$12.00; 300 lbs., \$35.00, subject to market variations. Bushel weighs 50 lbs.
Chicago Prices 25c per 100 higher.**GROW IT THIS YEAR****A Most Profitable Crop**

This valuable, quick growing, heavy producing grass should be grown on every farm. Produces enormous hay crops. Makes fine pasture during hot summer months. If you are needing a big hay or pasture crop this year be sure to sow Sudan. It is a sure crop and easy to grow.

Seed Supply Short

Last year the production of Sudan Grass seed was not large. It is even smaller this year and is scarcer than it has been for a long time. We were able to buy a supply early and we are selling beautiful high quality seed, while it lasts at the money saving prices here shown. Take a tip that will save you money. Buy your Sudan Grass seed now.

Description

Sudan belongs to the cane family but is finer stemmed and a free stooler. Grows 4 to 7 feet high and yields 4 to 10 tons of cured hay per acre. Livestock is very fond of Sudan. It has good feeding value. First hay crop can be cut in about 60 days after seeding and second and third crops 30 to 40 days apart.

Sudan is one of the best drought resisters known and supplies an abundance of fine pasture or hay during the hot dry months of the summer when feed is often scarce. That's why every farm should have some of it. It has been a life saver to thousands during the past few years.

How to Handle

Sudan is a warm weather crop. Do not sow until corn planting time or after. Prepare a good seed bed as you would for corn. Drill in close rows or broadcast. Cover seed about an inch deep. Sow 20 to 25 lbs. per acre. You can begin pasturing when 6 to 8 inches high. Cut for hay when in bloom, although you can cut earlier or later without damage or loss.

A Saving Guaranteed

The true basis of value at a bargain price is the quality you receive. We will sell you this seed subject to any test you care to put it to. You can have up to 60 days to satisfy yourself that you have secured a quality lot at a bargain price. We guarantee to save you money on our Sudan Grass. If this seed fails to please you in any way let us know and prompt adjustment will be made in conformance with our guarantee.

It is easy to grow Sudan Grass when you use seed of such fine character. We urge you for the sake of better farm profits to grow some of it this year. It produces enormous quantities of feed in a short time. It keeps right on the job when heat and drought are damaging other crops severely. You get good bargains by buying now.

Rockwell City, Iowa.

Gentlemen: I have been a customer of yours for several years. Your Red Clover seed is a wonderful producer. Your Dakota No. 12 Alfalfa, both in price and quality, has given me the best of satisfaction. Yours respectfully,

S. G. FOWLIE.

NEW CROP
SEED**

MIXED MILLET

**Serviceable Seed at
Low Cost**

Here is really a bargain in Millet for a hay crop. It is practically all German type Millet but contains a little percentage of other millets that make it unsuitable to use for seed production. For a hay crop, however, it makes a wonderful seeding and should produce a yield equal to a straight German type. This lot varies a little from bag to bag but is mainly German type stock.

These taller growing, heavy producing, hay millets are in big demand. You can buy this Mixed Millet at a very substantial reduction in price. It will give you a great big practical bargain. This seed is new crop seed of good germination. It is nice bright plump seed. The seed has been re-cleaned for the removal of impurities and our analysis shows it free of bad weed seeds.

This is one of our best selling values. Farmers who do not care about a pure seed crop like this mixed millet to get heavy hay production at a lower seeding cost.

SILVER MINE

A very popular variety in the corn-belt. Good yielder. Does well on a wide variety of soils. Best variety for thin land. Maturity around 110 to 115 days. Will stand thick planting. Grains and cob both white. Kernels medium rough and quite deep. Makes good solid corn and has a good shelling percentage. The Silver Mine type corn that we have is the finest we have been able to obtain and shipment is guaranteed to please you. This variety is one of the most widely grown white in the corn-belt.

**Open Pollinated
Seed Scarce**

Our Corn Is Nearest Obtainable Type of Varieties Listed

The swing to Hybrid Seed Corn has been so widespread since the softer varieties were developed that fields of open pollinated corn are becoming scarce. We, however, endeavor to secure for those who want it, good quality seed stocks. We sell the varieties listed here by types and endeavor to secure these as true to variety as possible. Satisfactory shipment and high germination are guaranteed. If you are not fully pleased write for shipping instructions and refund. You can take up to 30 days if you wish to make germination test.

SILVER KING

An early maturing white also known as Wisconsin No. 7. Resembles Silver Mine but ears a little smaller and grains not quite so deep. About 10 days earlier. A good yielder and one of the best of earlier whites. Our Silver King type is very nice seed.

GOLDEN GLOW

A heavy producing early yellow type. Stalks somewhat taller than the average of this maturity. Very popular with northern growers and those wanting an early feeding corn. Fine yellow color. Solid, well filled ears. Grain of medium depth. Maturity around 95 to 100 days.

REID'S DENT

This type of corn has for many years been the most widely grown. This is the moderately rough strain. Average maturity around 110 days. Makes good solid compact ears. We consider our Reids Dent type to be an extra heavy producing strain. Compare it with any other. Plant ours next to any other. Keep a record of yields. Observe quality. We are confident you will find ours to prove the most profitable.

NEW PERFECTION

This is shipped from Clarinda only

This is a large eared yellow corn. It has big ears. The kernels are broad and thick. They are moderately rough. Runs 16 to 18 rows of kernels per ear. Some customers like this big eared type corn better than Hybrid. It is a vigorous grower. The grain has a beautiful yellow color. It is a heavy yielding open pollinated corn. We know of none better. Maturity in this section classified as 110 to 115 day. You can save seed from New Perfection for replanting. We consider this superior to our old Big Perfection. Seed has high germination. If you want a big open pollinated corn that is not very late we believe you will like this extra well. A very heavy producer.

Merko

**Corn Treatment
only 3c per acre**

Apply as a dust any time before planting. Controls seedling blight and root and stalk rots. Increases germination. Permits earlier planting. One pound treats 8 bushels. Directions furnished.

Postpaid: 4-oz. tin,
50c; 1 lb., \$1.25.

St. Charles White

The famous red cobbed white ensilage corn. Also grown for mature grain. Large size ears. Large deep grains. Tall leafy stalks. Leaves broad and succulent. Yields up to 40 to 50 tons of green feed per acre. A very heavy grain producer. An excellent white type and a sensational producer for open pollinated corn.

Krug's Dent

Similar to Reids. Ears may run a little smaller but this variety has a great yielding record. Firm, solid ears. A fine depth of kernel. About the same maturity as Reids. Year in and year out it will out-yield any open pollinated corn in its maturity class. We have a nice type of this stock and advise ordering early.

SOY BEANS

A Fine Cash Crop

Soybeans are taking their place as one of the important grain crops. They are bought and sold like other grains in many markets. There is no longer much question as to a market for your crop. You can cash in on them like wheat or corn if you do not wish to use them on the farm.

Many farmers do not harvest for beans but rather prefer to take the crop in the form of hay. They produce heavy yields and the hay is of high value being practically equal to Alfalfa in feeding value. No need to be without plenty of rich hay if your clover or alfalfa fails. Sow soybeans. They stand heat and drought and deliver the goods.

Good Profit in Beans

Soybeans are widely used instead of small grain crops and are generally found more profitable yielding up to 25 to 30 bushel per acre. On account of their heavy growth they are not suitable as a nurse crop for grass or clover seedings. Soybeans are legumes. They gather nitrogen from the air for their growth. They have a dense root system and make soils mellow.

The seed we have is cleaned and much more satisfactory and economical than stock containing a lot of split beans. Send us your order for beans. The quality and savings must please you or you can have your money back. See Guarantee Page 8. See also Page 15.

How to Handle Soy Beans

Plant when weather and soil is warm, corn planting time or later. Prepare a fine clean seed bed. For hay broadcast or drill in close rows 1½ to 2 bushels per acre. For seed in 18 to 20 inches apart 30 to 40 lbs. per acre. Cultivate with a harrow while beans are small and dry. Cut for hay when beans are fairly well formed, but before leaves fall. Harvest for seed when beans are practically ripe.

Inoculate Your Seed

Inoculate Soybean and Cowpea seed. That helps to secure a more vigorous growth, heavier yields and higher value. Cost is low. Easy to apply. Full directions furnished.

Postpaid Price Berry's Nodule Germ Inoculator for Soy Beans: 2 bu. size, 30c; 5 bu. size, 45c; 25 bu. size, \$1.95; carton six 5 bu., \$2.60. Also see page 41.

Types of Soy Beans

Dunfield Type. Pure yellow. Heavy seed producer and an excellent hay type. Stands up well. Does not shatter easily. Matures in about 110 days. Medium sized leaves and stems. An extra good all purpose variety.

Mukden. A popular variety. Maturity about same as Illini, 105 days. Seeds about same size, yellow color. Higher protein than Illini possibly a little lower in oil. A good yielder and a profitable variety.

Illini Type. Very popular. Grown for hay north of Central Iowa and for hay and seed south. Medium in stems, leaves and maturity. Grows erect. Color yellow. One of the most profitable varieties.

Kingwa Type. A Black Soybean of outstanding merit and quality. According to all customers reports it is greatly preferred to Wilson Black or Black Ebony both for hay and seed production. Especially valuable as a hay variety. Heavy producer and excellent quality hay.

Virginia Type. Hay bean. Makes large growth with enormous yields of hay. One of the best for poor land. Seed brownish and smaller than the average. Requires less seed per acre. Prices on Pages 40-41.

COWPEAS

This is a money making legume. A soil building and hay crop that is widely used.

Quick maturing crop. Requires more warmth than Soy Beans. Grow on poor soils. Very good for sandy or light loam. Makes rich feed. Also good soil builders. Our seed stock is good. See quotations page 41. Write for prices on large amounts. State quantity desired. Can ship southern orders from St. Louis.

Inoculate Cowpeas. See Page 41. Sow 90 lbs. per acre broadcast or 40 lbs. in rows 24 inches apart.

Cowpea Types

Whippoorwill Type. Medium early in maturity, about 80 days. This is the most popular of all cowpea varieties and we have a big demand for them. They grow quite erect, which is a desirable characteristic and, no doubt, one of the reasons for its popularity. They are heavy producers and make a profitable kind to use. Seed is speckled brown in color.

Gray Goose Type. Large seeded variety. A prolific producer. Plants half bushy. Very popular and considered a valuable variety in many sections. May be known as Taylor or Gray Crowder to some farmers.

Mixed Cowpeas. Somewhat cheaper than unmixed yet many prefer a mixture. Fine for pasture, hay or soil building. Very desirable unless pure seed crop is desired. All cleaned stock. We have a big call for mixed cowpeas. See page 41 for Clarinda and Chicago prices.

FIELD PEAS

For early hay or green feed nothing equals Field Peas. Can be sown as early as land can be worked. Disc or harrow in 1 to 1½ bushels Peas with 2 bushels Oats. Cut for hay when oats are in the dough stage. Production is very heavy and feeding value very high. Also fine to plow under for soil enrichment. Crop very fattening. Increases milk production. Excellent for hogs. Solves the problem for early green feed as no other early crop can do. Inoculate Field Peas. Shipment is guaranteed to please you in every way. Crop limited but our prices low. See page 41. If you are going to be short on feed next spring we recommend this crop very highly.

Edwardsville, Ill.

Dear Sirs: I have bought seed from you for several years. I find them to be O. K. in every way. The quality and the germination is very satisfactory. Your seeds produce results. Also your prices are real money-saving quotations. I am well pleased.

Yours truly,

H. C. STRASEN.

Richland

AN EXTREMELY POPULAR SOYBEAN Early—Heavy Yielding—Oil Producer

Why So Popular

Richland Beans are in tremendous demand because they have certain definite qualities that many farmers want.

1. **Early Maturity.** These beans are 5 days earlier than Mukden and 10 days earlier than Dunfield or Illini.

2. **Heavy Yielder.** It is a top yielder in the early maturing class ranking extra high in northern Iowa and yielded about 30 bu. per acre in Central Iowa in a four-year test.

3. **Lodging Resistant.** It has the strongest straw and is the most lodging resistant of any commonly known bean.

4. **High Oil Content.** It ranks among the best in its oil content and that is a very vital factor during these times.

5. **Adapted to Late Planting.** Because of its earliness it can be planted later if necessary and make a good crop. Best bean we know of for late planting.

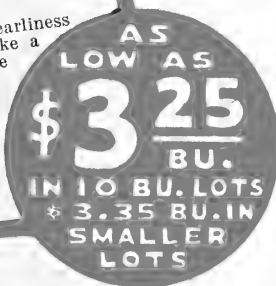

6. First crop in neighborhood generally can be sold locally for seed at premium prices.

Here is a soybean that has leaped into popular favor in a big way. They are a great favorite among farmers wanting an early maturing bean with a high oil content. Many sections like Northern and North Central Iowa require an early maturing bean. Even further south farmers are looking for earlier maturity, for unfavorable spring weather or rush of other spring work often causes delays in planting.

These beans are excellent main crop beans for the area mentioned above and northeastern Nebraska. South Eastern South Dakota, Southern Minnesota, Wisconsin, Michigan, and New York. North and Central Indiana, Ohio and most of Pennsylvania, West Virginia, etc. For late planting further south we consider them an excellent variety.

Richlands are the strongest stemmed and most lodging resistant bean in the corn-belt.

The straw is somewhat shorter than the average, growing about 35 inches in northern and central Iowa. This permits planting rows somewhat closer together thus increasing yield of beans and bringing production close to later maturing varieties. Seed is smaller and goes further. In Northern Iowa, Richlands outyielded Dunfield, Illini. In Central Iowa there was about 1 bushel difference.

SEE PAGE 41 FOR PRICES

LOW PRICES ON FINE QUALITY SEED

We secured about 2,500 bushel of these wonderful beans at a price that enables us to give you a close price on them. These beans are being held by some growers at around \$3.50 per bu. in carload lots. These beans are carefully graded and cleaned and of high germination. Such seed is always economical and gives you the best assurance of satisfactory results.

These Richlands stand up on rich soil where they produce their best.

Economical Production

To raise a maximum crop of beans of high quality they must be kept clean. Prepare your seed bed as for corn. If possible, disc and harrow a few times before planting. Drill or plant in rows 21 to 42 inches apart. Many good growers space the rows 34 inches. Use about 60 pounds

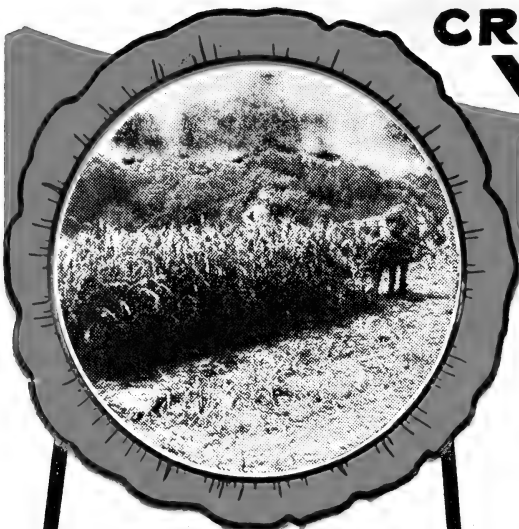

of seed per acre. Cover about 1½ inch deep. If the ground crusts before beans are up, break the crust with a harrow. Cultivate beans 2 or 3 times with cultivator or harrow. Do this when plants are dry. Cross cultivation with a harrow is excellent. Slant teeth somewhat. There will be plenty of beans left. Get the weeds when they are small. The work you spend will pay splendid profits.

Be Sure to Inoculate

Poorly inoculated beans look yellow and sickly. It costs so little to inoculate and it can make a wonderful difference in results.

Price: 2 bu. size, 30c; 5 bu. size, 45c; 25 bu. size, \$1.95; a carton of six 5 bu. size packages, \$2.60. Berry's Nodule Germ Inoculant.

CROPS of SPECIAL VALUE MILLETS

BERRY'S ANNUAL PORK PRODUCER

A rapid growing mixture of legumes, forage and grass crops. Makes a wonderful pasture. Can be used a few weeks after seeding. Very productive. High in protein. Builds big body frames, reduces grain consumption. Makes hogs of marketable size in quicker time. Contains Peas, Vetch, Rape, Rye, Barley, Oats, Wheat, etc. Sow 40 to 50 lbs. per acre early in spring. This is a great pasture combination at low cost. See page 41 for Clarinda and Chicago prices.

VETCHES

SPRING VETCH

Spring. An annual variety having much the same characteristics as peas. Does well wherever Canada Field Peas are grown. Requires cool growing season. Should be sown early, using 50 lbs. per acre. Grows 3 to 5 feet high. Is quite finely stemmed. Generally sown with a bushel or two of oats and the two cut together for hay. Grows rapidly, yields heavily. Excellent feeding value; high in protein. Produces a wonderful early hay crop. Makes best hay if cut when in full bloom. Does not live over winter.

Scotia,
Nebr.

Dear Sirs:

My father started buying seeds from you in 1898 and I have used Berry's seeds for the past 15 years. Have never had a complaint. You have always satisfied me and saved me money.

Yours truly,

CHAS. KEOWN.

SAND OR HAIRY

Also called Winter Vetch. May be sown spring or fall. Lives over one winter. Use 20 to 25 lbs. per acre. Can be sown with spring grain and pastured some in fall. Remains green for a long time. Excellent cover crop. Fine soil builder. Good yielder. High feeding value. Inoculate all Vetch seed. See Pages 40-41.

GERMAN OR GOLDEN TYPE

This is that beautiful, heavy growing variety that makes such wonderful production. Its leafy growth is 4 to 5 feet tall. Yields up to 4 to 5 tons per acre and seed yields of 40 to 50 bushels. The feeding value is fine. It is one of the most popular varieties of millets and very widely grown.

This crop can be sown any time after corn planting until the latter part of July. Sow 40 to 50 lbs. per acre for hay production; 25 to 30 lbs. per acre for a seed crop. Our seed is secured from good sources and we guarantee shipment to please you. See page 41 for Clarinda and Chicago prices.

WHITE WONDER TYPE

This runs our Golden Millet a close second in popularity. Many think it is better. It has a dense foliage and broad leaves. A wonder for production. Matures early in spite of its big size. It has long heavy seed heads and is a good seed producer. Color of seed is white. Makes excellent hay if cut just when seed heads are beginning to form.

Millets make an excellent "catch crop" or to give an extra crop after an early maturing one has been taken from the land.

SIBERIAN OR EARLY RUSSIAN TYPE

Two to three weeks earlier than German. Can be sown later but does not yield as much. Hay is of very fine quality. Grows 2 to 4 feet. Seeds reddish brown. Sow 35 to 50 lbs. per acre.

PROSO-TYPE MILLET

Also Known as Hog Millet—Broom Corn Millet and Russian Wheat.

This Millet is grown almost exclusively for seed. A very prolific producer. Seeds are larger than other millets. Makes fine feed. It is used in some countries for human food. Equal to Barley in feeding value. Makes extra fine poultry feed.

Proso is a heavy seed producer, yielding up to 60 to 70 bushel per acre. It matures in sixty to seventy days. Makes a good cash crop. Needs warm weather and soil for quick germination. Sow 40 to 50 lbs. per acre. Drill in close rows or broadcast.

The demand for this seed has increased very rapidly in the past few years. Order as early as possible.

DWARF ESSEX RAPE

**Reduces Pork Production Costs
Enormous Producer—Grows Quick**
See Page 41 for Clarinda and Chicago Prices

One of the greatest of all quick growing forage pasture crops for the corn-belt. Can be pastured within six to eight weeks after seeding. May be sown from early spring until mid-summer. Equal to alfalfa in feeding value for hogs and sheep and on amount of grain required and gets hogs ready for market quicker. In tests at the Iowa Experiment Station Rape pasture cut down more on grain consumption and tankage than Alfalfa and carried more head per acre.

Rape under favorable conditions yields 40 tons or 80,000 lbs. of green matter per acre. On a dry basis it analyzes as high as 37% protein. It is also high in calcium and phosphorus. Superior to alfalfa and clover as a corn balancer. Endures trampling and grazing if not eaten too close to the ground. Provides pasture from early spring until the ground freezes in November.

Sow alone in spring or with oats and pasture when oats are removed. Also good to sow in corn at last cultivation. Use 5 to 6 lbs. of seed per acre. Grows on many soils. Does best on fertile well drained loams. Not so well adapted to sandy or stiff clay soils.

Our seed is produced from Genuine Holland Dwarf Essex seed stock and guaranteed the finest obtainable in the U. S. Rape seed is a very short crop this year. See page 41 for prices.

Small lots 5 lbs. postpaid \$1.50

CANE

A Leading Forage Crop

A crop that is rich in sugar and fat and very palatable. An enormous yielder producing from 10 to 15 tons of excellent green feed on rich land. A most remarkable drought resister. Especially valuable in dry hot seasons. Makes a wonderful hay crop when sown at the rate of 75 to 100 lbs. per acre.

Some farmers get cash out of their ordinary hay crops and use cane for their own feed supply. A few acres of cane will make as much hay as many acres of Timothy. Your live stock will relish cane hay and fatten on it. You can also pasture cane or cut it for green feed. Makes excellent summer and early fall feed. It is also used for ensilage. Cane is also a good seed producer, yielding 30 to as high as 60 bushels per acre.

How to Handle

Sow quite heavily for hay or pasture, 75 to 100 lbs. per acre. Heavy seeding makes a finer growth and therefore easier to cure. Do not sow until corn planting time or after. It is a warm weather crop. Drill in close rows, or broadcast. Cover about an inch. Can be cut and cured like ordinary hay. Takes a little longer to cure than ordinary grass hay.

Early Amber Type. The kind most generally grown and of great value because of its splendid growing qualities.

Early Orange Type. Heavier stalks, more abundant leaves. Head more compact. Heavier yielder but a little coarser.

CANE for MOLASSES

To make good sorghum, seed must be pure and we take care in getting this seed direct from sorghum producers. We do not guarantee the crop, but we consider our seed equal to if not superior to any on the market.

Red or Orange Type. Secured by us for Molasses purposes from local growers who make sorghum. We know this sorghum or molasses is of excellent quality both as to color and flavor and we believe you will be highly pleased with it. It is juicy and is the choice of most sorghum makers in this section.

Price, 1 lb., 30c; 5 lbs., \$1.00, postpaid. Not prepaid, 5 lbs., 75c; 10 lbs. or more, 11c per lb.; 50 lbs. or more, 10c per lb.

KALO

This is Early Kalo. A drought resistant grain sorghum. Heavy in production. Becoming very popular in sections outside regular grain sorghum section because of its fine quality and wide adaptability. See page 41 for prices.

BERRY'S Special GRAIN and HAY CROPS

KAFFIR CORN

Our Kaffir type grain sorghum is used to some extent for hay. Stalks less juicy than cane and not sweet. Stands lots of hot dry weather. Makes fine poultry feed and suitable for all kinds of live stock when ground. Produces up to 40 to 50 bushels of seed per acre. For grain drill in rows 30 to 40 inches apart using 6 to 8 lbs. of seed per acre. For hay drill close or broadcast 75 to 100 lbs. Cut off heads, cure 10 days to 2 weeks, then thresh. The use of Kaffir corn is on the increase. While it has always been a main crop in sections subject to drought, farmers in the regular corn-belt are planting at least small acreages. They like it especially well for winter poultry feed. You can produce a lot of feed on a few acres and the seed cost is low.

See page 41 for prices. Small lots, postpaid: 1 lb., 20c; 5 lbs., 75c.

SEE
PAGE

PRICES

HEGARI

Our Hegari Type sweet sorghum is somewhat similar to Atlas (page 11), but does not grow as tall. Very nutritious. Valuable for grain, dry fodder, ensilage and pasture. Yields up to 5,000 lbs. of grain per acre and up to 18 tons of ensilage. Live stock especially cattle are very fond of it due to its sweet taste. It combines the grain production of Kaffir and Milo with the high forage value of cane. For grain production drill like Kaffir 6 to 8 lbs. per acre. May be double rowed using double the amount of seed. For hay drill in close rows at 75 to 90 lbs. per acre. Postpaid 5 lbs. for 75c. See page 41 for quantity prices.

BUCKWHEAT

A quick growing grain crop. Matures in 10 to 12 weeks. Excellent catch crop. Sometimes sown after small grain so as to get two crops from the land. Good cover crop for orchards. Makes land mellow. Good for bee pasture.

One of the best crops for very poor soils. Responds to increased fertility. Does not like lime and should not be sown on very wet land. Can be grown most anywhere north of the cotton belt. Prefers cool weather, especially at blooming time, but is sensitive to frost. Prepare a good seed bed. Sow 3 to 4 pecks per acre. Yields up to 50 bu. per acre depending on conditions. Clarinda-Chicago Prices Page 41. Postpaid, any of above five crops. 1 lb. 20c; 5 lbs., 75c.

MILO MAIZE

Our Milo Maize type grain sorghum is similar to Kaffir. The stalks, somewhat more pithy, are considered one of the best drought resisters. The grain makes fine feed. White in color. Follow suggestions given for Kaffir in planting. Milo is a good yielder. Widely used for Chicken feed. It is grown in place of corn in sections of extreme drought. Farmers who have grown these grain sorghums generally want at least a few acres. See page 41 for prices. Small lots postpaid 1 lb. 20c; 5 lbs. 75c.

The Famous

BOONE SEED OATS

DISEASE RESISTANCE

This Boone oat is outstanding in its ability to resist the four leading oat diseases. These are Crown or Leaf rust, Loose Rust, Covered Smut and Stem rust. Its resistance to stem rust is especially valuable because this disease breaks out severely every three or four years. It is a serious menace to most oats.

Now is the time to start a new variety and when you start take the best. Sow something that will do well year in and year out and over a period of years beat others. This isn't like Hybrid corn that you buy every year. Start them now and you have solved your oat problem with profit for many years. Show your neighbors something about raising oats. You'll probably be in the seed business yourself next year selling your crop of Boone oats at premium prices.

ADAPTABILITY

These are quite early in maturity. They have a strong stiff straw and stand up much better than most early kinds. Kernels are well filled. Color has a yellow cast. We consider these oats excellent for nearly every part of the country where spring oats are sown. We don't believe you can beat these Boone. In southern Iowa they are exceedingly popular and replacing Columbia, Fulghums. This indicates their adaptability in the southern spring oat section. Naturally they are fine either east or west where similar conditions prevail. They should do well in Kansas, Nebraska, South Dakota, Iowa, Minnesota, Missouri and on east to the Atlantic seaboard, including the New England states.

SENSATIONAL YIELDER

An Early Oat Good for 105 Bu. Per Acre

Farmers are clamoring for Boone Oats. Dealers write: "can't you spare us some of your Boone Oats." Agricultural authorities ask us if we have a good supply. Why all this tremendous demand? The answer is yields. Big Bumper yields. Also it is Quality. Disease resistance and Consistently Fine Performance. Never in all of our experience have we seen an oat jump into such high public favor in so short a time. And it did it without any high pressure sales campaign. It has jumped into the limelight purely through superior merit.

Yield Records High

Eighty bushels per acre in an official Iowa test for an average of six years. Once in a while there will be a good oat year when most oats will yield heavily. When it averages 80 over a six year period there, my friends, you really have something. It outyields many late oats over such a period. Illinois official test 104.4 bu. per acre. We do not know of a place where Boone oats were sown that it did not prove a dandy. The more years it is tested the better it should show up. When you run into bad years there is when Boone oats really "go to town" and usually those are years when prices are highest.

A Hybrid Selection

The Boone oat is a selection from a Hybrid between Victoria, a South American oat with wonderful disease resistance, and the Richland, a heavy yielder. This combination makes it a wonderful heavy yielding, disease resistant variety. We urge you by all means to get started with these great oats for you should find them very profitable and satisfactory. Better quality and Bigger Profits. **Prices "Certified" seed: 25 bu. or more, \$1.90 bu.; 10 to 24 bu., \$1.95; smaller lots, \$2.00 bu. Non-Certified: 25 bu. or more, \$1.50 bu.; 10 to 24 bu., \$1.55 per bu.; Smaller lots, \$1.60 per bu.**

Prices f.o.b. Chicago, 10c per bu. higher.
See page 41

HIGH QUALITY SEED STOCKS

The Certified seed we price in the Boone, Tama and Marion oats is seed that has been grown under state supervision and for which the growers have complied with all regulations and paid all fees. The non-Certified comes from originally certified stock and for all practical purposes is equally satisfactory. Some growers do not care to go through the "red-tape" necessary for Certification. Both kinds have been thoroughly re-cleaned, are equally high in germination and both will produce the same big yields and be alike in disease resistance.

SENSATIONAL MARION

A GREAT DISEASE RESISTER

An Amazing Yields

A Great Early Oat

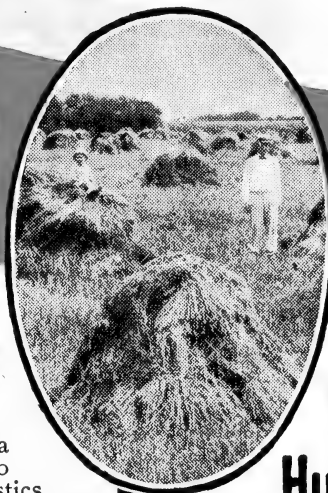

The Marion Oats like the Boone and Tama were secured by crossing or hybridizing two varieties each having outstanding characteristics and getting a new variety that had the best of both of the strongest features. The varieties that were crossed to make Marion were the Markton which is a variety highly resistant against smut and Rain-bow which is a selection of Green Russian developed at the North Dakota Experiment Station. This one is highly resistant to rust. Thus a new variety was created that was not only highly resistant to these diseases but an extremely heavy yielder as well

Characteristics

The Marion Oat is a variety highly resistant to both loose and covered smut and stem and leaf rust. It develops as a rule the heaviest grain of all these early hybridized oats. The test weight per bushel is almost invariably heavier. The straw is a little taller than the Boone. It matures at the same time. In yielding ability we consider it fully equal. Some sections report heavier yields from Marions and another says the Boones did a little better. It may vary from one season to another. You will be well pleased with whichever you select. On very rich land the Boones might prove a little better but on the soils of average fertility you may prefer the Marion. Many farmers do.

Comparative Yields

In a 3 year test Marions outyielded Boones slightly in Central and Southern Iowa. In an Illinois test at De Kalb, Marions were at the head of the list of all varieties grown and yielded 10.2 bu. more per acre than the average of 23 varieties. At Urbana, Illinois, it was at the head of a test of 31 varieties. This variety is capable of producing yields well over 100 bu. per acre. It is a wonderfully fine oat. Price same as Boone. See description of grades and prices on opposite page.

SEED OATS

NEWEST Hybridized TAMA

This is a selection from crosses of the same varieties that were used in producing Boone, Vicland and Control oats. It is almost impossible to tell them apart. However, experiments in Iowa over a five year period will indicate it is somewhat superior to Boone in yield and general growth habits. We also saw reports last spring that they appeared to have a definite resistance to blight.

In maturity it is equally as early as Boone, Vicland and Control. This is also true of the other outstanding characteristics of these varieties namely very strong straw. A high degree of resistance to crown or leaf rust, stem rust and loose and covered smut.

These oats do not "run out" quickly like some northern oats you may have tried. You can use seed from the crop you grow for several years with equally satisfactory results.

We had our representative out early contracting seed so we can take good care of early orders. These Tamas are in big demand for they have so conclusively proven their heavy yielding qualities under a variety of weather and soil conditions. Once you sow oats like these you will never go back to the old kinds you may have used in the past.

Price "Certified" seed 25 bu. or more \$2.00; 10 to 24 bu. \$2.05 bu. Smaller lots \$2.10. Non-Certified 25 bu., \$1.70; 10 to 24 bu., \$1.75; smaller lots \$1.80. 10c higher at Chicago.

CONTROL OATS

This is a selection from the same cross that made Boone, Tamas and Vicland Oats. This variety was not distributed through regular Certification channels but was distributed to various state institutions in Iowa. They proved so sensational that farmers in the neighborhood of these institutions clamored for some of the seed. While not Certified these oats through their heavy yields and fine quality sold themselves to all farmers who saw them grow and they have continued to produce. We cannot tell them apart from Boones and do not believe anyone can. In yield quality and disease resistance they are tops. Price: Same as Non-Certified Boone. Clarinda only.

HULLESS TYPE

Big Yields—No Waste—Fine Feed

Ordinary oats are 28 to 40% hulls. This variety has no hulls. It's all meat. Grains similar to rye but softer and lighter in color. They are also excellent producers, in several cases having outyielded the ordinary hulled oat. Even should it fall a little below in yield the increased feeding value of the Hulless makes it very profitable to grow.

Straw is of medium length and strong. Equally as hardy and drought resisting as ordinary oats. These oats can be fed without grinding. They certainly are fine feed. One grower reported this Hulless oat smut free while common oats were badly affected. In order to help prevent smut we treat all our Hulless oats with copper carbonate to destroy smut spores. This treatment is effective only on Hulless.

SPELTZ

NORTHERN GROWN

ALSO CALLED EMMER

Great Drouth Resister. Practically Rust and Smut Proof. A Good Producer. Dandy Feeding Grain

This grain is one of the oldest grains known to mankind. It was apparently grown in prehistoric times. German-Russian immigrants introduced it to the United States.

It is a remarkable spring grain crop. Really a type of wheat. Shucks cling to the grain. Generally two grains in a shuck and somewhat softer than wheat. Makes a nutritious feed. The kernels with the hulls removed have about the same composition as wheat. Best as ground feed. Highly resistant against rust and seldom injured by smut. Also an excellent drought resistant grain. A good producer and under drought or rust conditions it is especially a desirable crop. Matures early. Makes a good nurse crop. Grown from Canada to Texas, Iowa, Minnesota, Wisconsin, Michigan and other states are growing it as well as Western States where drought conditions generally prevail.

Grow some speltz this year and show your neighbors what this drought and disease resistant grain can do. Sow in the spring. It is an ideal nurse crop. Sow $2\frac{1}{2}$ bu. per acre. Set drill for grain can do. Sow early as possible. Cut before dead ripe. Thresh as for oats but not too close. It is a remarkable grain crop. Its nice heavy grains will delight you. Splendid for all kinds of stock.

Prices.

SPRING WHEAT

NORTHERN GROWN THATCHER TYPE

Exceptionally Rust Resistant

Thatcher is a beardless rust resistant spring wheat first released to growers in 1934. Developed by the Minnesota Experiment Station. Has given sensational performance especially in years when stem rust was damaging. Reports during the bad rust years of 1935 and 1937 show yields of Thatcher 250% of New Marquis and over 350% of Red Fife. Think of $2\frac{1}{2}$ to $3\frac{1}{2}$ times as much wheat per acre grown side by side with the other varieties. If you live in a section having rains, morning dews and relatively high humidity by all means grow Thatcher wheat.

Thatcher has a very strong straw. Not as tall as some varieties. Excellent for rich land. Makes a wonderful nurse crop. Matures 2 to 4 days earlier than New Marquis. Heads are short and compact. An excellent milling wheat. It is also quite resistant to bunt and loose smut. This is by all odds the most profitable spring wheat for sections susceptible to stem rust damage.

Our seed is northern grown, re-cleaned and very nice. Supply limited.

SPRING RYE

Strictly a spring grain crop. Sow early in spring. Grain looks like Winter Rye. Used mainly as a grain crop. May be pastured or cut for hay. Sometimes combined with Field Peas for hay. Big yield on rich land. One of the best small grain crops for thin land. Makes fine feed. Sow early in spring using about 2 bu. per acre.

Wilt Resistant FLAX

Grow Flax for bigger profits. Prices have ranged from 6 to 10 times prices paid for oats. These famous Wilt Resistant varieties Bison, Red Wing and Linota may reasonably be expected to yield 10 to 15 bushel per acre.

Higher yields than these are secured. These varieties are real money makers. Wilt drove Flax out of many sections. These wilt resisters are bringing it back. Adapted to most of the spring oat section having rainfall of around 25 to 30 inches.

Flax Facts and How to Grow It

Flax does best on medium to heavy land. It is not good on light soils. Biggest yields follow corn, some other cultivated crop or soybeans which leave the land reasonably weed free. Sow about spring grain seeding time. Late seedings may reduce yields. Seed bed should be firm. Pack with a roller if necessary. Do not cover over an inch. Half an inch is generally plenty. Drilling is best. Sow $\frac{3}{4}$ bu. per acre of Linota and Red Wing or about 1 bu. per acre of Bison. Harvest when bolls are ripe and stems yellow.

Flax makes a wonderful nurse crop for Red Clover, Alsike, Alfalfa.

Linota. Also a Wilt Resistant type and according to tests is superior to Bison and Red Wing for late sowing.

Bison the most Wilt Resistant. A little later in maturity. Largest seed. Excellent oil producer.

Red Wing. About a week earlier than Bison. May be sown somewhat later. Also a heavy yielder. See page 41 for prices. F. O. B. Clarinda and Chicago.

CERESAN

Disinfects Small Grain
for less than 3c per bu.

Controls stinking smut of wheat, covered smut and stripe of barley and loose and covered smut of oats. Makes for better stands, larger yields and finer quality.

A dust treatment. Easy to apply. No water needed. Does not cause seed to clog in drill. Very effective.

Prepaid price 1 lb. enough for 32 bushels only 90c; 5 lbs. for \$4.00.

USE CERESAN TREATMENT ON GRAIN. SEE PAGE 19

BARLEY

SPARTAN

We Have State Certified Seed for Early Buyers

A two-row, smooth awned spring barley. Beards without barbs. One of the strongest strawed barleys grown. Bears large uniform kernels. A fine variety for pearling. Not acceptable as a malting variety. Its unusual strength of straw makes it an ideal kind to sow on rich land. Easy to harvest and because of its smooth awns or beards it is very satisfactory to harvest and thresh. Heavy yields are recorded. It has greater value than some which, although yielding well, are discounted on the market or whose weak straw causes trouble. Spartan Barley is a profitable variety.

Small lots, any variety, postpaid, 1 lb., 20c; 5 lbs., 75c.

HEAVY
PRODUCING
VARIETIES**

See page 41 for Clarinda and Chicago prices

VELVET

The KIND With SILKY BEARDS

Our Velvet Type Barley Is Cleaned, Graded Stock

Velvet is a smooth awned or barbless spring barley. The awns or beards give the grain some protection yet these beards have no barbs on them. They are as smooth as straw making the crop more pleasant to handle.

Velvet is a malting type barley that is in such big demand. It appears to withstand unfavorable conditions very well. It has a good stiff straw being close to Iogloss in that respect. Its quality and productiveness have made it one of the most popular varieties in the state of Iowa. It is now being grown over a wide area.

In many sections farmers are switching from oats to barley. These improved smooth awned kinds yield more and make more profitable grain crops. Barley has always been the heaviest producing grain in the northern states and this is materially above the average in production.

Barley makes a better nurse crop for grass and clover seedings because it does not shade the ground so heavily and matures earlier. Velvet is one of the most popular varieties.

A VERY POPULAR VARIETY

WISCONSIN No. 38

BARBLESS BARLEY

Our Wisconsin 38 Type Barley Is the Smooth Bearded Kind

This is claimed as an improvement over Velvet-type and has shown a slight edge over it in production. In one test Wisconsin No. 38 outyielded all others with a production of 50 bushels per acre. It is also a spring variety and has smooth beards or awns. It is a fine malting type barley. The straw is generally somewhat shorter than Velvet and a little later in maturing. In Central Iowa it should be ripe about July 15th.

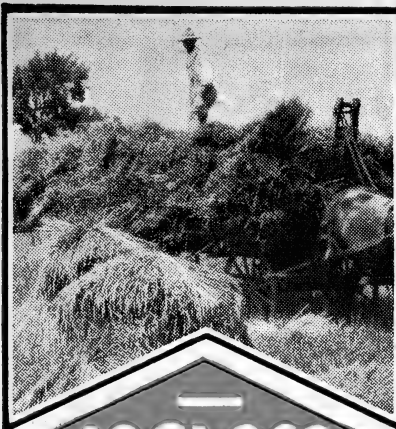

Wisconsin No. 38 shares the popularity of malting types with Velvet and Iogloss. In some eastern and northern states it is even more popular. The straw is not quite as strong but it yields well. In localities where both are equally well known it is about a toss up between the two.

A farmer can scarcely make a mistake in selecting any of the varieties listed on this page. They are all recognized as excellent kinds. We price our barley at close figures. Our guarantee assures you of a satisfactory shipment or your money back. See page 8.

Barley makes a wonderful feed for hogs. It is fattening. Builds nerves, muscle and sinew. Matures early. It is a fine nurse crop. Malting demand creates a good market. Requires only 2 bushels of seed per acre. Grow better barley by sowing better seed.

We advise treating barley with Ceresan. It is a good investment. See description on oat page 20.

See Page 41 for New LOW PRICES

I OGLOSS

A Very Fine Type Extra Heavy Yields

We are Sure You Will Like Our Iogloss Type Barley

A smooth awned, stiff strawed and high yielding strain of spring barley. It is a malting type. Ripens about the same time as the Velvet. In tests extending from 1930 to 1937 it showed a superiority over both Velvet and Wisconsin 38 in lodging strength. It outyielded all varieties in the test by a very substantial percentage. It produced 7 to 9 bushels per acre more on the average than other widely grown varieties. When you consider that this was the average of a seven-year test its significance is most important. No barbs, strong straw, big yield make Iogloss an exceptionally fine barley.

ODERBRUCKER

Our Oderbrucker Type Barley Is the Rough Bearded Kind.

Also known as Wisconsin 55 Type. A standard malting barley. This, in our opinion, is a heavy producer. Plumper kernels. Great disease resistance. Higher protein test. Better feed. A bearded variety that gives greater returns. We endeavor to secure the best of quality at our prevailing low prices. Recleaned seed gives you stock with small stuff removed. Plumper grains generally make somewhat stronger plants. All of our barley and other seed grains are shipped subject to your approval. If in your opinion you have not received an extra measure of value, write us for shipping instructions. See guarantee page 8.

Danese, W. Va.

Dear Friends:
I have found you an honest and reliable house. Your seeds are certainly good and reliable in every respect. I am well satisfied with your service.

Yours truly,
WATSON COLE.

BROMUS INERMUS OR BROME GRASS

DROUGHT RESISTANT

**Heavily Productive—Highly Palatable
Starts Early. Grows Late in the Fall
Canadian Certified and Canadian No. 1**

See Description Below

If you are needing a grass that will take lots of punishment and still produce a valuable crop, grow Brome Grass. If you want a grass that is palatable and greatly relished by all kinds of livestock, grow Brome Grass. If you want a grass that can be used for pasture or hay, Brome Grass fills the bill. For drought resistance and early and late growth it is hard to equal. We wish you could talk to farmers who are growing Brome Grass and hear their enthusiastic stories. Or better yet if you could see the crop growing and see the production it can make you would certainly want some of it. It isn't a new grass but its great value is just becoming more widely known. There are stands in Illinois that have stood over twenty years. It has been popular in the west for many years and has become widely grown in the eastern states. From Kansas and the Dakotas on east to the coast. From Michigan and Wisconsin on south into Kentucky. It is being grown as never before and each year the praises for it are better and louder.

Characteristics

Brome Grass is also known as Bromus Inermus, Smooth Brome, Awnless and Hungarian Brome Grass. It is a long lived perennial grass. Grows erect to a height of 3 feet or more depending upon soil fertility. The fibrous roots go deep sometimes 5 feet or more. Highly resistant against drought and cold. Remains green after Blue Grass has turned brown and dry. It is adapted to a wide range of soils. Does well on clay loam and sandy loam soils if not too low in fertility. Stands trampling and grazing very well. Fine to grow with alfalfa for hay and widely used with it and other clovers and grasses for pasture. While permanent it is not difficult to eradicate. If it becomes sod bound a thorough cultivation generally corrects that.

Getting a Stand

Brome Grass is sometimes a little slow in starting. Best results are obtained by preparing a good fine solid seed bed same as you would for alfalfa. May be sown either in spring or fall when moisture conditions are favorable to start it. The seeds are large and light and sometimes a little difficulty is had in feeding it through drill spouts. Mixing with sand or dirt or a peck or two of oats per acre helps. Keep it stirred and mixed in the box. An endgate seeder may be used. Some practice hand sowing. The seed should have a light covering but deep covering should be avoided. Wherever possible use a cultipacker or roller after seeding. Sow about 18 to 20 lbs. per acre alone. In mixture use 8 to 10 lbs. of Brome. Eight pounds each of Alfalfa and Brome is a good mixture. Remember it grows slowly the first year. What may appear a poor stand the first year is usually surprisingly good the second.

Canadian Certified and Canadian No. 1

The chief difference between these two grades is the inert matter which may be broken seeds or small pieces of straw. Both are very free of weed seeds. The Certified seed is slightly heavier. Both are recognized as high quality lots and very desirable seed. If you want the very finest buy Canadian Certified. Either shipment guaranteed to please you.

Price Canadian No. 1. \$19.00 per 100 lbs.; \$9.60 for 50 lbs.; \$4.90 for 25 lbs. Forty-five cents per hundred higher at Chicago.

Canadian Certified. \$1.00 per 100 lbs. higher. Available at Clarinda only. Small lots Postpaid: 1 lb. 50c; 5 lbs. \$2.00; 10 lbs. \$3.65.

ALFALFA AND BROME MIXTURE

A Fifty-Fifty Seeding of Alfalfa and Brome Grass

This is a great combination. Both crops are drought and cold resistant and very palatable. Brome reduces danger of bloat from alfalfa. Tests show Brome grown with alfalfa contained 21% more nitrogen than when grown alone. The combination yields heavily. A 13 year experiment in Canada showed the combination to yield $2\frac{1}{2}$ times as much as Brome alone. One of the finest of pasture combinations. We urge you to try it. On orders of this mixture we ship Alfalfa and Brome Grass seed to give you a 50-50 mixture by weight.

Farmer Reports on Brome Grass

Elmer Wagner of Ada, Minnesota, says, "It pastures better than Blue Grass. Has seen fields that stood severe pasture for 10 years. As a hay crop I have found it as valuable as alfalfa. Likes it mixed with sweet clover for pasture."

J. T. Dudgeon of Penick, Kentucky, reports he has been growing Brome Grass for more than 30 years. Cattle grazed in different grass prefer Brome to all others. He uses Alfalfa and Brome mixed with highly satisfactory results. All kinds of livestock eat Brome ravenously.

Achenbach Bros. of Washington, Kansas, say it is the only grass they have ever found to take the place of the old time prairie grass. Comes on early, stays on late in the fall and often eliminates weeds. When sown with Alfalfa reduces danger of bloat when pastured. Yields $1\frac{1}{2}$ to 4 tons of hay per acre.

Lack of space prevents giving many more reports but these are indicative of the great value farmers place on this crop.

Experiment Station Reports

Agricultural Experiment Stations now recognize its value and most states in the northern half of the nation have circulars or bulletins describing the crop and its value.

The Illinois experiment station considers it the most drought resistant grass in that state. Also very palatable and relished by cattle and horses. New York recommends it especially for pasture in mixture. Michigan finds it adapted, very drought resistant, highly palatable and especially suited for mixing with Alfalfa for pasture. Nebraska recognizes it as superior to all other cultivated grasses in that state. Iowa finds it of great value. Kansas finds it especially good in the northern part of the tame grass section with hay yields of 1 to 3 tons per acre. South Dakota says it is one of the outstanding grasses in the eastern section.

A Remarkable Permanent Grass of Great Value

Here is a crop that can really "go to town." It's a remarkable crop in many ways and in a class by itself. It grows on extremely wet land, stands a lot of overflow yet withstands drought amazingly well. You should have seen it at the Iowa Experiment Station on upland one dry year. It stood out like an oasis on a desert. Farmers who came to look at the experimental field would spot it as soon as they entered the field. The Reed Canary Grass yielded 3 tons per acre when it was so dry Sudan made only half a crop. Produces 2 to 3 cuttings a year. No wonder farmers were enthused about it. You would be, too, if you had such a crop on your farm.

Grows 5 to 6 ft. High

You almost have to see it grow to appreciate the value of this crop. It is a very leafy grass. And how it can yield. Up to 3 to 5 tons of cured hay per acre from two cuttings. The second crop is even leafier than the first although not as tall. You ought to hear farmers bragging about its feeding quality. We do not consider it equal to alfalfa in feeding value, but some growers claim it is. They report increased milk flow on Reed Canary Grass. Tests show 9.43% protein in first cutting and 11.76% in second cutting. They like it for pasture. They like it for hay and many make good money out of the seed crop.

Grows from Early Spring Until Late Fall

Lots of times you can hardly wait for spring to come and give you pasture. Reed Canary grass starts on the job real early in the spring and keeps at it until late in

the fall. It is well adapted to pasturing after a good sod has been formed. And what a sod it makes especially on wet land.

Reed Canary grown on land so wet cattle would bog down in it, made a sod so strong it would support a team and wagon.

It is a perennial grass with a long life. In Minnesota a field was used for hay crops for 15 years and then 18 years as a pasture. A government report from the Pacific Coast showed it pastured four dairy cows per acre for seven months of the year.

Widely Adapted

You may ask, "Can I grow Reed Canary Grass?" This grass is adapted to all states from the Atlantic to the Pacific in the entire northern half of the country and as far south as into eastern Tennessee. If you have any low wet land there isn't a better grass you can grow. It will change acres that are worthless into valuable acres—real money makers. But it isn't limited to wet land as the Iowa Experiment Station has shown. It has been a real money maker. Use it for hay, pasture and seed production.

You can get all three in one year. First a seed crop. See below. Immediately after a hay crop and then pasture or hay. Sometimes a third cutting. The water table can be practically at the surface yet Reed Canary grass flourishes and it stands a lot of overflow. Again we would repeat that it also shows marked drought resistance. At the Urbana, Illinois Experiment Station for two years it averaged 5 tons of air dry hay per acre a year.

Postpaid: 1 lb., 60c; 5 lbs., \$2.50; 10 lbs., \$4.50.

How to Grow Reed Canary

It should have a relatively cool season for starting. Both fall and early spring seeding are widely practiced. Use 6 to 8 pounds per acre. Sometimes it is sown late in the fall so the seed will not germinate until the following spring. Be sure to prepare a good seed bed. Make it fine, smooth and get it well packed. Fall plowing is desirable although spring plowing can be worked into a good seed bed. Late fall seeding may be necessary on some poorly drained soils.

Sometimes the seed is sown during thawing weather in the spring. We suggest a light covering and packing it with a roller. About $\frac{1}{4}$ to $\frac{1}{2}$ inch is plenty of covering. If weeds get bothersome clip them back. Seedlings are as hardy as those of Timothy and will stand considerable freezing. The growth is not fast the first year. Second and following years give full and rapid growth.

Profitable Crop

Gordon Aebischer of Chilton, Wisconsin, says, "Hay yields run 1 to 3 tons per acre per cutting." Ordinarily 4 tons per acre in two cuttings. Seed yields range up to 450 pounds per acre. First seeding was in 1931. Have added more since and never had to reseed. Some of the seedling growing it is sub-ject to overflow for as long as six months at a time.

Report from South

Frank Litchke near Enid, Oklahoma, sowed Reed Canary Grass in the fall four years ago. It has been growing continually since. He grazed 20 head of Hereford cattle on 4 acres for 60 days continually and there was still much left. He said it also makes good hay and checks soil erosion effectively in that wheat coun-try.

Money in Seed Crop

Reed Canary Grass will produce 100 to 400 pounds or more of seed per acre. Even if the seed should get as low as 10c per pound that produces a nice extra cash income per acre. You don't have to sacrifice a hay crop for it. Good hay is obtained if cut immediately after seed harvest. It is a profitable crop as hay or pasture even if no seed is saved.

High Points in Canary Grass

Grows on very wet land. Withstands drought. Value of seed crop may run as high as \$90.00 per acre basis 20c price. Gives two to three cuttings per acre. Yields up to 4 and 5 tons per acre. Makes fine pasture. A seeding lasts many years. Comes on early in the spring and grows until late in the fall. Adapted to a wide area. It is a money making crop.

GRASSES

of SPECIAL MERIT

CRESTED WHEAT GRASS

EXTRAORDINARY DROUGHT RESISTER

If you want the most highly drought resistant grass, sow Crested Wheat grass. In sections with as little as 10 to 18 inches of annual rainfall and high evaporation it has made a very satisfactory growth. Yields of 3 tons per acre are recorded in more humid sections and seed production up to 900 pounds per acre.

It is a deep rooted long lived perennial grass. A fine stemmed leafy grass. Roots go down as much as 8 feet and are very dense. It does not spread by underground root stalks, therefore is easier to eradicate than some grasses. On the other hand it does not become sod bound like some dryland grasses or to deteriorate like others.

Comes on Early—Grows Late in Fall

Starts growing unusually early as it likes cool weather. No amount of freezing or subzero temperatures seem to hurt it. Begins growing in the spring from one to two weeks before Brome Grass which is also an early starter.

Likewise it continues growing later in the fall. During hot weather it becomes dormant but responds quickly to a little fall moisture. It has not been definitely determined how far south it will grow. Has been grown in Colorado and Illinois and is worthy of trials further south and east.

It is under extremely dry conditions that it shows its most striking superiority over other grasses.

45c per
100
higher
at
Chicago

\$20.00
100 LBS

Other Valuable Characteristics

It stands close grazing and trampling remarkably well. In one test it was grazed continuously for five years from early spring until late fall without apparent injury. It has proven a fine weed eliminator. A field that was heavily infested with mustard and Russian Thistle was almost totally freed of these weeds after Crested Wheat was established, yet the grass is easily eradicated.

It is relished by all classes of livestock and especially horses. Cures to greenish stems and abundant leafage as hay which is very palatable and highly nutritious. No grass is more winter hardy.

Seeding Suggestions

Prepare a fine well settled seed bed. Rolling or packing are desirable. Use about 10 pounds per acre and sow with grain or grass seed drill. Relatively early spring seedings when weather is cool and moisture conditions most favorable for quick germination are best. Cover seed about half an inch. In very dry sections cover a little deeper. Rolling is a good practice.

Postpaid: 1 lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00.

RED TOP GROWS MOST ANYWHERE

Seldom Fails to Make a Stand

No other grass will grow under as great a variety of conditions as Red Top. It will grow on soils so poor in lime that most other grasses fail. Next to Reed Canary it is the best wet land grass. It is also strongly drought resistant. Fine to sow on banks to prevent erosion. If you have trouble in getting a stand of grass, sow Red Top—it seldom fails.

It is second only to blue grass as a pasture plant especially in the northeastern part of our country and it grows when blue grass often fails. On sour land we know of no grass to equal it. Red Top and Blue Grass is good for both pasture and lawn purposes. Likewise it is good in hay mixtures and it is widely used in that way.

45c per 100
higher at Chicago

Adapted to the Entire Country

Red Top thrives from Canada to the Gulf and from New York to California. It is a vigorous grower and quickly forms a turf. Very valuable for use in soil erosion work to stop washing. When used with Timothy for hay it generally increases the yield. Matures at about the same time.

It is a perennial grass. One seeding lasts several years. The seed is small. Around 10 pounds per acre are sown when not mixed. A mixture of three or four pounds per acre is fine in pastures and meadows. May be top sown on old stands to increase production. Early spring or late summer is the best time to sow.

The seed is very small therefore the seed bed should be fine and solid. Take care not to cover it too deeply. Red Top is cheap this year compared with Blue Grass, Orchard, Brome, etc. If you wish to get a grass that is economical to sow and almost sure to get a stand even on poor land be sure to sow some Red Top this year. Use it with Timothy for hay and with Blue Grass for pasture. It will help you get more feed per acre. Check soil erosion with Red Top. It is a crop that can fill an important place on your farm.

Small Lots Postpaid, 1 lb., 40c; 5 lbs., \$1.75; 10 lbs., \$3.00.

\$20.00
100 LBS

Bermuda Grass

This grass is very widely used in the south for lawns and pastures. Stands the extreme heat of southern locations better than any other on soils of a clay or loam character. Grows on sandy soils too but is less productive on them. The seed is quite small. Five pounds sows an acre, although for lawn seeding a heavier rate is recommended. It is not very winterhardy and probably will winter kill north of Kansas and similar locations.

We have a very nice quality of seed for you and we are pricing it on a close margin.

Prices Bermuda Grass

Small lots, postpaid, 1 lb., \$1.25; 5 lbs., \$5.00; 10 lbs., \$8.50. Not prepaid, 10 lbs., \$7.50; 25 lbs., \$18.00; 50 lbs., \$34.50.

45c per 100 higher at Chicago.

\$7.50
10 LBS

Western Wheat Grass

A native American Grass. It is very resistant against extreme cold and drought although will not stand it to the extent that Crested Wheat Grass does. It produces wonderfully well, however, under average drought conditions. Grows remarkably well on Alkali soils. Not suitable on land subject to much overflow. Grows 2 to 4 ft. high and yields are around 2 to 4 tons per acre. Matures a little later. The seeds are larger than Crested Wheat and it requires 15 to 20 lbs. to sow an acre.

May be sown alone or with small grain as a companion crop. This crop has certainly come up fast in popular favor. Seed supply very short.

Postpaid, 1 lb., 60c; 5 lbs., \$2.75; 10 lbs., \$5.50. See page 41 for prices on large lots, not prepaid.

25 LBS.

KENTUCKY BLUE GRASS

A Most Valuable Pasture

This long lived perennial grass is well known as an outstanding pasture and lawn grass in a great portion of our country. It is

very nutritious and highly palatable. Grows from early spring until late fall. Makes a fine sod and stands close grazing. Stands a lot of drought, coming out after long dry spells in an astonishing manner. It is adapted to a wide territory and to different soil types. Will stand some wet conditions and some acid but not as much as Red Top. Because of its fine quality it is widely desired for pasture.

Make Blue Grass More Profitable

Blue Grass pasture should be good money makers yet on many farms they are not. That is not the fault of the grass but more often due to neglect. When bare spots show up little attention is given them. It is hoped they may be reseeded by mother nature. Sometimes they are but it is slow. Meanwhile you lose what bare spots might be producing and weeds creep in. Save money by reseeding such places.

Other ways in which you can improve Blue Grass pasture is to fertilize them. Grasses use plant food same as grain. Sow clovers in Blue Grass to give them more nitrogen. Sweet clover is excellent for that. Clip weeds before they go to seed. Disc it occasionally and harrow early in the spring. Do not over-graze it in dry season.

Good pastures pay good profit. You lose money on poor ones. Use Berry's Extra Fancy Quality seed to build money-making acres.

Seeding Suggestions

Buy good seed but don't pay too much for it. Our prices should save you money. In spite of short crops our prices are low. Prepare a fine, well settled seed bed. Sow in the spring or fall. Spring seedings may be made with a light crop of grain as a companion crop. Often it is best to cut grain for hay so as to give the grass a better chance. Some clover also may be used with a spring seeding. Timothy is sometimes used both with fall or winter seedings. Blue Grass straight is sown 15 to 20 lbs. per acre. In mixtures, reduce to suit your ideas. For thickening thin spots 8 to 10 lbs. are generally sufficient. Whenever possible roll after seeding. See page 40 for Chicago prices.

Blue Grass for Lawns

For lawns a very thick stand is desirable and a pound to every 5 or 600 square feet is suggested. An application of commercial fertilizer and a little lime will make a more luxurious growth, give it better color and help keep out weeds such as dandelions.

Small Lots, Postpaid: 1 lb., 60c; 5 lbs., \$2.25; 10 lbs., \$4.25.

\$30⁰⁰
100 LBS.

ORCHARD GRASS

Adapted to a Wide Region—Fine for Shady Places

Orchard Grass is grown in nearly every state in the Union. It is most common north of Alabama and Georgia and eastward from and in Iowa and Missouri. Also grown south and west of these localities. It has soil requirements similar to Timothy and Blue Grass but can be grown in a wider range of climates. It is grown alone for hay and pasture but is perhaps most generally used mixed with other grasses and clovers. A mixture of Orchard Grass with clovers makes fine hay especially for fattening cattle for market. We consider it very good with sweet clover because it grows in the shade of taller plants better than any other grass we sell. Orchard Grass makes best hay if cut when just in bloom. Makes a good aftermath for pasture.

Starts Growing Early and Grows Late in Season

The early starting growth of Orchard Grass in the spring makes it a valuable addition to pasture seedings. It grows luxuriously then and again in late fall it adds to the productivity of pastures. Add it to Brome, Sweet Clover, Blue Grass, Timothy and other grasses for pasture. Orchard Grass helps make a well balanced pasture. There is good money in seed production at this time.

Fifteen to twenty pounds per acre are generally sown when a stand of straight Orchard Grass is desired. The percentage in mixtures is one of personal preference. Sow spring or fall and follow the suggestions given above for Blue Grass.

Sow good seed. Let us send you a sample of our stock. See the liberal savings. Seed supplies are very short this year. Small lots, 1 lb., 65c; 5 lbs., \$3.00; 10 lbs., \$5.00. See page 40 for Prices at Clarinda and Chicago.

\$40⁰⁰
100 LBS.

English Blue Grass

A Grass That Is Widely Adapted

A crop used for hay and pasture. Yields around 2 tons of hay per acre on average land. Grows 15 to 30 inches high. Exceptionally valuable for pastures because it comes on very early in the spring and keeps on the job until late in the fall. Grows well from Kansas and Nebraska east to the Atlantic Coast and from Canada to the Gulf of Mexico. Not critical as to soils. Few grasses can equal it on wet land. Lives longer than Timothy. Seed cost is low this year. Sow about 20 lbs. per acre. It is a profitable crop either alone or in mixtures. It adds variety to pastures and increases their value. Grow some of it this year.

See page 40 for Clarinda and Chicago prices. Small lots, postpaid, 1 lb., 60c; 5 lbs., \$2.25; 10 lbs. \$4.25.

25 LBS.

Lot "TIM" Red Top & Timothy

A Popular Low Cost Seeding

Our trade uses a lot of this for top seeding in pastures and meadows, and new stands. Many sow it alone, others add Alsike and other clovers. Adapted to a wide range of soils and climate. Especially good for wet land. Ten pounds an acre makes a full seeding. A.A.A. payments 40c an acre where adapted.

Lot "Tim" is Red Top containing some Timothy seed. We secured this seed at low cost and are selling it at figures that make an appealing bargain. The low acre seeding cost and the ease of obtaining stands make this a very popular value. Shipment guaranteed to please.

See price list for other quantity prices. Small lots, postpaid, 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$1.95.

\$3⁶⁰
25 LBS.

GROW QUICK PASTURE MIXTURE

\$3.30
BU.
25 LBS

A Popular Mixture at Reasonable Cost

Our Grow-Quick Mixture is a big seller. The cost of seeding is low and it gives quick production. You can begin pasturing it lightly within relatively few weeks after sowing.

This spring may find many farmers short on pasture. This is a seeding that may help you solve your problem. Good quality seed is used and we mix it as thoroughly as we can so as to give you a fine value at low cost. Only around \$2.50 per acre for this rich mixture.

Contains Approximately 50% Clovers

The Rye Grass in this combination is a fast grower and affords the earliest feed. Meanwhile the Sweet Clover, Korean and Timothy are developing to increase its production and value. It keeps on growing until after frost. The Korean will reseed for the next year unless the season is too short. The Sweet Clover and Timothy of course live over winter and can be used the next year for plowing under, for continued pasture or cut for hay.

Sow 15 to 20 lbs. per acre. Cover seed lightly and roll if possible. A firm seed bed and a light covering are always helpful in getting stands. Sow about the time you sow small grain. Do not use a nurse crop.

Contains
**Korean Clover,
Sweet Clover,
Domestic Rye Grass
and Timothy.**
Approximately 50%
Clovers, Balance Grasses
Chicago Price \$3.45

PERMANENT PASTURE and MEADOW MIXTURE

Thrifty Mixture

A combination of Grasses and Clovers that give our customers very satisfactory results at low seeding cost. A seeding that lasts several years. Produces a fine quality and variety of feed. Gives a longer pasture season. Some of the crops in it start early. Others grow through hot dry weather and late into the fall. Some stand wet conditions. Others prefer it dry. Under almost any conditions it can give you a stand that is productive.

The grasses in the mixture are Kentucky Blue Grass, Red Top, Rye Grass and Timothy. These are combined with Korean Clover and Sweet Clover. The Rye Grass grows fast and serves as a nurse crop although a light seeding of grain can be used if desired. Red Top is also quite a fast grower and these two grasses provide early feed. The Korean and Sweet Clover are generally ready to pasture by mid summer and on till late fall. The Timothy and Blue Grass also add to the fall pasture.

The grasses are all perennials excepting the Rye Grass. The Korean Clover is an annual but generally reseeds itself no matter how closely it is pastured unless the season is too short. The sweet clover is a two-year crop and it too, nearly always reseeds when in pastures. Thus you have legumes to build up your land, increase the growth of the grasses and improve the feeding value of the pasture. Sow 15 to 20 lbs. per acre.

We guarantee the quality of the seed to show up to your entire satisfaction and assure you of good value. Your money back if the seeds or the savings are not fully satisfactory.

\$7.10
50 LBS.

Master Mixture

A combination of grasses only. Contains no clovers. Many of our customers want such a mixture. Some have clovers of their own to add. Some don't care for clovers. Others want to add one kind of clover and some another. So here it is. A straight grass mixture that we are sure you will like and priced to please you.

Our Master Mixture contains Kentucky Blue Grass, Brome Grass, Timothy, Reed Canary, Red Top and Crested Wheat Grass. These give a variety of grasses and that is what livestock likes. There are other advantages. All of them are perennials. Some start earlier in the spring. Brome Grass takes the heat and drouth exceptionally well. Meadow Fescue starts early and will grow until late in fall. It is widely adapted. Red Top grows most anywhere. Reed Canary stands wet and drouth. Timothy fills in well for several years as the other grasses are getting well established.

Poor thin pastures don't pay their way. They lose money. They become infested with weeds. They start to wash and erode. Thicken up old stands by reseeding. Disc the land, harrow. Sow one of our mixtures and roll or pack the ground. Make new seedings if old ones are too far gone. See page 25 under Blue Grass for seeding suggestions. Use 10 to 12 lbs. of mixture for top seeding or 18 to 20 pounds for a new seeding. Make those pasture acres profitable. More stock per acre for a longer period of time getting a greater variety of feed.

We use good seed and mix it as thoroughly as we can according to a definite formula. The shipment is guaranteed to please you. If you do not consider it a great value in every way at our low price you may return it for refund plus freight.

See Page 41 for Clarinda and Chicago Prices

**It pays to inoculate
clover seeds. See p. 41.**

BERRY'S LAWN MIXTURES

GENERAL CHOICE MIXTURE

This makes a fine smooth lawn in the northern half of the United States. Contains chiefly Blue Grass, Red Top, White Dutch Clover and Rye Grasses. The quicker growing grasses provide a nice green stand while the slower kinds are coming on. It is our most popular mixture, because it gives such wonderful satisfaction. Postpaid price: 1 lb., 45c; 3 lbs., \$1.25; 5 lbs., \$1.90; 10 lbs., \$3.50. A pound sows about 500 square feet.

TERRACE MIXTURE

This mixture contains deep rooted grasses. They hold the soil firmly and resist drought. Select this for terraces and sloping places. Soil on terraces is often filled in dirt of low fertility. It will pay you to fertilize your ground well. You cannot have a nice lawn on poor soil. Postpaid price: 1 lb., 65c; 3 lbs., \$1.75; 5 lbs., \$2.50; 10 lbs., \$4.50. All seed is thoroughly cleaned and tested.

SHADY-SPOT MIXTURE

This contains grasses naturally adapted to growing in shade, such as Poa Trivialis. Fine for grounds shaded by trees or buildings. In heavy shade a light application of lime in addition to fertilizer will improve results. This is a dandy mixture. Postpaid price: 1 lb., 50c; 3 lbs., \$1.35; 5 lbs., \$2.00; 10 lbs., \$3.75.

WHITE DUTCH LAWN CLOVER

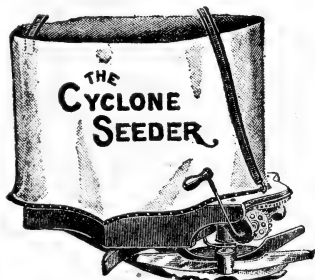

The small white clover so popular for lawns. This may be mixed with any lawn grass seed you have on hand or sown on an old lawn in the early spring. Very drought resistant. Helps soil fertility. Seed is very small. A pound sows 1,000 or more square feet, depending on how heavy percentage of clover is desired. Postpaid price: 1 lb., \$1.10; 3 lbs., \$3.00; 5 lbs., \$4.40; 10 lbs., \$8.50. See page 40 for larger quantities.

KENTUCKY BLUE GRASS

The most satisfactory all purpose lawn grass for the U. S. to the coast and from Canada south to Tennessee. Stands drought. Makes an excellent turf. Grows from early spring until late fall. Use Berry's quality Blue Grass. Postpaid price: 1 lb., 60c; 3 lbs., \$1.50; 5 lbs., \$2.25; 10 lbs., \$4.25.

TESTED RELIABLE SEEDERS, CLEANERS AND SEED TREATMENTS

CYCLONE SEEDER

This handy seeder can save you many dollars a year. It saves on seed cost because it distributes seed nicely and therefore less seed per acre is required. It also saves on labor costs as with a Cyclone Seeder you can sow many acres per hour.

Sows Clover, Timothy, Alfalfa, Lespedeza, Sudan, Oats, Wheat and any other seed that is sown broadcast. Can be regulated for any amount per acre.

Its well known double feed insures a uniform flow of seed. Sloped feed board keeps hopper properly filled. Feed adjustment is automatic. Distributing wheel scatters seed evenly. Throws equal amounts to equal distance from operator. Full directions for setting furnished.

Postpaid price \$2.85

HORN SEEDER

Sows all smooth seeds like Alfalfa, Clover, Timothy, Lespedeza, etc. Patented Brass Seed Gauge regulates amount per acre to be sown and it is reliable. Tube comes in sections or joints that fit tightly. Easily operated.

Postpaid price
\$1.00

USE SEED TREATMENTS FOR BETTER YIELDS

Treating seeds like Corn, Oats, Barley and Wheat pays. That is especially true when unfavorable weather conditions increase the danger of disease damage. Seed treatment brings larger yields and often a much better quality in the crop produced. The cost is small. Corn about 15c per bu. or less than 3c per acre. Small grain treatment is also about 2½c per bu. See catalog pages referred to below for description and prices.

For Corn
Merko—Page 13

For Small Grain
Ceresan—Page 20

SEED CLEANER Clipper Mills

Just before going to press we were advised that the manufacture of farm size cleaners was ordered discontinued for the duration. Sorry but it can't be helped.

Inoculation Pays Big Returns

Legume crops such as all Alfalfa, Clovers, Peas, Beans and Vetches are peculiar crops. They can't make their full growth unless they have certain bacteria working in their roots. Those bacteria have the power to change the nitrogen the plant takes from the air into Nitrogen the plants can feed upon. That is why these plants are soil builders. However, if these bacteria are not in the roots then these plants use what Nitrogen they can find in the soil. After that is exhausted the plant may turn yellow and often die. You can assure plenty of the right kind of bacteria for these plants if you will put Berry's Nodule Germ on the seed before you sow it.

See page 41 for further information and prices. The cost is low. It is easy to apply.

KOREAN CLOVER

\$3.50
BU.
25 LBS.

See below for other prices

Grows on the poorest land

Wonderful pasture—Excellent Soil Builder.

A VERY VALUABLE CROP

Markets on Korean Lespedeza seed are very strong as there is a tremendous demand for it. Will be used in place of Sweet Clover in many sections.

Korean is a Nitrogen gatherer and will improve the poorest land where other clovers cannot even get started. It will resist more heat and drouth than any other clover. It will stop soil washing and will grow in ditches and gullies.

CHARACTERISTICS

Korean is an annual. It grows only one year from a seeding. It reseeds itself very readily and matures seed even after plants have been killed by frost. Thus it is proving itself adapted farther north than was at first thought possible. It is steadily and surely working its way north into Iowa, Illinois, Ohio, Indiana. If it does not reseed itself it will not come up the next year. When it does reseed the stands get heavier from year to year.

It is quite a common practice to put oats on land where Lespedeza has reseeded itself. After the oats are off, there is the Lespedeza to give an abundance of pasture until frost. A very valuable crop. Superior to Alfalfa and other clovers in acid or thin soils.

PASTURE VALUE

Korean shows its greatest worth in pasture. It does not afford much feed early but produces its best during the latter part of June and in July and August up to killing frosts. Therefore Korean gives pasture when most other grasses are dormant because of heat or drouth. No matter how close it may be pastured the crop will reseed if heavy frosts do not come too early. We therefore recommend Korean as a mixture for all pastures, new and old.

VALUE AS A HAY CROP

Korean does not grow very tall. To get a good hay crop the stand should be heavy. While it is not tall the stems are very leafy and a surprisingly large yield can be secured from a stand that seems fairly short. One of our customers reports a yield of three tons per acre and a seed crop afterwards. This was in central Missouri.

SEEDING SUGGESTIONS

The firmer your seed bed the better your success. Just broadcast seeding during winter or early spring. If sown with spring grain just scatter on top and then roll the land. Be sure to avoid covering it much.

Korean Prices

Regular Grade, \$3.50 bu., Clarinda, \$3.65 Chicago.

25 lb. Bu. Nice quality re-cleaned seed of high germination and good purity. Sow 12 lbs. per acre.

Special Grade, \$4.00 bu., Clarinda, 25 lbs.

Selected especially to comply with provisions of Iowa Seed law. Sow 12 lbs. per acre.

Hulled Korean \$12.60 for 60 pounds—30 lbs., \$6.40—15 lbs., \$3.30.

Has hulls removed. Generally germinates quicker. Best for late seeding. Sow 10 lbs. per acre.

In buying Korean don't be misled by too low prices. Much of the seed contains excessive weed seed and is no bargain. Considering quality our prices are low. Quality brings real satisfaction.

Ask for our Free Circular on Lespedeza.

INOCULATE YOUR SEED

Inoculation helps get bigger and better stands. Costs only 60c for a package that will inoculate up to 100 pounds of seed. Order a 60c size for every 100 pounds or any part of 100 pounds of seed.

Early Giant KOREAN

Matures Earlier—Grows Taller

**Adapted Further North
Also Known as No. 19604**

\$6.00
BU.
25 LBS.

You who want to grow Lespedeza and have found you are a little too far north for regular Korean should by all means order this Early Giant. It matures quite a bit earlier and may be grown 100 to 150 miles north of the regular Korean. Because of its earliness it is more certain to produce seed and thus reseed itself or provide a cash seed crop. Sow it this spring. Harvest a seed crop this fall. Seed yields of 1000 pounds per acre reported. Get a big cash income after your small grain crop.

Grows Taller

Growth up to 2 feet reported in dry season of 1936. Stands drought but responds well to moisture conditions. Compare growth of 18 to 24 inches with regular Korean. Early Giant is generally about twice as tall. Like regular it grows on very thin land without lime. Makes better hay. Valuable as a pasture. Has a very leafy growth and is high in food value. Adds nitrogen to your land.

Grow This Adapted Korean

This is the Korean you want if you live under conditions from southern Iowa to north central Iowa. There is a big need for this in states like Nebraska, Illinois, Indiana, Ohio, Pennsylvania and others where regular Korean does not do well. Don't use regular Korean where it is not adapted, but sow this Early Giant which is also known as No. 19604. Get it started in your neighborhood. Sell your first seed crop locally at a premium. Make those thin acres produce good profits. Make sure of your seed supply by ordering at once. Figure 10 to 12 lbs. per acre.

Small lots, postpaid: 1 lb., 45c; 5 lbs., \$2.00; 10 lbs., \$3.50

SERICEA LESPEDEZA

A perennial Lespedeza. Comes up from roots in the spring. Has wintered as far north as New York. Grows on very sour soil without lime. Grows taller and coarser than Korean. Very leafy. Highly drought resistant. High feeding value. A great soil builder. Sow about 6 to 8 pounds per acre, about April 15th in latitude of southern Iowa. Wants a solid seed bed. Cover seed lightly.

Seed supply is still limited. All prices are for prompt orders. See page 40.

Small lots, postpaid: 1 lb., 60c; 5 lbs., \$2.50; 10 lbs., \$4.50

Dear Sirs: I have used your seeds for fifteen years and have found them the best for the money. The Berry Seed Co. has saved farmers thousands of dollars by selling good seeds at popular prices. They are reliable.

Yours, M. A. McNEAL

SEE SAMPLE ENCLOSED

Look at this great value. See the quality of this seed which is the heaviest yielder of all our mixtures. Fifty percent of clovers which are Red, Alsike, Sweet and Alfalfa balance Timothy. Rich in hardy, heavy yielding clovers yet low in seeding costs. You will have approximately 45 to 50 clover seeds per square foot when you sow this at 11 pounds per acre and the Timothy besides. That makes a cost of less than \$1.85 per acre. You can sow less seed, bring the cost still lower and get good results.

A Seeding That Lasts Several Years

Such a combination of clovers and grasses makes extremely heavy yields of hay. Our customers report highly satisfactory results. Big crops, Fine quality and Big savings in cost. Many use it as a pasture. They stock it heavily and get feed of excellent value. The alfalfa seed in the mixture helps to establish the crop on your land. The sweet clover opens up the soil and adds much nitrogen. The Red and Alsike fill the lower growth and the Timothy supports them and adds to the weight and growth of all. It is a great seeding and it is no wonder our customers are enthusiastic about it.

Quality Guaranteed to Please

The enclosed sample speaks for itself. Note the heavy clover content. This seed is all hardy domestic seed that has been re-cleaned. Note the letters in the opposite column. Results are what count. Satisfied customers can tell you of the great value of this seeding better than we can. Order with complete assurance of a satisfactory shipment. Your money back if you do not consider it a great value on which you have made a big saving. See our guarantee on page 8.

Start This Profit Maker

You, too, can become enthused over its wonderful production and high feeding value. See how it checks soil erosion and enriches your land. That dense heavy mat of clovers is a joy to behold. We sell thousands of bushels of Marvelous Mixture every year and with present low prices on such a combination of all home grown seed its sales should smash all previous records. We will protect prices until seed is sold or market advances make duplication impossible. Get the best bargain now. Sow around 10 to 12 lbs. per acre.

f.o.b. Chicago

A Few Who Speak for Thousands

It is the experience of our customers that gives our Marvelous Mixture its strongest endorsement. It is the heaviest producer we have ever developed. High in feeding value. Rich in soil building elements. Suitable for hay and pasture. Low in seeding costs. It makes an ideal combination for thousands of farmers.

Saves 50% at Berry's

Stratford, Wisc.

Dear Sirs:

I was more than pleased with the seeds I bought from the Berry Seed Co. Never had a finer stand of hay. Sowed Marvelous Mixture this spring, and the seedling looks very good. I feel I saved about half by buying from this Co.

Yours truly, THEO ROGGENBAUER.

Yield and Quality Fine

Catawba, W. Va.

Dear Sirs:

I have been using your Marvelous Mixture of grass seed for more than eight years with satisfaction. The quality and yield has never disappointed me, and can heartily recommend to others desiring good seed.

Yours truly, WILLIE L. ROBE.

Good Stands—Big Yields

Hillsdale, Wis.

Gentlemen:

We have been using Marvelous Mixture grass seed on our farm near Blue River, Wis., for a number of years and have been well pleased with the results. Have had the best stand and best yield of any seed sown for several years.

Yours truly, G. L. POUND.

Splendid Hay—Lots of It

Martinsville, Ind.

Berry Seed Co.

Dear Sirs:

I find your Marvelous Mixture makes splendid hay and I got 21 loads off of 9 acres first cutting and 11 loads of fine Alfalfa this year in second cutting. In 1928 I bought one bushel of Kansas Grown World Brand Alfalfa, and it is still fine field of hay and thick as ever, so I have been using your seed ever since.

(Signed) W. L. COLEMAN.

Marvelous Satisfies

Kent, Ohio.

Dear Sirs:

I had good results with your Marvelous Mixture, very heavy crop and good quality. Your Marvelous Mixture is my choice. There is no guesswork about this seed. I have recommended it to a good many friends and neighbors.

Yours truly, J. B. SMITH.

GENUINE HARDY CORN BELT STOCK

SEE
PAGE 34

Here you have one of our biggest selling lots of Alfalfa seed. Serviceable seed priced extremely low. We believe this to be absolutely the lowest price at which you can buy seed of this character. It has purity and germination tests that we have found adequate to produce good heavy stands. And our customers have found it so. The saying "thick as hair on a dog's back" indicates the character of reports we have from many customers. People write us "we want some of your Honest John because we saw what it did for our neighbors. They had better stands than we did from much higher priced seed."

This Honest John is the same in hardiness as any of our Corn-Belt stock. It should yield as well and last as long. The appearance of the seed, however, is not as nice as the higher priced lots. The color is not as good nor the berries as large. If you do not object to a lack of uniformity so long as it can produce satisfactory results, then the seed should please you. It is a seeding that pleases thousands. Sow 15 lbs. per acre. There are more seeds per pound than in larger berried stock.

TWO OUTSTANDING ALFALFA VALUES. BUY NOW!

**GENUINE
NORTHERN
GROWN**

**GRIMM
Lot NORTH**

Approximately 99% Crop Purity

FROM THE "ORIGINAL" GRIMM FIELD STATE~SUPER HARDY STOCK

The seed in Lot North comes from states where severe winters kill non-hardy plants and leave only the hardest to survive and bear seeds. States like Minnesota, Montana and Nebraska. Contains no southern seed. Seed of this character is always in big demand and sells at a premium over other less hardy origins. Our present price is figured extremely low. A bargain in extra hardy stock.

Wherever conditions cause much trouble with winter killing, Grimm should be used. Here is a lot of nice quality seed that is priced to make it an extraordinary value. We secured this seed at a low figure. It is priced so you can secure a nice saving by acting promptly. Don't wait.

Lot North has the high quality characteristics. Good color. Approximately 99% pure including sometimes a small percent of crop seed like Red or Sweet Clover. Good germination. A vigorous growing type. We'll gladly send you a sample. Compare it with the best grades. Consider the hardy character of this seed. Your saving should run around \$2.00 to \$3.00 per bu.

This is not our lowest priced seed. Other lots are described on pages 31 and 34 to 37. They are all fine values but this is such an outstanding bargain that we give it our special recommendation to all who want Genuine Northern Grown seed and do not object to a small percent of crop seed. See page 41 for Inoculation.

GENUINE CORN BELT

BERRY'S ^{Finest Grade} GRIMM ALFALFA

Our Finest Corn-Belt Grimm

We sell different grades and origins of alfalfa as described on pages 30 and 34 to 37. The greatest possible measure of value is packed into each lot. The Grimm is gaining in popularity among farmers everywhere because of its finer character of hay and extra winter hardness.

Our World Brand Corn-Belt Grimm has for years been one of our biggest selling lots. This present low price is made possible through early purchases and cannot be duplicated at this writing to sell for anywhere near so low a figure. It is a real bargain in high quality seed.

Supplies Short—Buy Early

Alfalfa seed is short this year. We have never seen so wild a scramble on the part of seed houses to accumulate supplies. While prices may not advance a great deal it is going to be a question of getting the seed and we most strongly advise every customer

to order at once. We have tried to figure our prices below ceilings so as to give you extra value but to get your seed—buy now. This seed contains no southern stock but is all of hardy origin and supplies of such seed are definitely limited.

\$28⁵⁰
60 LBS. BU.

World Brand Quality

There is a sample of World Brand Dak. No. 12 Alfalfa enclosed. That is indicative of our World Brand quality in other lines of seed as well. Note the smooth uniform character, the nice bold berries, the high purity and color. Old customers know World Brand represents our finest and best. For years it has satisfied our most critical customers. To you who demand the best we say, buy World Brand. Why pay more for the best than Berry's Direct-to-you prices? Save money. Buy now. Quality and Savings guaranteed satisfactory.

For best success with alfalfa—Inoculate your seed. The cost is low. Returns are large. See page 41.

DAKOTA No. 12 ALFALFA WORLD BRAND QUALITY

See sample enclosed of this alfalfa that is so great a favorite. This sample not only indicates the quality of this lot but shows the fine character of seed you can expect in World Brand grades of other seeds like Red Clover, Alsike, etc. Our Dakota 12 seed is Nebraska grown. In this state extremes of heat and drought and cold develop a type of alfalfa adapted to wide variations of climate. It is capable of taking a lot of punishment. Many farmers will sow no other kind, claiming it as hardy as Grimm and more productive. We consider it adapted anywhere that hardy Alfalfa is needed.

Compare our values on this fine alfalfa seed. Our price is good as long as present supplies last. Thrifty buyers will be delighted with the saving and the quality will please the most critical farmer. Better Buy Early for Best Bargains.

UNITED STATES GROWN

RED CLOVER LOT LEADER

99% PURE Including Crop Seed
A SEEDING MANY FARMERS PREFER

I got to figuring late last fall on how to give our customers a bang-up clover seeding at a most reasonable price. Since Red Clover seed is scarcer the markets have advanced. I know other farm products are higher and that as a whole farmers have more income. However, with higher labor costs, taxes, etc., there will still be farmers who are watching expenses. Therefore, I figured if I could sell a real high quality seeding at a lower cost it should be very popular. You will find just that in Lot Leader.

Character of Lot Leader

It would be easy enough to make a low price if quality was sacrificed, but I knew you wouldn't want that. The seed had to be very clean of weeds and have a high crop purity. Knowing that it is sometimes possible to get red clover seeds from fields that contain some other clovers, at a sharp discount, I started looking for such lots. I found several running from 8 to around 12% other clover crop seed like Alfalfa, Alsike and Sweet. The total purity including these was 99%. They are truly beautiful looking lots of bright, plump, high germinating seed.

All High Quality Seed

The next question was,—could the cost be lowered still further without hurting quality or yielding ability. Experience has proved to me that a little Timothy in with clover improves rather than hurts yields. In fact quite a large proportion of Timothy can be used. However, in this seeding I decided that by including a very moderate amount a farmer sowing it would get practically the equivalent of a straight clover seeding. There is enough Timothy to act as a supporting crop for the clover. That really helps as the clovers then grow more erect, there is less loss of clover leaves. The quality of the hay is often superior. Also the clover increases the feeding value of the grass. The timothy content was therefore set at about twenty-five percent.

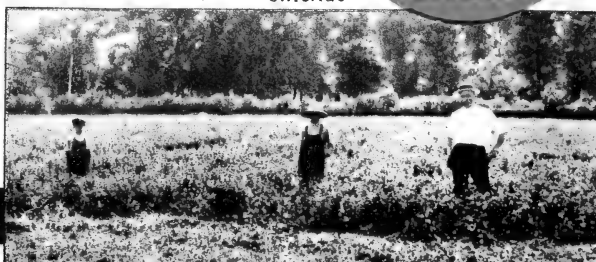

Cost Only Around \$2.00 Per Acre

Here then is a dandy clover seeding with a little grass having a high crop purity and very free of weed seed. Seven pounds will sow an acre. It should yield fully equal to a regular straight clover seeding. In fact I am certain it will yield more. The seed is all hardy domestic stock adapted anywhere in the U. S. It makes a thoroughly dependable seeding. I consider this the most outstanding value in clover seedings for the year. Buy it and if you are not completely satisfied let me know. I'll have it returned and promptly refund your money plus freight. This is truly a big extra value.

For best results with clover seedings be sure to inoculate your seed. The cost is low. It is easy to apply. A package that inoculates a half a bushel of seed costs only 30c; 1 bu. size 50c; and 2½ bu. size 90c. See page 41.

 50 LBS

A MONEY SAVING MIXTURE

LOT JUST-RITE RED CLOVER
 WITH ALSIKE and TIMOTHY

\$9.90 BU.
 45 LBS.

Very Satisfactory

This seeding is still lower in cost than Lot Leader. We have sold this for several years and it has proven very satisfactory and highly popular with our customers. The cost is only \$1.65 per acre as a bushel will sow around 6 acres. Contains plenty of clover seed for excellent stands and the seeding cost is very low. The seed is all hardy domestic seed adapted wherever such seeds are grown. The best evidence of its great value is the many repeat orders we receive. Customers who have once used it like the results they get and buy it again when they make another seeding.

The crop produced from Lot Just-Rite is heavy and high in feeding value. It is an excellent soil builder and stores nitrogen in the land as well as increasing the humus content. Our sales records show this to be the biggest sellers of its class. There is real economy in this lot.

Gives a Fine Clover Seeding

It contains 50% or better Red and Alsike Clover carefully mixed with Timothy. This runs 30 to 35% Red Clover, 15 to 20% Alsike. When you sow this at the rate of a bushel to six acres you will have approximately 20 Red Clover seeds and 18 Alsike seeds per square foot. A total of 36 clover seeds per square foot and you have the Timothy besides to hold up the clover and increase the yield.

Recleaned Quality Seed

Do not compare this with country run or cheap seed of doubtful quality. We haven't tried to see how cheap we could make this. On the contrary we have made it the best possible value at this low price. It is cleaned seed, carefully mixed. It has the quality to produce good stands.

You can use it for hay, pasture and for soil erosion control. It is an adapted seeding and a good one priced to save you money. If you don't believe you have made a worthwhile saving on quality seed, return it and get your money back including freight charges.

For best results from clover seedings—Inoculate your seed.
 ½ bu. size package, 30c; 1 bu. size, 50c;
 2½ bu., 90c.

RED CLOVER

For
Highest Quality Buyers

When it comes to really building up land for a corn crop you can hardly beat Medium Red Clover. It gets the job done without excessive burning or drought damage. The real quality corn crops come from Red Clover sod. And of course there is good money in hay, seed and pasture crops. To get good clean vigorous hardy stands use Berry's World Brand. It is the quality that has pleased our most critical trade for years and is distinctly superior to the so-called best grade of many dealers.

ECONOMICAL AND SATISFACTORY

This quality pleases because of the results it can give. It requires less seed per acre than country run or poorly cleaned lots. A bushel goes further. This seed is priced very low considering its fine quality. If at any time within 60 days after you receive shipment you do not consider you have saved \$1.50 to \$3.00 a bushel, write us for shipping instructions and a prompt refund.

THIS SEED IS HARDY U. S. GROWN

Suitable anywhere in the nation where hardy clovers grow.

You will find other grades of U. S. grown Medium Red Clover described on page 9 and priced on page 40. Lot Leader and Lot Just-Rite described on the page opposite this are also U. S. Grown. Postpaid 1 lb., 60c; 5 lbs., \$2.50.

GETTING GOOD STANDS

Use Berry's World Brand Seed. Avoid heavy nurse crops. Cover seed lightly. Roll if at all possible. Inoculate seed. Inoculation pays well and costs little. Price: 1 bu. size 50c; 2½ bu. size 90c. Also see page 41 on inoculation.

High Color, Big Berries, Extra Fine

It has been many years since we have been able to offer this extra fine, Premium Grade of Idaho grown Clover. It is beautiful seed in every way. Better than 99¼ % purity and 90 % germination. Fine bold berries. Bright lustrous seeds. Smooth, uniform and as pretty as a picture. Seldom will you see as fine a lot as this.

In this year of a great shortage in Red Clover seed we are especially fortunate in being able to secure such extra fine quality. It is only because of special buying connections that we were able to get it at all. The fame of Idaho Clover is nation wide and always has been in great demand. In prewar days it commanded special prices and this Premium Grade is something extra fine. It is priced below ceilings and every quality buyer who demands the best will find this a value that will satisfy in every respect. We don't know where we could go and replace it so place your order at once to avoid disappointment later. You'll be delighted with the Premium Grade Idaho seed.

Mammoth Clover

This clover is also known as Sapling or Bull Clover. This big growing clover seed is very scarce this year. We have it only in World Brand quality and it is high grade Northern grown seed. Be sure to order at once if you wish some of this variety. Satisfactory shipment guaranteed.

CORN-BELT ALFALFA

This is the type of alfalfa that is very popular throughout the Corn-Belt because of its heavy production and its winter hardiness. Its use however, is by no means confined to the corn-belt. Northern states like Minnesota, Michigan and Wisconsin use this character of seed with very satisfactory results and customers in eastern, western and southern states like it very much.

Thoroughly Dependable

TRADE MARK
Reg. U. S. Pat. Off.

We sell this seed in different grades and pack the greatest possible measure of value into each lot. From the lowest to the highest price you will receive seed capable of producing good stands of hardy type heavy yielding Alfalfa. If you demand the finest order World Brand. Each lot and grade is a great value and every shipment is guaranteed to please you.

Order Your Seed Now

We are not trying to "high-pressure" you when we ask you to send your order in at once. Alfalfa seed is short and it is simply our desire to be of the best service to you that causes us to make this suggestion. You may recall that it was difficult last year to get alfalfa seed late in the season. It may be more difficult this year. By ordering at once you have better assurance of getting what you want. The prices in this book are based on supplies we bought early. Any seed we have to replace will have to be sold at full ceiling prices if it can be replaced at all.

HARDY and HEAVILY PRODUCTIVE

GRADES of CORN BELT ALFALFA

Berry's Corn-Belt Alfalfa comes in four regular grades of common. These grades are separated largely according to color and size of berries. Read page 9. There are also special lots of Corn-Belt designated by names such as "Honest John," etc. We also have the Corn-Belt Grimm such as our World Brand on page 31 and Lots Bonafide and Bed Rock. We have found our Corn-Belt Alfalfa hardy and heavy in production. See money saving prices on regular grades on page 40 and get seed that is suited to corn-belt conditions.

CUSTOMERS' REPORTS ON BERRY'S ALFALFA

Joseph Ash of Otsego, Michigan: "We got some of your World Brand Corn-Belt Alfalfa 2 or 3 years ago. It is doing so good we want some more."

C. A. Foster of Sparta, Ill., says he bought some of our cheapest Corn-Belt Alfalfa 5 years ago. Still going strong. Has another piece of ground ready for more.

Ed Phienheimer of Shipshewanna, Ind., has used Corn-Belt Alfalfa for seven years. Orders more. Says to send it whatever the price may be.

Ivan R. Arnsmeir of Juda, Wis., reports our Corn-Belt Alfalfa gave him four cuttings when his neighbors got only two. He had our lowest priced grade.

Wm. Koutny of Brandon, Iowa, states he obtained a fine stand. Lots better than some who paid five bucks per bushel more for their seed.

Oscar M. Hub of Riley, Wis., says the four bushels of Corn-Belt alfalfa was seeded with excellent results. Well pleased.

Frank L. Wilcox, Galloway, Ohio, wants another bushel and a half like the Corn-Belt he got the year before which gave very good results.

Wm. S. Van Tassel, Antwerp, N. Y., says: "I secured a wonderful stand last year of your seeds, especially of your alfalfa."

Elmer Broedlow of Jefferson, Wisconsin, writes: "Just wish to say the alfalfa I purchased of you last year withstood the drought and ice of last winter. My seeding is excellent although some report their seedings are dead again this year."

INOCULATE ALFALFA SEED

Better Stands—Heavier Growth

Alfalfa gathers nitrogen from the air. That is why it builds up soils and contains so much protein. But it can do this only when the plant's roots have certain bacteria working in them. You can get these bacteria by inoculating your seed. These bacteria can thus enter the roots and form nodules as soon as the seed sprouts. Then your plants will be healthier, stronger and grow larger. Plants that are not inoculated often turn yellow and die. Inoculation may mean the difference between success and failure.

Berry's Nodule Germ Inoculation is inexpensive. It is easy to apply. Full simple directions with each package. Price 1 bu. size, 50c; 2½ bu. size, 90c. If this inoculation does not form nodules on the roots of your plants we will refund the price of the Nodule Germ.

Market Conditions

Production in some of the big seed producing sections was very short. There is practically no carryover seed. The demand is enormous. While prices may not advance much due to government ceiling the question will be whether you can get seed at all later in season. It will pay you to buy now if you want alfalfa seed.

Sowing Alfalfa

Get your seed bed as fine and well packed as possible. Sow a little later than Red Clover with a very light nurse crop. Better still a little later seeding after some advance harrowing to kill weeds. In such case sow without a nurse crop. Fifteen pounds per acre is plenty. Do not cover over half an inch. Roll, if possible after seeding. Inoculate your seed.

North Liberty, Indiana.
Dear Sirs: Your seeds are the best I ever used. The Yellow Biennial Sweet Clover is certainly the best. Every seed came up. I am well satisfied and can recommend your seeds highly.

Yours truly,
ELDEN KANE.

ALFALFA

Inoculate your Alfalfa Seed. Easy to apply. The cost is low. It pays big dividends. See page 41.

LOT FANCY

A Fine Fancy Quality

We generally call this our Dealers Fancy Grade because it is a quality that is so often sold as the best in a retail way. It might easily pass for the best if you didn't compare it with an extra fancy quality like our World Brand.

You'll like its high purity and smooth berries. It has good color too. Not quite as bright as the World Brand but plenty nice at that. And it has the growing power to produce good stands. The hardiness is the same as the World. In fact it will do everything the higher priced grade will do. The main difference is in the color and that difference isn't great.

You can save approximately \$2.00 per bushel over our World Brand and compared with average retail prices the savings should be much more. You can buy this or any other lot and if you do not think you have made a good purchase and savings don't keep our seed. See Guarantee on page 8. This Lot Fancy is a great value. Buy early.

Corn-Belt Alfalfa Seed

A low priced grade that satisfied many

This is a quality similar to our Square Brand. Thousands of our customers have been using this type of seed for many years. They know the seed isn't the best for looks but they also know by experience that they can get good results from such seed. The great saving in seeding cost is clearly seen in our very low prices. Less expense with satisfactory results, gives plenty of reasons for the popularity of this lot.

The crop from this seed is just as hardy and productive as any of our corn-belt alfalfa. If you don't object to smaller berries and some discolored seed we're sure you'll like it as so many of our customers do.

WORLD BRAND CORN BELT ALFALFA

\$27⁰⁰
BU
60 LBS.

We ask every critical buyer to check the savings you can make on this high quality grade. This is Corn-Belt alfalfa at its best. Our extra fancy quality. The highest color and plumpest berries. A grade that nearly always runs 99½ pure. Priced to save you real money. See the samples of World Brand Alfalfa seed enclosed. That indicates the beautiful character of this grade. Such seed is always a sound value and we guarantee to save you money on it. We have ample seed on hand as this catalog goes to press and will endeavor to supply it all season long. The wise thing is to get it by ordering now.

The hardy character of our Corn-Belt Alfalfa is described on page 34. The beautiful quality of this seed is sure to please you. This is seed that we consider winter hardy and highly productive. It is this character of alfalfa that has helped build up such an extensive alfalfa seed business for us. Quality to please our most critical trade and a price to suit our keen judges of value. You will appreciate this high grade bargain.

Chippewa Falls, Wisconsin.

Gentlemen: My father used your seeds for 30 years and would never think of planting any other seeds than Berry's. I have been farming for 14 years and always bought my seeds from you. The seeds always come up, have strong hardy plants and bear excellent crops.

Yours truly,
WM. E. KLEMKE.

LOT BIG KROP

Choice Quality Corn-Belt Alfalfa

\$22⁵⁰
BU
60 LBS.

If you want a good serviceable, in between quality, order Lot Big Krop. It is a finer grade than the Honest John (page 30) and the Lot Good Service described above. It is not as smooth and uniform as the extra fancy World Brand described in the opposite column.

It is the same hardy Corn-Belt alfalfa like the others. This medium quality seed has given our trade a high degree of satisfaction for many years. The very low price we have on it makes it a great value that we do not believe can be duplicated anywhere. It is a good practical value for thrifty buyers.

Order early while supplies are available.

EXTRA HARDY ALFALFA

LOT
BONAFIDE
GRIMM ALFALFA
\$23⁴⁰
BU.

\$23.65 CHICAGO

Shipped in a Sealed Bag

A Real Value

A selected bargain in medium grade Grimm Alfalfa seed. Honest-to-goodness quality without the extra high color that means higher prices. It is seed of good character; cleaned, good growing power, extra hardy.

Lot Bonafide is Northern Grown of a productive hardy type. It is one of our most popular and biggest selling lots. This grade may sell as a fancy quality. It certainly is a serviceable lot.

We know that a lot of farmers have to watch their expenditures very carefully. That is why we made a special effort to secure seed of this type. We strive to supply the needs of every customer. It is typical of Berry Service to enable you to secure such quality of Grimm Seed at so low a price. Shipment is guaranteed to satisfy you. Any buyer of Lot Bonafide who does not think he has made a big saving can return shipment and get his money back.

Lot BED ROCK GRIMM

25c per bu. Higher at Chicago

Shipped in a Sealed Bag
Serviceable Seed—Hardy Origin

\$21⁰⁰
BU
60 LBS.

Grimm Alfalfa is in greater demand than ever. This lot places it within the reach of every farmer who wants this kind. This lot is priced very low for such quality. It is a grade that has given our customers satisfactory results. Has good growing power. Produces the same kind of alfalfa as higher priced seed.

This low price is possible because we obtained some Grimm seed that was somewhat discolored. It would not classify for fancy colored grades. Berries are a little smaller. While the germination per hundred seeds is lower there are so many more seeds per pound that this is largely compensated for. Several tests per ounce show more sprouts than an ounce of larger berried kind.

A Heavy Producer

We sell this seed because we know that it has the ability to produce good, strong stands. In appearance it isn't the best but from a practical standpoint it does very nicely. Sow 15 pounds per acre. Shipment is guaranteed to satisfy. If you want to get a start with Grimm at a low cost, order this lot. Customers report it an outstanding bargain.

INOCULATED ALFALFA SEED PAGE

World Brand

Montana Grimm is known nation wide for its hardness and yielding qualities. The demand for this seed is heavy but the supply is short. The heavier production antici-

pated early did not materialize and then early freezes caused a lot of seed to discolor. There was wild buying in the producing sections and seed moved out of the country fast.

We secured one carload of this seed which we are selling; first come, first served. This World Brand quality seed is according to our information better than average quality of the total crop in that state this year. High purity and germination makes it seed to please the quality buyer. This stock is of unquestioned hardness and adapted wherever extra hardy alfalfa is needed.

The better you are posted on the Alfalfa seed situation the better you will appreciate the seriousness of the shortage of supplies. Let us take care of you. Mail your order now.

Price Small Lots, Postpaid: 1 lb., 80c; 5 lbs., \$3.65; 10 lbs., \$6.50.

**STATE
CERTIFIED
GRIMM**

\$34.00
BU=60 LBS.
\$34.25 IN CHICAGO

State Sealed Seed

State Certified seed is an extremely scarce article this year and very difficult to locate. We have succeeded in securing a very limited amount of State Certified Grimm and also some State Certified Hardistan Alfalfa. This latter variety has shown even greater resistance to cold than Grimm and is very evidently more resistant to bacterial blight. We therefore consider it has superior qualities especially for use in some sections. Since our supply of both is limited we reserve the right to substitute one for the other on orders for either Certified Grimm or Hardistan. Also we will ship either from Clarinda or Chicago if stock of both become exhausted at either place. If that is not satisfactory please state when ordering.

For genuine State Certified seed order early.

WORLD BRAND NORTHERN GRIMM

Extra Hardy Type

The U. S. Government in establishing price ceilings on Alfalfa designated three separate zones of production, Northern, Central and Southern. We secured all of our seed from Northern and Central sections as we have found seed from these areas to be hardy and well adapted to the needs of our trade throughout the nation. Through their price structure O.P.A. has indicated the extra value of Northern seed.

Straight Northern Grimm

This World Brand Northern Grimm is all produced in states officially designated as Northern or in other words those producing the hardest seed. Such seed is adapted anywhere in the nation where extra hardy alfalfa seed is desired. This World Brand quality is the finest of our stocks and is high quality seed in every way. Not only is it extra hardy but we

Use Inoculation. Bu.
50c; 2½ bu., 90c.

\$29.65 f. o. b. Chicago

60 LBS

consider it to be heavier in yielding ability.

The demand for Northern origin seed is so big that we ask our customers to mail orders as promptly as possible and thus enable us to serve you better. On early orders we will ship Premium Grade at no extra charge.

Big Demand—Order Early

The satisfaction our customers have had in the past from this type of seed makes it our biggest seller in high quality Grimm Alfalfa. In spite of heat, drought and cold it produces satisfactory yields. We have a fairly large stock of this as our catalog goes to press but we do urge you to assure yourself of the seed you need by ordering now.

Myerstown,
Pa.
Dear Sirs: I have been getting my seeds from you for twelve years. I get the kind of seeds I want and save money. The Grimm Alfalfa I sowed in 1930 gave me three cuttings of fine hay this year.

Yours truly,
MILES L. RISSER

ALSIKE CLOVER WORLD Brand

\$23.35 Chicago

\$23¹⁰_—
BU.
60 LBS.

This is a clover so valuable, so adaptable to conditions unfavorable to other clovers that many farmers are passing up a good bet when they do not use it. In this World Brand you secure our finest quality. Highest in color and plumpest berries. The grade that has satisfied our most critical trade for years. All hardy U. S. Grown seed.

Alsiike is a fine stemmed perennial clover. Higher in feeding value than Red, greener in color and less dusty. Under favorable conditions stems grow 3 to 5 feet long. Prefers loam to heavy soils. Grows on land too sour for red and is extra winter hardy. It is excellent practice to sow a couple of pounds of alsiike per acre with Red. Helps to secure a better stand and a thicker growth.

Alsiike is economical to sow. It is a smaller seeded clover, 5 to 6 pounds per acre is plenty to sow. Use it alone or with other grasses for hay and pasture. Stands trampling. An extra good clover for pasture and makes wonderful hay.

Alsiike is grown from Oregon to Maine and from Minnesota to Tennessee and other southern states. In the south is used largely for pasture on lower ground. North and east it shows its great value as a hay crop. Extra good on wet land, stands a lot of overflow. Its use however, is by no means confined to wet land. It is generally easier to get a stand of alsiike. Compare our values. Although the seed is relatively scarce we have very low prices and can save you money on this our finest quality.

Postpaid 1 lb., 60c; 5 lbs., \$2.50; 10 lbs., \$4.50.

LOT ALSIKE MERIT

\$20.05 Chicago

\$19⁸⁰_—
BU.
60 LBS.

This lot of Alsiike sells at a substantial discount under our World Brand simply because it may have a little Red Clover or other farm crop seed in it. Will average 90% or better pure clovers. Free samples on request will show you just how nice this seed is.

You will like it for hay and it is very good for pasture. If you are making a new seeding you should like it and it is fine too for top seeding on old meadows and pastures. If you are making up a pasture mixture with other grasses you can use Lot Merit. It helps to reduce seeding costs and it is a value we are sure you will appreciate. Return seed for refund if you are not completely satisfied. See guarantee page 8.

GIANT INCARNATE or CRIMSON CLOVER

Resembles Red Clover.
Grows up to 2 to 2½ feet.

Upright branching plants. Roots deeply. A bountiful provider of nitrogen. Will thrive better than Red Clover on thinner and poorer soils. Very efficient for green manuring. Plowing under a good crop is estimated equal to 20 loads of manure per acre. Stubble plowed under 12 tons. A cheap source of nitrogen. One authority says it's worth \$20.00 to \$30.00 per acre in nitrogen.

Most extensively used in the south as a fall sown crop. We suggest only spring seeding in north where it is a quick growing annual. Prefers cool growing season. Sow 15 lbs. per acre. Our seed guaranteed to please you.

Small lots, prepaid, 1 lb., 35c; 5 lbs., \$1.50; 10 lbs., \$2.75.

\$10⁸⁰_—
BU.
60 LBS.

Lot ECONOMY ALSIKE WITH TIMOTHY

A special lot and a seeding that our trade takes to in a big way. A bushel sows six acres. That averages about 60 clover seeds per square foot. You have the Timothy besides to hold up the Alsiike. That helps it grow taller and cleaner. One crop aids the other. They will produce a greater tonnage in combination than when grown separately. Makes heavy crops of fine quality hay and pasture. Very nutritious as Alsiike is higher in feeding value, pound for pound than Red Clover.

Lot Economy generally contains 50% or more Alsiike. This is mixed with the Timothy to make a blending and quality that our customers consider a real bargain and a money-making seeding. Do not confuse this with the average combination of Alsiike and Timothy. It is richer in clovers. Requires less seed per acre.

Shipment is guaranteed to please you. You can cut your seed bill. The seed is U. S. grown and hardy anywhere in the U.S.A. If you want to make an adapted seeding and an economical one order Lot Economy. We are sure you will be well pleased.

LAWRENCE S. GIDDINGS.

WHITE DUTCH CLOVER

The clover used in lawn and pastures. A perennial. Roots at joints. Will withstand acid conditions and poor drainage. Increases feeding value of pastures. Stimulates growth of lawn grasses. Seed is very small. 2 or 3 pounds sow an acre. Seed is very scarce now. Our prices very low. Quality very nice. Small lots, postpaid, 1 lb., \$1.00; 5 lbs., \$4.25; 10 lbs., \$8.00.

\$9⁹⁰_—
FOR 15 LBS.

TIMOTHY WORLD BRAND

Our Finest Grade—Iowa Grown

The value of Timothy is again being appreciated. It is one of the surest to make a stand. Grows on a wide range of soils and is adapted to a wide area. Helps check soil washing better than straight clovers. Used alone and in combination with clovers and alfalfa to produce money making crops. Hay, pasture and seed crops are all valuable. A seeding lasts several years. Sow 10 to 12 lbs. per acre. Our present prices will save you money.

Berry's Quality Prices Low

Located as we are at the door of one of the World's greatest Timothy seed producing sections we have a better opportunity to get the best. Our buying costs are low. Transportation is a small item. For years we have been large handlers of Timothy seed. Our machinery is designed to handle it efficiently. Our experience has taught us much. We handle a large volume. All these factors combine to make our prices low and quality extra nice.

More for Your Money

Our World Brand grade is extra fine. That is what our most critical customers have been demanding and using for years. We have other grades too, Fancy, and Square. See page 9 for description and page 40 for prices. A quality and a price to meet every need, and a genuine saving guaranteed on each one. Return for refund if shipment not satisfactory. Buy direct. Save Money. Get that extra measure of value and ease the strain on your pocketbook. Our prices are far below O.P.A. ceilings.

Single pounds, postpaid, 25c; 5 lbs., \$1.00; 10 lbs., \$1.80

PLANET BRAND TIMOTHY

\$3.40
BU.
45 LBS.

This is a very serviceable grade of re-cleaned Timothy seed. It has good purity and germination and the ability to produce fine stands. It sells for less money than our World Brand grade because it isn't so nice in appearance. It contains some lighter weight seed and some lots with a larger percentage of hulled seeds are blended in. Therefore it is not quite as bright or uniform in appearance. This Planet Brand will compare very favorably with much seed used. When compared with our World Brand you will see it is not quite as nice looking.

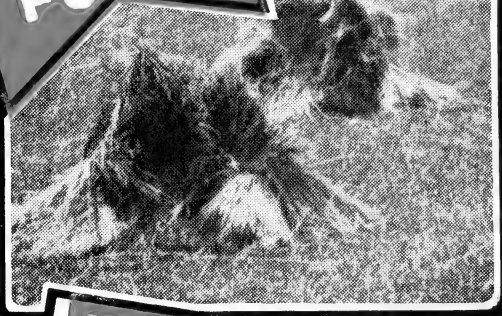

Costs Only 75c an Acre

A bushel will sow 4 to 5 acres. Timothy is one of the surest seedings. It is adapted to a wide range of soils and climate. Gives you protection against soil erosion at low cost. It is a small investment that buys profitable returns. Don't risk the wastefulness of thin stands of grass when it costs so little to get a good one. Provide for bigger yields and better soil protection by sowing Timothy this year. This seed is good sound merchandise of good practical value.

Stoddard, Wisconsin.
Dear Sirs: In the spring of 1931 I purchased some of your Lot More-Hardy Alfalfa at \$10.50 per bushel. I also used some high priced seed from another firm. All sowed on the same ground. Your seed made a good stand, the other failed. You saved me money and I got better results.
Yours truly, ALBERT J. JONAS.

THIS GRADE
VERY
PURE

DOMESTIC RYE GRASS

Fast Grower—Big Yielder

Domestic Rye Grass is rather light green in color. Leaves are a little broader than Blue Grass and grows much taller. Requires no nurse crop. In fact it grows so fast it is often used as a nurse crop for other slower growing grasses. Do not confuse this with Rye that is sown for grain. It is entirely different. The seed is somewhat like that of Blue Grass only larger. If you need early pasture or hay, something to sow early, use Domestic Rye Grass. A full seeding is 25 lbs. per acre. Some sow less. Prepare a good seed bed, cover seed lightly and roll if possible. Sow alone or in mixture.

Our Grow-Quick Mixtures (see page 26), contain a good percentage of this valuable grass. Buy now. For present prices see page 40.

3 Timothy AND CLOVER MIXTURES

AT
LOW
SEEDING
COST

**TIMOTHY
ALSIKE and
RED CLOVER**

Regular Grade
Contains 20 to 25% Clovers
All Hardy U. S. Grown

An economical seeding but a good one. There is ample clover seed to produce a good stand. At 10 lbs. per acre it provides around an average of 25 clover seeds and at 8 pounds per acre 20 to 22 clover seeds per square foot. The Timothy is in addition. There is a distinct advantage to the Timothy. It supports the clover plants. They grow straighter and taller. There is less loss of clover leaves because there are not so many in contact with the ground. Most of the feeding value is in the leaves.

The clovers help the Timothy. It gets the benefit of nitrogen gathered by the clovers. A number of tests show that grasses contain more nitrogen when they are grown with clovers. It has also been shown that Timothy and clovers grown together will yield more than when grown separately. Thus better quality, larger yields and low cost are big factors in making our mixtures so popular.

Costs around \$1.10 an acre

That is all it costs when sown at 8 pounds per acre. No one can afford to neglect seedings when the cost is so low. Build up your land. Get good hay and pasture crops. The way to big permanent profits is to make liberal clover and grass seedings every year.

TIMOTHY & RED CLOVER
HOME GROWN

All mixtures 15c bu. higher at Chicago

SUPER GRADE

Contains 28 to 32%
Red Clover

Hardy U. S. Grown

**\$7⁰⁰
BU.
45 LBS.**

Red Clover is hard to beat as a soil builder in the corn-belt. It leaves the land in ideal condition for corn crops. The ground works up nice. It is easy to cultivate. There is less danger of burning than with some other legumes. You can be surer of a good vigorous well filled crop of corn. In fact a good grass sod is good too, only it lacks the nitrogen clovers bring. A combination of Red Clover and Timothy gives wonderful results, for you get both humus and nitrogen from the growth plowed under.

Berry's Timothy and Red Clover mixture has always been and long will be a seeding to give you these results. Yes, soil building, soil conserving, and at the same time produces money making hay and pasture crops. Then too it is economical.

The clover grows erect in the Timothy because the grass helps hold it erect. Thus the clover can do it best. Less spoilage; more leaves. The Timothy benefits by the nitrogen gathered by the clover. That increases its feeding value. All this for a cost of around only \$1.25 per acre. Some sow 8, some 10 lbs. per acre. At the latter rate you get around 23 clover seeds per square foot. Three or four clover plants make a wonderful stand. You have the Timothy besides.

Compare any prices on such a recleaned mixture with Berry's direct-to-you quotations. We guarantee a saving of 20% and complete satisfaction on every shipment. See page 8.

Send us your order. Cut costs. Make a real seeding.

**TIMOTHY and
SWEET CLOVER RED CLOVER**

Contains 50% Hardy Home Grown Clovers

Picture a field with a nice vigorous growth of luscious sweet clover. In between the sweet clover a heavy growth of Timothy with Red Clover filling in the gaps and lower growth. What a crop and what a yield. Rich in protein, high in feeding value, powerful in soil enrichment. A combination that is good for hay or pasture or both. Costs only \$1.25 an acre, figuring 10 lbs. of seed per acre. At 8 lbs. it's only \$1.10 an acre. No other mixture so rich in clovers at so low a price.

It is all cleaned seed and hardy home grown. Carefully mixed for uniform seedings. We know of no other seeding so low in cost that will produce as heavily. Helps inoculate soil for alfalfa. Should provide pasture the first year, an early hay crop the next year and then pasture for the balance of the second year. Shipment is guaranteed to please you in every respect. See page 8. For heavy production at lowest cost order Timothy, Sweet and Red Clover Mixture.

North Manchester, Ind.
Dear Sirs: After using Berry's seeds for five years I am fully convinced as to the quality of them. It is to my interest to buy from you. I always speak a good word for Berry's Seeds whenever the occasion arises.
Yours truly,

A. F. STELLAR.

3 POPULAR MIXTURES

Our ready mixed seedings have always been popular. They give a blend of clovers and grasses that produce heavily. They yield more when grown mixed than separately. The cost of seeding is reasonable. All the seed is recleaned and shipment is guaranteed to satisfy you in every respect. Return it for refund if not satisfactory.

TIMOTHY AND ALSIKE

20-25% Clover

Regular Grade

Low Cost — Big Yields

An Economical and Highly Satisfactory Seeding

Costs Only \$1.10 an Acre

15c higher Chicago

A seeding rich in clovers at a very low cost. At 8 pounds per acre you will have around 30 alsike seeds per square foot. It would take around 40% Red Clover mixture to give you that much clover. Makes a wonderful quality of hay. Less dusty than Red Clover and higher in feeding value. Fine for pasture. Checks erosion. A seeding lasts several years. Very popular with our trade because of the satisfaction it gives.

Both Alsike and Timothy are very winter hardy. Alsike being the hardiest of the clovers. It will also grow on soils that are too sour or too wet for other clovers. Timothy and Alsike have the same soil and climatic requirements. They are naturally adapted to growing together. The Timothy supports the clover, enabling it to grow erect, taller and more leafy. The alsike forms a dense mat of clover down in the Timothy and it seems to stimulate the growth of the grass. Thus both do better when grown in a mixture instead of separately.

We know the sections where large quantities of this seed are grown together. The seed is harvested mixed. Because it is so difficult to separate the two we can buy it at a substantial discount below the cost of the Timothy and the Alsike unmixed. We secure the bulk of our seed from these sections. It is processed, cleaned and uniformed. It is passed on to you at prices that are low figures for such fine quality clover rich seeding.

This mixture when sown at 10 lbs. per acre will give an average of 32 Alsike seeds per square foot. It would take about a 50% Mixture of Red Clover to give you as many clover seeds. Alsike seeds are smaller and go farther. This mixture satisfies because it is easy to get a catch, lasts for several years and produces big crop of the finest mixed hay.

We guarantee to save you money on this seed. Ask for sample. Compare for color, purity and clover content. This seed has good growing power. It is truly a remarkable value. We recommend and urge its use because we know it is a seeding that gives satisfaction and the seeding cost is low this year. Buy early and protect yourself on price.

TIMOTHY and RED CLOVER

REGULAR GRADE 15-20% Clover

\$5.95 Chicago—45 lbs.

Seeding Cost as Low as \$1.10 an Acre

The same quality of seed that is used in our extra rich grade described on page 42. Our lowest cost mixed seeding. Contains sufficient clover to give an average of 12 to 13 clover seeds per square foot when sown at 10 lbs. per acre. That costs only \$1.25 an acre. 8 lbs. per acre costs only a trifle over \$1.00 an acre. Satisfactory stands of clover can be secured from such a seeding. All hardy U. S. Grown, cleaned seed. If you want to economize as much as possible, buy this Regular Grade of Timothy and Red Clover mixed. If you don't consider it an exceptional value in every way at this low price, return shipment for full refund.

Dalton, Ohio
Dear Sirs: I have been using Berrys seeds for many years, especially Red Clover. I have often compared with others, but find none to equal Berrys' for quality and price. This year I have the best stand of Red Clover in the community.

As ever, your customer,
S. J. KULA

\$7.25 bu. f.o.b. Chicago
28 to 32% Legumes

Red Clover, Alsike and Alfalfa in a generous measure mixed with Timothy to form a splendid seeding. This is one of our most popular and biggest selling combinations. Ample clovers to produce a good legume stand. An excellent way to see how Alfalfa will do on your land. A seeding of 10 lbs. per acre averages 30 clovers and Alfalfa seeds per square foot, 8 lbs. per acre 25. This seed is all hardy home grown. All recleaned seed, carefully mixed. Comes ready to sow. Produces heavily. Makes fine hay and very good for pasture. It will build up your land and check soil washing.

Costs only around \$1.30 an acre to sow and that is a really low price this year for such a fine 4 way mixture. No farmer can afford to neglect grass and clover seedings and with this combination you get a good one at small cost. We consider this one of our best mixtures. Our price is guaranteed to save you money and shipment is guaranteed to satisfy you. See page 8. We are sure you will be delighted with this seeding. It is economical, productive and very popular.

VARIETIES AND TYPES

That which we list as Sweet Clover is the White Type. Because of conditions in principal seed producing sections it may contain some yellow. Lives two years.

GRUNDY COUNTY TYPE. Matures about 3 weeks earlier than common white. Grows around $3\frac{1}{2}$ ft. high. Lives 2 years. See page 46.

YELLOW TYPE. Lives 2 years. Matures between White and Grundy County. Finer stemmed and leafy. See pages 46 and 47.

HUBAM. An annual White Blossom Sweet Clover. See page 47.

GOLDEN ANNUAL. A wonderful new one year yellow. See opposite column page 44.

Sweet Clover Seed Very Scarce

We have estimates that the Sweet Clover seed crop this year will be only $\frac{1}{4}$ to $\frac{1}{3}$ that of last year. A lot of dealers are not going to have much if any seed to sell. Our advice to any customer wanting sweet clover seed is to order promptly upon receipt of this catalog. We know our stocks are larger than the average and we should be able to take excellent care of prompt orders. This is a crop of great value and is badly needed on many farms.

Sow early spring like Red Clover. Use 12 to 15 lbs. per acre. Have a firm seed bed and cover lightly.

SWEET CLOVER

A NEW SWEET CLOVER GOLDEN ANNUAL CLOVER

A Great Cash Crop—Heavy Seed Producer The Most Palatable Sweet Clover

Here is an entirely new variety of sweet clover. A clover that we believe is destined to rapidly replace other sweet clovers because it has so many valuable characteristics. The demand for the seed will be tremendous. Get in on the big money by growing a seed crop this year.

A Big Cash Income

One Iowa farmer sowed 15 pounds last spring on 4 acres and harvested 1250 lbs. of seed last fall. Another got 360 lbs. from two acres and still another 25 bushels or 1500 lbs. from $2\frac{1}{4}$ acres. That is 10 bushels per acre. This was from seeds planted in rows.

This clover ripens seed more evenly than other sweet clover and the seed hangs on to the plant. Very little loss from shattering. In the fall there are practically no leaves or blossoms but all seed.

Characteristics

It is an annual like Hubam, making its full growth, blooming and bearing seed the same year it is sown. It is slightly later than Hubam. It is leafier and has finer stems. The crop is very palatable. It is not as bitter as most sweet clover. Makes a fine pasture after small grain in August, September, when two-year-old sweet clovers are dried up. It is an excellent soil builder. Its roots are thick and fleshy, very much like the two-year sweet clovers. These roots go down about 4 feet.

How to Make Money

Its value for fall pasture and for fall plowing of the clover for fertilizer will be more common when seed is more plentiful and cheaper. Now is the time to cash in on it as a seed crop. Sow with small grain using 6 to 8 pounds per acre. The seed is smaller than other sweet clover. Or plant in rows with a corn planter fitted with drill plates using about 2 lbs. per acre. Be sure you have a firm seed bed. Pack with a roller if possible after seeding. Do not cover over 1 inch. If in rows cultivate as soon as you can see the rows and keep it clean. Inoculate your seed with Sweet Clover Inoculation. Harvest when top seed is fully matured.

There will be a big market for this seed crop because it has so many superior features that it will be several years before the demand can be supplied. We have a limited quantity only. Order at once and don't wait until it is gone before you order.

While it lasts our price is \$14.40 per bushel of 60 lbs.; \$7.30 for 30 lbs. and \$3.70 for 15 lbs. f.o.b. Clarinda. We do not have this at Chicago.

Small lots Postpaid 1 lb. 50c; 5 lbs. \$2.25.

Inoculate Your Seeds

Inoculation provides young plants with the bacteria they need to gather nitrogen from the air. Helps assure healthier and more vigorous plants and bigger yields. Easy to apply. Full directions furnished. Cost is low.

Price: 50c for 1 bu. size; 90c for $2\frac{1}{2}$ bu. size.

See page 41 for further information. Berry's Nodule Germ is guaranteed.

BLUE RIBBON BARGAINS

UNHULLED SWEET CLOVER

ALL RECLEANED SEED

\$4.20 at **CLARINDA**
PER BU. **\$4.35** at **CHICAGO**
30 LBS. to BU. PER BU.

BAGS FREE

Our well re-cleaned unhulled seed is the best to use for early winter seeding. It is better than hulled seed either scarified or unscarified. Germination is slower. Will not start to grow during a warm spell in winter. Becomes firmly embedded in the soil. Waits until spring, then grows rapidly. Many customers report that the sowing of our unhulled seed early in the winter gave them the finest stands they ever had. Sow about 20 lbs. per acre. Just broadcast it. No seed bed preparation necessary. If convenient cover it a little before growing season starts. Otherwise let nature take care of it.

This seed is fancy cleaned quality that pleases our trade. It is a high grade product and our prices are very low. Compare qualities. Judge values and note the difference.

Buy Now—Save Money—Sow Early

3 SPECIAL VALUES IN HULLED AND SCARIFIED SWEET CLOVER

LOT WONDERFUL SWEET CLOVER

\$9.90
BU. 60 LBS.

15c per bu. higher, Chicago

Our Greatest Sweet Clover Value

Better than 99% Pure

We made a wonderful buy on a large lot of White Blossom type sweet clover. It is practically equal to our World Brand grade and still is \$1 cwt. lower in price. It is scarified, high germinating seed and as satisfactory to sow as any seed you can buy. We recommend it because it contains about 5% of mottled seeds which indicates the presence of yellow sweet Clover. In our opinion this increases its value as a pasture, makes good hay and a great fertilizing crop.

Get Seed by Buying Now

With Sweet Clover seed production estimated at only $\frac{3}{4}$ to $\frac{1}{3}$ of normal every one must realize that the supply will not be equal to the demand. While OPA ceilings will fortunately keep prices from skyrocketing it is going to be impossible for a normal amount of this seed to be sold because it simply is not in existence.

We have acquired fair supplies in face of these shortages and if you will order promptly you can get your seed. We suggest you give us the privilege of substituting if the particular kind or grade ordered should be sold out. Considering scarcity, quality and price we are confident these values make it very much to your interest to trade with us on any lot in this book.

SWEET CLOVER LOT DO-MORE

All Sweet Clover 15c higher Chicago

This lot stretches your money over more acres than any other. It is our lowest priced grade. It is a quality that has been giving our customers satisfactory results. It isn't the finest for looks but the favorable reports we get on it indicate its real value and after all, seed is sown for results.

Lot Do-More has been scarified. It comes from recleaned stocks. The crop from this seed is the same kind as will be secured from any of the higher priced grades. Sweet Clover is the greatest of all soil builders and the most productive pasture crop.

\$7.80
BU.
60 LBS.

This Grade in Big Demand

Every year we sell large quantities of this grade and this year the quality is improved. As mentioned above it is not the finest looking seed. It has some off-colored seeds in it. The berries are smaller and therein lies the secret of its performance in the field. While the germination per hundred seeds is lower than in the average larger berried grades, there are so many more seeds in a pound of Lot Do-More that this helps to compensate for the lower test per hundred seeds. The true value of a lot of seed, in our opinion, is the number of sprouts per oz. or per pound. You sow your seed by weight or measure and not by counting it out.

Reduced Seeding Costs

You do not have to sow Lot Do-More at any heavier rate than the higher priced seed. This lot is a real value. Compare it with the cost of sowing any other clover seed. Our customers who use this quality are boosters. They come back for more.

If you want our finest looking seed order World Brand. Lot Wonderful is also a good value. But if you want to cut seeding costs to bed rock order Lot Do-More. You may order this seed with perfect assurance of receiving seed of this character. You can have 60 days to test it after you get it. Then, if for any reason you are not entirely pleased you may return it and your money plus freight will be refunded. We cannot emphasize this value in a fairer or stronger way.

YELLOW SWEET CLOVER LOT SAV-MOST

\$9.00
BU.
60 LBS.

We offer this Yellow Type Sweet Clover. It is a biennial or two year kind. Somewhat leafier than the White Type. Does not grow as tall and coarse. Blooms and matures 10 days to two weeks earlier. Preferred to many for hay. Some claim it is surer to make a stand.

Our Lowest Priced Yellow Type

Lot Sav-Most gives you a very low cost on this finer stemmed leafier sweet clover. It gives you a lot of value at low cost. We sell large quantities of this seed. It is our lowest priced grade. Naturally it isn't as nice looking as the World Brand or Premium

on page 47 but we are sure you will find it a real bargain value. There are some smaller berries in it. The color and uniformity are not equal to our World Brand but the amount we sell of it each year indicates that it gives satisfaction to our trade.

Sow it alone or in mixture for hay and pasture. Start Sweet Clover this year. It is a money maker. Stands heat and drought. Produces lots of valuable feed and does a wonderful job of soil building. Lot Sav-Most gives you the yellow Type Sweet Clover at very low seeding costs.

Inoculate All Clover Seed

Inoculate with Berry's Nodule Germ. Inoculation helps make more vigorous growth, better stands and yields. Costs only 50c, 1 bu.; 90c, 2 1/2 bu. Easy to apply. Read page 41. It pays to use it.

GRUNDY COUNTY

Grundy County Type Sweet Clover

An earlier maturing variety of biennial White Blossom Sweet Clover. Grows around 3½ ft. tall. Blooms about three weeks earlier than the Common Sweet. Matures seed more evenly. Easier to handle because of its shorter growth. It is in big demand where the common grows too rank or where earlier maturity is desired. Only requires 12 lbs. of seed per acre because the berries on this variety generally run smaller in size.

World Brand Quality

We have the Grundy County type only in our finest quality. World Brand has pleased our most critical trade for years. It is scarified, cleaned, tested and shipment is guaranteed to please you in every way. You may compare it with the finest obtainable. If you do not find this a superior value at our low price you may return it for refund. See page 8.

Supplies of this Grundy County type are much smaller than of the common type. Be sure to order your Grundy County Type Sweet Clover early and save money. There is good money in seed production.

Inoculate your Sweet Clover seed. See pages 40 and 41.

All Sweet Clover 15c bu. higher for Chicago Shipment

A Good Value—Moderately Priced

Lot Pearl is the biennial or two year sweet clover same as the World Brand grade described on this page and the Lot "Do-More" on page 45. The tall growing, big-rooted, long seasoned sweet clover. A leader in production. Unexcelled as a soil builder. Big pasture yields. Enormous hay crops. A valuable money making crop. Average seeding required is only 15 lbs. per acre.

A Medium Grade

Lot Pearl sells at lower prices because it is not as nice looking. If you demand the finest order our World Brand. If you want to cut seeding costs and willing to take seed that has some small berries and some off colored seed, then Lot Pearl should suit you ok. It has the ability to produce good stands. The seed is cleaned and blended. It lacks the uniformity and smoothness of our higher priced lots, but many of our customers have used a grade like this for many years and they are well pleased.

Compare Values

Lot Pearl is like our choice grade. There are a good many more seeds per pound than in the World Brand. If you would weigh out an equal weight of seed out of both grades and test all of the seeds in each pile you might find the larger number of sprouts in the lower priced seed. It is important to remember that while the germination per hundred seeds is lower in the cheaper grades, that larger number of seeds per pound tends to equalize that difference.

Inoculate Sweet Clover
Page 41

WORLD BRAND SWEET CLOVER

Do you want the satisfaction of knowing you have the best? Do you like to compare values with your neighbor and prove that you have the finest quality and the biggest bargain? Order Berry's World Brand, for it is our finest and best. A first class quality in every way. See the sample of World Brand Alfalfa enclosed for the fine character of this grade. Consider quality. Then compare prices. You'll see genuine savings and you will receive beautiful seed.

Sweet Clover has been one of our specialties for years. We were the first to feature it as a main farm crop in a big way. These many years of specialization have taught us much about the great crop and about handling sweet clover seeds. Our buying contacts, cleaning and scarifying machinery, our power, etc., enables us to give you values such as this. There is no seed that would give you better assurance of success.

Sweet Clover is a crop of great value. Its enormous pasture capacity, its big seed yields, its heavy hay crops, its marvelous soil building power, these are all money making features. Cash in on them in the fullest degree by sowing Berry's World Brand.

Sweet Clover seed supplies are very short this year. We can take good care of your order if you will send your order early. Do not wait until late in the season. Assure yourself of the seed you need and have it on hand at the same time you need it by ordering now.

WORLD BRAND YELLOW TYPE SWEET CLOVER

\$10.80^{BU.}
60 LBS.

15c Higher, Chicago

An Extra Value

Our very finest extra fancy quality. The choice of our most critical trade. Guaranteed to please the most exacting trade. See guarantee, page 8. Seed like this is scarce and difficult to obtain this year but we have some fine re-cleaned scarified seed on hand for early buyers.

Yellow Type Sweet Clover is in great demand. It is finer stemmed than the white and more leafy. Does not get so rank. Matures about 10 days earlier. Many say it is easier to grow. Provides pasture in abundance. Makes hay superior to white.

Brings Better Profits

Farmers generally are in dire need of clovers. They will restore humus, fertility and profits. Land will be easier to work. It will drain better yet hold the proper moisture at the surface for growing crops. Make your soil perform better. Use Sweet Clover to do the job. It will improve land quicker and at lower cost.

See page 41 for prices on other grades. All are excellent values. Let us take care of your Sweet Clover seed requirements.

It has been our specialty for years and we are equipped to take care of your needs.

Dear Friends:
I like your
seeds and recom-
mend them
to others. Your

seeds do well in
this section. I save money by
buying from you. I am well
satisfied and am sure other
farmers will, too.

Yours truly,

JOHN GREIN.]

LOW PRICE on HUBAM CLOVER

ANNUAL WHITE SWEET CLOVER

The Sweet Clover That Does
Two Years Work in One

\$14.40^{BU.}
60 LBS.

Hubam seed is relatively scarce this year but we were fortunate in securing some fine seed. Supplies are limited however so order early. Sow it this spring. Use it as a hay, seed, pasture or soil building crop this fall. Hubam is a variety of sweet clover that blooms and bears seed the same year it is sown. It is an annual. Does not live over winter. Gives an enormous growth and production in a short season.

15c Higher, Chicago

Get Two Cash Crops in One Year

Sow Hubam Type with small grain. Harvest your grain. Then cut clover for seed. Produces up to 600 lbs. of seed per acre. Sometimes more. Or use it as a pasture. It grows fast, attaining height up to 4 or 5 feet if not cut or pastured. Think what a carrying capacity that means. The growth is rich in protein, making it all the more valuable. Makes a heavy production of rich hay if cut when it begins to bloom. Or if you want to enrich your land fast, plow under a full growth. Some pasture it a while and then plow it under. Think of it, all this in the same year the crop is sown. No wonder farmers who know the crop were willing to pay up to \$18.00 a bushel for the seed a few years ago.

Seeding Suggestions

Inoculate your seed with Berry's Nodule Germ. See Page 41. Sow on winter grain when ground can be harrowed lightly. Sow 15 lbs. per acre. Harrow lightly or roll after seeding. Rolling is best. Sow with spring grain in a similar way. Cover seed lightly with a harrow and roll. The firmer the seed bed the better.

If you cut Hubam as a seed crop or use it for pasture, often the crop will reseed itself for another year. It does not become a pest. It is easily eradicated by cultivation. If plowed under before it seeds it will not come up again.

Low Price on World Brand Quality

Our Hubam Type seed is carried in one quality and that is our World Brand. That is our best grade and a fine quality that pleases critical buyers. Make comparisons on a quality basis and you will see the value of our lots. This is the year to get started with this valuable, quick acting, money making clover. Use Berry's World Brand scarified seed. We use care in the purchase and preparation of this seed. Our seed is scarified. Shipment guaranteed to please you and save you money. See Page 8.

We also call your attention to the new Golden Annual Sweet Clover described on page 44. This is very similar to Hubam and prices are about the same. Both are money making crops and you should find either or both equally profitable to grow. The Golden Annual however, is shipped from Clarinda only as we have none at Chicago.

Small Lots, postpaid: 1 lb., 50c; 5 lbs., \$2.25.

MIXED SWEET CLOVER

Lot PREMIUM

We consider this one of our biggest Sweet Clover values. It is a fancy quality seed which is just under our famous World Brand grade for quality. That means it is seed having good color and size and high purity and scarified for high germination. You can buy this fine fancy seed at this low price because it contains both yellow and white. That does not lower its value for practical purposes and enables you to make extra savings. Do not confuse this with lower grade mixtures of white and yellow sometimes sold. This Lot Premium has the quality that pleases. Runs approximately 80% White and 20% Yellow.

YOUR HOME GARDEN

SAVES MONEY AND RATION POINTS

PLANT A COMPLETE GARDEN THIS YEAR

DO YOUR PART TO WIN THE WAR

You can help win this war in your own back yard. Grow vegetables for Victory. Let the Army and Navy have the cans. The big Home Victory or War Garden Program now being sponsored by our National Victory Council, Secretary of Agriculture, and other government agencies needs the support of everyone. Only by 100% cooperation and participation by everyone can we be insured of success in this Garden Program so vital to National Health and Victory.

Victory will come to America because we'll unite in this and other crusades essential to it. If you want to be sure of doing your part order the Approved Family War Garden Collection page 53 at Berry's special price of only \$4.20 postpaid. Save more by getting your neighbors to order too—price in groups of 8 or more only \$4.10 prepaid.

That is why we term this Home Garden Promotion being carried on by State Agricultural Colleges and your national government "America's First Line of Offense." Fresh vegetables from your own garden in a complete variety is the basis for our health rules. Don't depend on someone else to garden for you. Help make America self-sufficient by doing your share in raising your own food supplies.

and PROTECT YOUR Family's HEALTH and PROSPERITY

Raising lots of fresh vegetables for eating and canning not only insures you and your family better health but also adds greatly to your farm income. Surveys made recently show that the most successful farmers today are those who raise a big home garden. The whole family can take a part in it and the garden is the backbone of successful farm management. It also trains the children in a family to do their part and they here may learn the vital importance of assuming responsibility in contributing something vital to their own family's welfare.

We all know fresh vegetables from our garden taste better than any we may buy. There is also nothing like home canned foods. But some of you may not appreciate how far on food or living costs your own garden will carry your family. Government economists say a 1/2 acre farm garden will save up to \$200 on food costs for the average family of 5. With Berry's New "Victory Garden" Bulk Packages (see page 53) and our big collection offers on pages 49, 52 and 53 you may get enough seed to plant 1 acre of all vegetables for as little as \$4.20.

SERVICE ON GARDEN & NURSERY PROBLEMS

Do you have any questions about gardening you would like answered? Berry's are always pleased to give information that may help you with your gardening and nursery problems. We run a trial garden in which we compare old and new varieties, various methods of planting, different planting

dates, and different insecticides. We keep in touch with experiment stations, and our Horticultural Library is up to date. Our garden seed department manager, Mr. Arthur F. Brenckle, is pleased to have you write at any time. Feel free to use this service.

Garden Seed and Nursery Stocks are short again this year. Our own Victory Gardeners, our Allies, and all the liberated people are demanding more garden seed than ever this year. We know some varieties are scarce, some stocks will be quickly sold out. Berry's will substitute only when stocks are completely used. Our advice is to order early while your favorite varieties are still available.

ORDER NOW

BERRY'S TELL YOU WHAT AND HOW TO PLANT

In order to aid you in planning your garden so as to have all the vegetables necessary to health in your diet we'll furnish with each garden seed order for \$1.00 or more our Planting Guide. This shows you just how far Berry's "Victory Garden" Bulk Packages will go so you won't need to waste any seed.

If you want to be sure of the right vegetables and varieties and save the most money, order our big "Lucky 7" or Family War Garden Collection pages 49 and 53. Also on page 53 see why in every Victory Garden Bulk Package you get more seed for your money at Berry's.

GERMAIN'S HOTKAPS

Crop insurance at low cost enabling you to market your vegetables three weeks earlier and insures finest quality. (Pictured on page 52.) Hotkaps are "individual hothouses" for each plant giving protection and forcing plant growth. They allow the proper amount of air and light for quickest plant development. Hotkaps are used to protect any flower or vegetable, being particularly adapted for vine crops.

Complete instructions given with each size package ordered or get our free circular before ordering. Postpaid prices: 25 Kap (Home Garden) size with paper setter, 50c. 100 Kap Size with fiberboard setter, \$1.95. 250 Kap Size with setter, \$3.50.

Not prepaid: 1,000 Kaps without Setter, \$11.00. Weight, 28 lbs.

SEE POST CARD ENCLOSED

You will find enclosed in this catalog a post card addressed to the Berry Poultry Farm of Clarinda, Iowa. This is a different firm than the Berry Seed Co. While there is no connection between these companies we are sure you will be well pleased with any dealings you may have with the Berry Poultry Farm. Mail this card promptly and you will hear from them direct. They will send you free large poultry catalog, printed in colors.

BERRY'S PRIZE COLLECTION

I WANT EVERY GARDENER TO "TASTE THE DIFFERENCE" OF THESE 8 FAVORITE VEGETABLES. A NEW THRILL AWAITS YOU IN THEIR EXTRA DELICIOUS QUALITY

Charles Shinn, our general garden seed manager, is now serving you in the U. S. Army. Arthur F. Breckle is now in charge.

THE BEST NEW DWARF GREEN BEAN

LANDRETH'S STRINGLESS An Improved Burpee's Bean

For years everyone has planted the old stringy, Stringless Green Pod Beans, in their garden. It has given satisfaction—just as the old "Model T" did in the days gone by. Now we are able to give you something new and much better at little extra cost. Did you ever stop to think how little your garden seed costs? But my, what a difference there can be—something you must see for yourself.

Be sure and try this one now. It is more prolific than the old Burpee's, much better quality and more hardy. It is disease resistant—will thrive anywhere. Make a succession of plantings this year. You need at least 2 pounds for your garden. Our stock is western grown, hand-picked and polished, germination about 95%. There is no better seed or variety than this for the home garden. Lot No. 135—V.G.B.P., 15c; ½ lb., 20c; 1 lb., 35c; 2 lbs., 60c, postpaid. Other Beans, pages 54-55.

Nutrition experts are now urging us to eat more fresh vegetables. All 8 of these are important in our daily diet for health. Grow these at home—they'll taste better and save you a lot of money on food costs at our introductory offer of all 8 for only 75c, postpaid; you save 45c. Order No. 52X—Delicious fresh vegetables such as these are delicacies that cost little but mean a lot to our National Victory Program.

OUR BEST—A FAVORITE OF THOUSANDS

Berry's Beat-'Em-All Radish

Think of it! Crisp, snappy radishes ready to eat 20 to 22 days after planting. A decidedly superior bright scarlet, globe shaped variety, mild, tender. Extra early variety of superior quality for home or market.

Save money by buying enough for a succession of plantings and enjoy fresh radishes all summer. Lot 527—Post-

paid: Pkt., 15c; V.G.B.P., 20c; ¼ lb., 75c; ½ lb., \$1.35; 1 lb., \$2.25.

Radishes, Also Page 65

AN EARLY TOMATO of WONDERFUL QUALITY

Berry's Early Wonder Tomato

A favorite with home and market gardeners for years. The very earliest tomato that gives you unsurpassed quality. The color is a deep, glossy, bright, brilliant red. The skin is smooth. The thick meat is finely flavored. The fruit is nearly round

and large in size.

Has a small seed cavity, firm but juicy flesh. A vigorous grower, it bears enormous crops, over a long period. Grow this tomato for the earliest finest quality fruit. Lot 656 Postpaid: Pkt., 15c; V.G.B.P., 27c; oz., 50c; ¼ lb., \$1.50; ½ lb., \$2.75.

Other Tomatoes, Page 50

Any 5 for 59¢

POSTPAID

Berry's Tenderflesh Carrot

The finest health giving vegetable at its best. Crisp, tender, delicately flavored flesh makes this a garden favorite with anyone who grows it. Supreme quality. Coreless, distinctive cylindrical in shape with very little taper, its flesh has a deep rich orange color. This is a very early maturing strain developed for home gardens. Some say it is the favorite vegetable in their garden. Be sure to try it! Lot 210—Postpaid: Pkt., 15c; Victory Garden Bulk Package, 29c; oz., 60c; ¼ lb., \$1.75; ½ lb., \$3.25.

Regular Varieties, Page 58

Berry's Supreme Wonder Pea

Named because you will marvel at its quality and production. A dwarf wrinkled variety growing vigorous dark green pods about 20 inches high. They are loaded with pods filled with dark green peas. You have never tasted peas so tender, so sweet, so delicious. The best there is for your garden. Plant at least two pounds at different times so you will have plenty for canning. Lot 456—Post-

paid: V.G.B.P., 15c; ½ lb., 27c; 1 lb., 45c; 2 lbs., 80c.

See Also Pages 62-63

EDIBLE SOY BEANS

Bansei

Try some of this very nutritious different bean. Especially desired for meatless days. Soy Beans are high in proteins and will add real tasty nutrition to your meals.

Bansei is an early variety which will ripen in all parts of the country. Used for both green shelling and dry like navy beans. The seeds are large, round, yellow, and of a mild pleasing flavor.

A fine home garden variety that is very productive and not susceptible to shattering. The plant is of medium height, and the pods are yellow with black tinge when ripe. 96 days from planting to eating. Lot 120—Pkt., 15c; ½ lb., 20c; 1 lb., 35c; 2 lbs., 60c, postpaid.

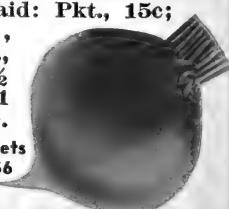

A BEET of TRULY SUPERIOR QUALITY

Berry's Early Blood Red Beet

An early variety of deep blood red color. A selection of equally superior quality for table, canning and pickling. Smooth globe shaped roots with short tops. Extra sweet and crisp, it matures quickly but is a splendid keeper. If you want the best, try this one. It will be a favorite among all others. Lot 156—Postpaid: Pkt., 15c;

V. G. B. P., 22c; ¼ lb., \$1.10; ½ lb., \$2.00; 1 lb., \$3.50.

More Beets
Page 56

AN EXTRA FINE EARLY CABBAGE

Berry's Earliest Cabbage

We challenge you to beat this variety anywhere for earliness, quality and productiveness. A round head type cabbage that starts with a bang, heads in a hurry and is ready for the table before most kinds curl up its center leaves. Heads are firm, color bright green. Rich flavor. Grows compact so may be planted closer together than most varieties. For the first cabbage in your own garden, plant this. Lot 180—Postpaid: Pkt., 15c; Victory Garden Bulk Package, 25c; oz., 80c; ¼ lb., \$2.20; ½ lb., \$4.00.

Later Varieties, Page 57

BERRY'S TOMATOES

Rich Juicy

EXTRA EARLY SELF DETERMINATE KINDS

The varieties in this group have been developed for Extra early production of good sized fruit. They all yield very heavy crops on small stocky plants. They need no pruning since the plants are of dwarf type. If you live in the Great Plains area, from North Dakota and Montana to Texas, these varieties will grow best for you. If you have limited space and want neat compact tomato plants that really produce, order some of these varieties.

668 Firesteel. A new variety developed in South Dakota. Has ripe fruit in 60 to 70 days. Very large globe shaped scarlet red fruit. Can stand hot dry weather and still produce a crop of high grade tomatoes. One of the newest and best. Pkt., 10c; V.G.B.P., 17c; oz., 50c; ¼ lb., \$1.50, postpaid.

658 Victor or Bounty. A new variety from North Dakota. Bears a huge crop of large smooth globe shaped fruit on a small sturdy plant. Actual counts have shown more than fifty fruits on a plant at one time. The fruit are scarlet and without green core or green top. 60 to 70 days from planting to eating. Pkt., 10c; V.G.B.P., 17c; oz., 50c; ¼ lb., \$1.50, postpaid.

654 Bison. The old reliable mother of the above new varieties. Bison has proved through the years that tomatoes can be grown in a short, hot, dry season. 60 to 70 days. Large fruit, self determinate plant. Pkt., 10c; V.G.B.P., 17c; oz., 50c; ¼ lb., \$1.50, postpaid.

INTERMEDIATE OR SECOND EARLY SORTS

664 Certified Rutgers. The outstanding new variety in its class. Really an improved Marglobe maturing a little earlier and being a heavier yielder. It ripens from the inside out to a uniform bright scarlet color. Thrives under more unfavorable conditions than other varieties. Pkt., 10c; V.G.B.P., 15c; oz., 28c; ¼ lb., 80c; ½ lb., \$1.45.

674 Bonny Best. Earliest of all tomatoes in this group. Fruits medium large, apple-shaped, smooth, solid, bright scarlet in color, of excellent quality, setting in clusters of 4 to 8. Unexcelled as a general purpose tomato. Pkt., 10c; V.G.B.P., 15c; oz., 25c; ¼ lb., 75c; ½ lb., \$1.35.

665 Marglobe. A most popular all-purpose variety, very vigorous and productive, disease resistant. Uniformly large solid fruits, bright scarlet, of finest quality and flavor. Pkt., 10c; V.G.B.P., 15c; oz., 22c; ¼ lb., 65c; ½ lb., \$1.15.

672 Pritchard. A new disease resistant early variety producing ripe fruit in about 75 days. Large globe shaped fruit ripening to a deep red both inside and out. A heavy producer on rich soils. Pkt., 10c; V.G.B.P., 15c; oz., 35c; ¼ lb., \$1.00, prepaid.

652 John Baer. An old favorite with large smooth scarlet red fruits of excellent flavor. Pkt., 10c; V.G.B.P., 15c; oz., 25c; ¼ lb., 75c; ½ lb., \$1.35.

RUTGERS

CHALK'S EARLY JEWEL

661 A popular second early, bright red, flattened globe variety that yields unusually well. The fruit ripens up to the stem, without a green core, very meaty with few seeds. 80 to 90 days from planting until first ripe fruit. This one will please you in both quality and yield. Pkt., 10c; V.G.B.P., 16c; oz., 40c; ¼ lb., \$1.20.

Oxheart

this giant of all tomatoes—a favorite of thousands. Almost seedless, making it fine for slicing. Vines are vigorous and productive, fruits large, oblong-purplish red, thin skinned and solid. Recommended for superior flavor. Pkt., 9c; V.G.B.P., 18c; oz., 55c; ¼ lb., \$1.75.

663 New Stone. An old reliable home garden type. Very productive, fruits large, smooth, attractive scarlet-red, of fine flavor. Pkt., 10c; V.G.B.P., 15c; oz., 35c; ¼ lb., \$1.00, prepaid.

671 Oxheart—A distinctively attractive variety entirely different from any other tomato. Increasing in popularity each year because of its very solid meaty fruits of a delicious sub-acid flavor, almost seedless, the fruits grow extremely large and heart shaped. Flesh is pink. A favorite of thousands for the home garden. Pkt. 10c; V.G.B.P. 22c; oz. 60c; ¼ lb. \$2.00.

SMALL FRUITED VARIETIES FOR PRESERVES

657 Red Cherry. Pkt. 10c; oz. 50c.

659 Red Pear. Pkt. 10c; oz. 50c.

667 Yellow Plum. Pkt. 10c; oz. 50c.

673 Yellow Pear. Pkt. 10c; oz. 50c.

677 Small Fruited Mixed. Pkt. 10c; oz. 40c.

BISON

EARLIANA

655 The old standby for many gardeners. 65 to 75 days from planting to eating, a heavy yielder of fair sized red fruit of good quality. This is a safe early variety that has proved its worth to thousands of gardeners for many years. Our Earliana seed is an improved strain that will please you. Pkt. 10c; V.G.B.P. 16c; oz. 45c; ¼ lb. \$1.25. Postpaid.

SPECIAL FAVORITES

660 Mingold—1940 All-American Silver Medal Winner. An attractive new yellow tomato rich in vitamin D. Fine for tomato juice and sliced in salads with the reds. Fruits are medium large, nearly globular. Solid with thick walls. Pkt. 10c; V.G.B.P. 16c; oz. 50c; ¼ lb. \$1.50.

656 White Beauty. Many feature this variety as "Snowball." An ivory white tomato with paper white flesh. As big as Ponderosa with few seeds and no acid. Grow something different in a big excellent quality tomato that anyone can eat. Pkt. 10c; V.G.B.P. 16c; oz. 50c; ¼ lb. \$1.50.

662 Golden Ponderosa (Yellow). A very large deliciously mild flavored late variety for the home garden, wilt-resistant and nearly seedless. Same as Ponderosa except flesh deep yellow color. Pkt. 10c; V.G.B.P. 16c; oz. 50c; ¼ lb. \$1.50.

Three new Favorites—1 pkg. each Rutgers, Victor and Mingold Tomato—varieties every gardener should know. Tomatoes are a fine crop to can—have plenty of them. Regular price 30c—our special offer No. 653—22c postpaid.

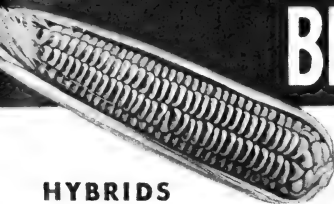

LATE or MAIN CROP

673 Berry's Giant Improved Ponderosa—the largest tomato developed to date. Our seed has been triple tested, in laboratory greenhouse and trial grounds in removing the roughness and splitting tendency from all tomatoes—a favorite of thousands. Almost seedless, making it fine for slicing. Vines are vigorous and productive, fruits large, oblong-purplish red, thin skinned and solid. Recommended for superior flavor. Pkt., 9c; V.G.B.P., 18c; oz., 55c; ¼ lb., \$1.75.

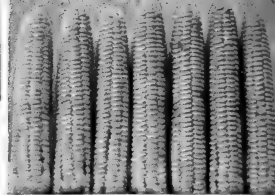

663 New Stone. An old reliable home garden type. Very productive, fruits large, smooth, attractive scarlet-red, of fine flavor. Pkt., 10c; V.G.B.P., 15c; oz., 35c; ¼ lb., \$1.00, prepaid.

671 Oxheart—A distinctively attractive variety entirely different from any other tomato. Increasing in popularity each year because of its very solid meaty fruits of a delicious sub-acid flavor, almost seedless, the fruits grow extremely large and heart shaped. Flesh is pink. A favorite of thousands for the home garden. Pkt. 10c; V.G.B.P. 22c; oz. 60c; ¼ lb. \$2.00.

**SAVE MONEY—GROW YOUR OWN PLANTS
CAN LOTS OF TOMATOES FOR YOUR DAILY DIET**

BERRY'S CORN HYBRIDS

**HYBRIDS
ARE SWEETER**

Why pay more for Hybrid sweet corn? Because Hybrids outyield open pollinated varieties, have large more uniformly shaped and filled ears, are sweet (actually contain more sugar), and Hybrids are disease resistant. You don't throw away half your crop because smut is in the ears when you plant Hybrids.

Plant early, midseason and late varieties on the same day. This will give you a succession with less labor.

**HYBRIDS ARE
MORE UNIFORM**

EARLY SPANCROSS

**64¢
LB.**

70 Days from planting to eating. An extra early golden

Hybrid with cold resistance. Can be planted in April in all but the most northern states. Medium sized ears—short stalks. No. 291X—Pkt. 15c; ½ lb. 34c; 1 lb. 64c; 2 lbs. \$1.19 Postpaid.

EARLIGOLD

**66¢
LB.**

Berry's "Best Early" Yellow Sweet Corn

72 days from planting to eating. A good sized extra early variety growing 5½ to 6 feet tall. Ears are uniform, 12 to 16 straight rows well filled tips, 6½ to 7 inches long. Extra fine quality. No. 280X—Pkt. 15c; ½ lb. 35c; 1 lb. 66c; 2 lbs. \$1.23; Postpaid.

MIDSEASON GOLDEN CROSS

**64¢
LB.**

80 days from planting to eating. A main crop variety that has proved its value over a number of years. Grows 6 feet tall, produces two or more ears per stalk. Ears 8 inches long, 10 to 14 rows, very uniform in size and shape. No. 276X—Pkt., 15c; ½ lb., 34c; 1 lb., 64c; 2 lbs., \$1.19, Prepaid.

**60¢
LB.**

81 days from planting to eating. An outstanding main crop variety, grows 6½ to 7 feet tall. Produces best quality fodder. Ears 7 to 8 inches long with 10 to 14 rows. Highest eating quality. A dandy for the farm garden. No. 275X—Pkt., 15c; ½ lb., 32c; 1 lb., 60c; 2 lbs., \$1.10, Postpaid.

**66¢
LB.**

83 days from planting to eating. A main crop "All American Winner" producing especially attractive ears. Grows 6½ feet tall with good drought resistance and few suckers. Ears are 8 inches long with 12 to 14 rows, very uniform, cylindrical, and well filled. Exceptionally sweet and well flavored. A really outstanding golden variety. No. 282X—Pkt., 15c; ½ lb., 35c; 1 lb., 66c; 2 lbs., \$1.23, Postpaid.

**67¢
LB.**

85 days from planting to eating. A new main crop variety with unusual qualities. Drought tolerant, stiff-stalked plants grow 7 to 7½ feet tall. Produces one 7½-inch, 12 to 14 rowed ear with husks so tight that ear worm damage is very small. If you are troubled with wormy corn plant this beautiful golden No. 283X—Pkt., 15c; ½ lb., 36c; 1 lb., 67c; 2 lbs., \$1.25, Postpaid.

**58¢
LB.**

Berry's 12 Row Hybrid Blend

A combination of 12 row hybrids with same plant heights and that mature at different times. Enjoy hybrid quality over a long picking period of at least two weeks by planting this blend. No. 286X—Pkt., 15c; ½ lb., 31c; 1 lb., 58c; 2 lbs., \$1.05, postpaid.

Regular Sweet Corn Prices, Page 55

LATE NARROW GRAIN

**72¢
LB.**

90 days from planting to eating. One of the most dependable and productive hybrids. Stalks grow 8 feet tall and produce two large ears. An excellent fodder corn. Ears are 8 inches long with 18 rows of large white deep kernels. Probably the best in white sweet corn for general use. No. 293X—Pkt. 15c; ½ lb. 38c; 1 lb. 72c; 2 lbs. \$1.34 Postpaid.

STOWELL'S Evergreen Hybrid

A Favorite Variety at Its Best

**69¢
LB.**

Of many hybrids developed of the Stowell's type, we have selected this as the best. It gives you unsurpassed Stowell's quality and increased yields. It is vigorous and highly resistant to disease, wind and drought. Plant successively at one week intervals. No. 279X—Pkt., 15c; ½ lb., 36c; 1 lb., 69c; 2 lbs., \$1.29, postpaid.

RAISE MORE For VICTORY

Plant Our Victory Garden Bulk Packages

This second World's War promises to last longer than the first. Victory will come to the "survival of the fittest," and the more we prepare today the quicker Victory will come tomorrow. In all our plans for victory, our united action as individuals will write the verdict.

Every American can answer the call to arms right at home. Let us unite 100% behind our War Council in their request for more and bigger town and farm gardens. It will not only mean better health for us but a home garden saves immensely on living costs. The better health we enjoy as individuals, and the more self-sufficient we become in our own food requirement—the stronger we become as a Nation.

Berry's give everyone an equal opportunity to participate in this widespread War Garden Promotion by offering new large sized Packages "Victory Garden" at the year's lowest prices.

MORE SEED FOR LESS MONEY

The most economical way to order garden seeds is in bulk—you get the most value for your money. With seed supplies short though we don't want to order more than we need and waste any.

The regular sized packets which usually sell for 5 to 10c each at the higher price of garden seeds today don't contain enough seed to plant a larger garden than we all need. We, therefore, offer Victory Garden Bulk Packages which at slight additional cost may contain several times as much seed as smaller packets. They contain just as much value as our larger bulk units which we know you will find will save you money.

We recommend only V.G.B.P. or larger units be ordered on all vegetables telling you on each vegetable how much 1 V.G.B.P. will plant and how many V.G.B.P. the average family needs to have enough to eat the year round. Study this valuable information at the top of most pages 54-66 inclusive. First though refer again to our Special War Garden Collections on page 48, and below.

BERRY'S GUARANTEE SATISFACTION

Berry's have long been known to thousands of garden seed buyers for their superior quality. We are one of the oldest and largest mail order seed houses serving thousands of new customers each year. Laboratory-tested quality to thousands of old customers who order of us each year has meant gardening satisfaction from quick germinating, strong vigorous growing seeds that produce better quality vegetables.

Our customers' complete satisfaction over many years is probably the most important test given our seeds. We guarantee our garden and flower seeds to grow. If they fail to do so due to poor germination we will replace the seed free of charge.

We guarantee safe arrival of every order to you. It is easy to order by mail as you get free delivery—planting instructions—and everything to make it easy for you to raise a big garden with little effort. We ship all orders promptly but don't delay—mail yours today.

FAMILY WAR GARDEN

Single Collections \$4.20 each, Prepaid

Here is a garden planting designed to give you an abundance of delicious crisp fresh vegetables. There is a lot of difference, you know, in varieties. The ones chosen for this list were picked for their fine quality, excellent flavor, heavy production, as well as for storing and canning purposes. These kinds and varieties. Have proved their reliability and are favorites with most of our customers.

Fresh vegetables in stores will be scarce because of transportation problems. Canned vegetables will be definitely short because of military needs and exports to Europe. Don't get caught short of food. You can have it in great abundance and

in finer quality if you grow it at home from this great collection.

Help win the war in your own back yard, by getting this Family War Garden. We must guard our health in times like these, for doctors are scarce and sickness stops work. Help our boys fight by eating right.

In spite of vegetable seed scarcity our price is low, and at \$4.20 this assortment is a great bargain. Order yours at once while they are still available. Get your neighbors to join in ordering and take advantage of the quantity price: \$4.10 in lots of 8 or more.

A Good Insecticide Means More and Better Vegetables BUG-DUST-O-CIDE AT PREPAID PRICES

This is a powerful combination of Rotenone, Lethane Cuproside and Nicotine. It has a triple action on certain insects—as a stomach poison, a contact poison, and as a repellent. It is non-poisonous to humans and domestic animals when used as directed. Bug-Dust-O-Cide controls aphids, bean beetles, flea beetles, leaf hoppers, cabbage worms, cucumber beetles, potato beetles, and certain other insects. Bug-Dust-O-Cide also controls certain plant diseases. Try it on mildew or other fungus diseases.

- 100 lb. Bag Bug-Dust-O-Cide—\$20.00.
- Empty Fiberboard Dusters—25c each.

ORDER SEVERAL VICTORY GARDEN BULK PACKAGES

BERRY'S GARDEN BEANS *Famous for Their Tested Quality*

Beans, Peas and Sweet Corn require a large part of your total gardening space. Therefore in connection with Beans and Sweet Corn on these two pages also refer to pages 62-63 for Peas. In planning how much room you need figure an average family of 5 persons for the quantities shown in our "Lucky 7" Collection, page 49, or a total of 5½ pounds.

Garden Inoculation for All Beans and Peas

Inoculate your bean and pea seed this year and get the added benefits these nitrogen supplying bacteria will give to your legumes. Uni-Culture inoculation is prepared for all garden legumes. Beans, Peas, Sweet Peas, Edible Soy Beans, and Lupines can all be inoculated from the same package. A 10c package will inoculate up to 10 pounds of seed. You can't make your treatment too strong since Uni-Culture is not harmful to seed.

No. N-10—Will inoculate up to 10 lbs., 10c, postpaid.

GREEN PODDED BUSH BEANS

136 Full Measure. A round pod stringless variety very desirable for canning. Produces a large crop with very fleshy straight pods 6 to 6½ inches long. 54 days from planting to picking. ½ lb., 21c; 1 lb., 37c; 3 lbs., \$1.00, postpaid.

116 Tendergreen. (See picture at right.) Hardy and prolific. Light green pods 7 in. long are round, meaty, tender, stringless. For the home garden, canners or truckers. Postpaid: ½ lb., 19c; 1 lb., 34c; 3 lbs., 92c.

134 Burpee's Stringless Green Pod. The old favorite garden bean for home, market or canning. Plants sturdy, very prolific. Pods round, fleshy, perfectly stringless and of excellent quality. Postpaid: ½ lb., 18c; 1 lb., 33c; 3 lbs., 90c.

132 New Bountiful. An extra early green podded variety ready to pick in six weeks. Vines vigorous and productive. Brittle, meaty and tender, absolutely stringless, and of fine flavor. Postpaid: ½ lb., 20c; 1 lb., 35c; 3 lbs., 95c.

133 Giant Stringless Green Pod. One of the favorite stringless podded sorts. Pods round, meaty, brittle. Stringless throughout entire growth. Heavy producer. Postpaid: ½ lb., 19c; 1 lb., 34c; 3 lbs., 92c.

125 Tennessee Green Pod. One of the earliest snap beans, pods long, flat, dark green, of excellent flavor. Plants hardy and productive. Postpaid: ½ lb., 19c; 1 lb., 34c; 3 lbs., 92c.

Stowell's Evergreen

BEETS OF QUALITY

CHOICE TABLE BEETS

Beets should be planted both in Spring and Fall. Will keep fine stored in pit or may be canned. One V.G.B.P. will plant 25 feet of row. Plant about 1½ inches deep about 2 inches apart in row. Make several plantings about one week apart. Average person requires 10 pounds per year—1 V.G.B.P.

156 Berry's Early Blood Red Beet. Very early, thrives anywhere, deliciously crisp and tender, good uniform size. (Pictured, described more fully page 50.) Postpaid: Pkt., 15c; V.G.B.P., 22c; oz., 32c; ¼ lb., 88c; ½ lb., \$1.70; 1 lb., \$3.25.

154 Early Blood Turnip. (Pictured at right.) Excels in flavor and appearance. A medium early variety, roots top shaped, dark red, retaining color even when cooked. Sweet and crisp. Matures quickly but is a splendid keeper. Postpaid: Pkt., 5c; V.G.B.P., 18c; oz., 30c; ¼ lb., 81c; 1 lb., \$3.00.

168 Detroit Perfected. A superb beet that is tender and sweet at all stages of growth. This is an improvement over Detroit Dark Red. Smooth globe shaped with small top root and beautiful dark red flesh, splendid for dicing. An all American Selection. Pkt., 5c; V.G.B.P., 20c; oz., 32c; ¼ lb., 88c; 1 lb., 3.25, postpaid.

155 Crosby's Egyptian. An extra early variety preferred by market gardeners, splendid for bunching. Roots globe shaped, slightly flattened, with small tap root. Finest quality, tender and sweet. Flesh purplish-red. Postpaid: Pkt., 5c; V.G.B.P., 18c; oz., 30c; ¼ lb., 81c; 1 lb., \$3.00.

157 Detroit Dark Red. The outstanding variety for home use, truck gardeners, and canning. Fine quality, tender and sweet. Roots perfectly round. With small tap root, uniform. Flesh dark red with slight zone. Postpaid: Pkt., 5c; V.G.B.P., 19c; oz., 31c; ¼ lb., 84c; 1 lb., \$3.15.

167 Berry's Early Wonder. (Pictured at right.) This wonderful early beet is the result of years of reselecting and improving. For earliness it can't be beat. Very uniform in growth, root globular in shape. Postpaid: Pkt., 5c; V.G.B.P., 18c; oz., 30c; ¼ lb., 81c; 1 lb., \$3.00.

158 Swiss Chard. Makes continuous greens of delicious flavor throughout the summer. Grows anywhere. Plant from early spring till July. Postpaid: Pkt., 5c; V.G.B.P., 15c; oz., 20c; ¼ lb., 60c; 1 lb., \$2.00.

159 Swiss Chard—Fordhook Giant. This variety is more popular every year. Grows larger than common Swiss Chard and has exceptional fine quality and flavor. Pkt., 5c; V.G.B.P., 19c; oz., 24c; ¼ lb., 68c; 1 lb., \$2.40, postpaid.

Early Blood Turnip Beet

The Victory Garden Program calls for more food. The average family should plant at least 3 V.G.B.P. of Beets.

MANGELS AND SUGAR BEETS

Stock Feeders—Raise Mangels

The average yield of mangels per acre is 30 tons. Aside from the minimum feeding value of \$2.50 per ton, the mangel is a regulator that keeps stock in the best health.

Mangels are very easily grown. A loose or sandy loam type of soil is best to grow mangels on. Drill about 6 pounds of seed per acre in rows 2 feet apart. Cultivate right after planting down the drill rows.

The following 3 varieties postpaid: Oz., 20c; ¼ lb., 60c; 1 lb., \$2.00; 5 lbs., \$9.40.

162 Mammoth Long Red. Heaviest yielding and largest of mangels. Flesh pink tinged.

160 Golden Tankard. Very large size and easily lifted. Skin deep orange, flesh yellow with white zones.

166 Giant Half Sugar. Heavy yielder, valuable for feeding. Flesh white, with good sugar content. Grows half out of the ground, making it easy to harvest.

Berry's Early Wonder Beet
(Described at left)

CELERY

251 White Plume. Earliest of all. A favorite for the table because of crisp tender quality. Stalks are uniformly large and solid. Pkt., 10c; V.G.B.P., 40c; oz., 50c; ¼ lb., \$1.50, postpaid.

253 Giant Pascal. An excellent variety for fall and winter use. Large, thick, crisp, stringless stalks with a delicious nut-like flavor. Blanches to a beautiful yellowish-white. Pkt., 10c; V.G.B.P., 35c; oz., 45c; ¼ lb., \$1.35, postpaid.

252 Golden Self Blanching. Most desirable for truckers. Stalks heavier than white varieties blanching into a rich golden yellow. Fine quality, crisp, tender, free from strings. Postpaid: Pkt., 10c; V.G.B.P., 50c; oz., 60c; ¼ lb., \$1.80, postpaid.

255 Celeriac or Turnip-rooted Celery. Roots nearly globe-shaped, are used for flavoring soup, stews, etc. Postpaid: Pkt., 10c; V.G.B.P., 35c; oz., 45c; ¼ lb., \$1.35, postpaid.

White Plume Celery

ASPARAGUS

SEED AND ROOTS

101 Washington Rust Proof. Preferred by market gardeners because of freedom from disease. A large straight luscious stalk with firm tips of finest quality. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 12c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.10.

TWO YEAR

Asparagus Roots. 25 for 98c; 50 for \$1.85; 100 for \$3.50; 500 for \$15.00, postpaid.

Other Asparagus and Rhubarb Roots, Page 76.

CABBAGE

Golden
Acre

LATE VARIETIES

186 Premium Late Flat Dutch. Excellent for home and market garden use. Very solid, large, flat heads, 6 to 7 inches deep. High quality. Deserves its wide popularity. **Postpaid: Pkt., 10c; V.G.B.P., 40c; oz., 63c; ¼ lb., \$1.68; ½ lb., \$3.15; 1 lb., \$6.25.**

187 Drumhead Savoy. Popular for its tasty flavor. Sweeter than ordinary cabbage. Has crinkled leaves. Round ball-like heads are very heavy. An excellent keeper. **Postpaid: Pkt., 10c; V.G.B.P., 48c; oz., 71c; ¼ lb., \$1.90; ½ lb., \$3.55; 1 lb., \$7.10.**

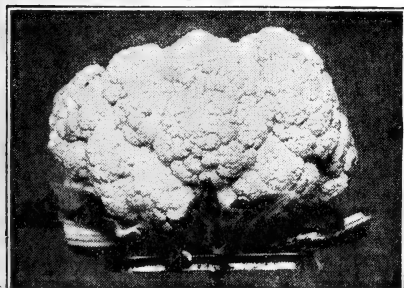

191 Danish Ballhead. A superior variety, one of the finest late cabbages. Extremely hard heads, 8 to 9 inches across. Desirable for shipping, storage, and kraut. **Pictured at right. Postpaid: Pkt., 10c; V.G.B.P., 48c; oz., 71c; ¼ lb., \$1.90; ½ lb., \$3.55; 1 lb., \$7.10.**

CELERY OR CHINESE CABBAGE

175 Celery or Chinese Cabbage. Most popular for the home garden. Cylindrical, tapering heads. Crisp and tender. Plant during July-August. Makes fine chicken feed. **Postpaid: Pkt., 10c; V.G.B.P., 40c; oz., 63c; ¼ lb., \$1.68; ½ lb., \$3.15; 1 lb., \$6.25.**

CAULIFLOWER

Choicest Imported Seed

Danish Giant

220 Early Snowball. Most widely used early variety, especially valuable for market. Dwarf habit. A sure header, medium size. Delicious, white and tender. **Postpaid: Pkt., 10c; ¼ oz., \$1.25; ½ oz., \$2.25; oz., \$4.00.**

Cabbage is of vital importance in our Health and Nutrition Program for Victory. Rich in Vitamin C when eaten raw. Can be grown over a long season. Plant seed in hills for plants outdoors as early as possible, cover lightly about ½ inch. Plant both early and late varieties. Order at least 2 V.G.B.P. to have plenty for a daily diet. One person needs about 50 pounds a year. Used more often in a health diet than any other vegetable except Potatoes and Tomatoes.

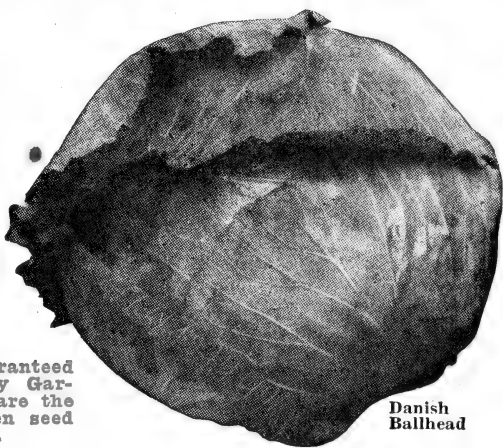

EARLY VARIETIES

180 Berry's Earliest Cabbage. The best for earliness, quality and productiveness. **Postpaid: Pkt., 15c; V.G.B.P., 25c; oz., 80c; ¼ lb., \$2.40.**

179 Golden Acre. A new variety, sure header; heads round and very solid, few outer leaves. Used by truckers for earliest markets. **Postpaid: Pkt., 10c; V.G.B.P., 50c; oz., 71c; ¼ lb., \$1.90; ½ lb., \$3.55; 1 lb., \$7.10.**

176 Early Jersey Wakefield. Small compact conical heads, broad base. Few leaves permitting close planting. A favorite of market gardeners and shippers. **Postpaid: Pkt., 10c; V.G.B.P., 45c; oz., 66c; ¼ lb., \$1.75; ½ lb., \$3.55; 1 lb., \$6.65.**

182 Copenhagen Market. Finest round-headed early cabbage. Heads uniform, solid, excellent quality. Few outer leaves. Short stem. Desirable likewise for early kraut. **Postpaid: Pkt., 10c; V.G.B.P., 50c; oz., 70c; ¼ lb., \$1.85; ½ lb., \$3.50; 1 lb., \$6.95.**

Danish
Ballhead

Our seeds are guaranteed satisfactory. Victory Garden Bulk Packages are the year's biggest garden seed values. See page 53.

181 Early Flat Dutch. A strain popular with market and home gardeners. Heads almost round, good solid quality, weigh about 5 lbs. **Postpaid: Pkt., 10c; V.G.B.P., 43c; oz., 63c; ¼ lb., \$1.68; ½ lb., \$3.15; 1 lb., \$6.25.**

YELLOWS DISEASE RESISTANT VARIETIES

The most destructive and widespread cabbage disease found in all sections east of the Rocky Mountains. "Yellows" is caused by minute organisms living in the soil indefinitely that thrive on living cabbage plants. The only control is to grow varieties that have been developed and are proven to be "Yellows Resistant."

174 Marion Market. Heads are almost round, very solid. Similar to Copenhagen Market but about 10 days later. **Postpaid: Pkt., 10c; V.G.B.P., 60c; oz., 80c; ¼ lb., \$2.20; ½ lb., \$4.00; 1 lb., \$8.00.**

183 Jersey Queen. 55 days. Selected from Jersey Wakefield with which it remains identical in type and season. Leaves smooth and dark green. Heads pointed small and compact, permitting close planting. **Postpaid: Pkt., 10c; V.G.B.P., 56c; oz., 76c; ¼ lb., \$2.10; ½ lb., \$3.80; 1 lb., \$7.60.**

BETTER SEED MEANS BETTER GARDENS

TABLE CARROTS

Carrots are vital to health. Rich in Vitamin A, also B₁ and C. They have a wide variety of uses in meal plannings, can be eaten raw from gardens, stored in pits or canned. The average family should plant 1½ ounces of seed or 150 feet of row half in the spring, half in the fall. Cover seed only a fraction of an inch.

203 Emperor. 77 days. An unusually fine variety. An All American Selection that does particularly well where soil is a deep sandy loam. Roots are smooth slightly tapering to a stump-rooted tip, smooth, rich orange color, very little core, crisp, and of fine sweet flavor. Exceptionally attractive for bunching. Postpaid: Pkt. 10c; V.G.B.P. 24c; oz. 36c; ¼ lb. \$1.05; ½ lb. \$1.95; 1 lb. \$3.75.

201 Oxheart. A short thick variety, best for heavy soil where it can be easily lifted. Roots orange-scarlet, about five inches in length; very heavy yielder. Postpaid: Pkt. 10c; V.G.B.P., 19c; oz., 29c; ¼ lb., 85c; ½ lb., \$1.55; 1 lb., \$2.95.

204 Danvers Half Long. None better for home gardens or market. Flesh bright orange in color and very tender. Grows six to seven inches long, tapered. Very productive. Postpaid: Pkt., 10c; V.G.B.P., 21c; oz., 32c; ¼ lb., 95c; ½ lb., \$1.75; 1 lb., \$3.25.

205 Chantenay. A fine sort for bunching, market or home gardens. About 6 inches long, stump rooted, deep orange in color. A heavy yielder. Postpaid: Pkt., 10c; V.G.B.P., 24c; oz., 33c; ¼ lb., \$1.05; ½ lb., \$1.95; 1 lb., \$3.75.

212 New Coreless Carrot. The greatest improvement made on any vegetable in years. Fine flavor, tender, and sweet. Early, uniform size. Postpaid: Pkt., 10c; V.G.B.P., 27c; oz., 39c; ¼ lb., \$1.15; ½ lb., \$2.10; 1 lb., \$3.95.

STOCK CARROTS

206 Long Orange. Suitable for stock or table use. Roots red-orange, tapered to a point. A good winter keeper. Oz., 30c; ¼ lb., 90c; ½ lb., \$1.70; 1 lb., \$3.15.

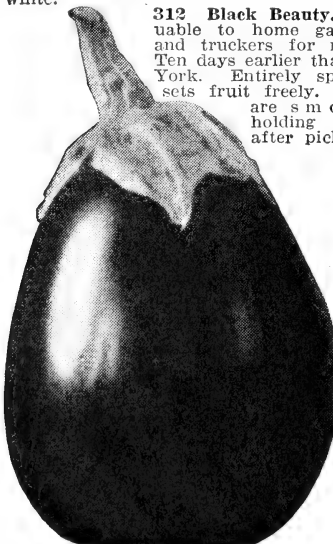

208 Mastodon. Flesh white, crisp, solid, very sweet in flavor. Roots frequently measure 15 to 20 inches in circumference. A heavy yielder. Oz., 24c; ¼ lb., 75c; ½ lb., \$1.36; 1 lb., \$2.40.

EGGPLANT

These two varieties postpaid: Pkt. 10c; V.G.B.P., 24c; ¼ lb., \$1.50; ½ lb., \$2.50; 1 lb., \$1.50.

310 Improved New York Purple. Our strain of this leading market variety is unsurpassed. Skin glossy black purple, flesh white.

312 Black Beauty. Valuable to home gardeners and truckers for market. Ten days earlier than New York. Entirely spineless, sets fruit freely. Fruits are smooth, holding well after picking.

CUCUMBER

Special Pickling Cucumber. Available in regular size packets only—15c each.

225 Berry's Champion Pickler. The best variety for home gardens. Excellent for slicing and pickling. Fruits dark green in color, uniform in size, straight and smooth. We recommend this variety very highly. Postpaid: Pkt., 15c; V.G.B.P., 24c; ¼ lb., 75c; ½ lb., \$1.35; 1 lb., \$2.50.

226 National Pickling. The finest early pickling type slightly larger than Early Green Cluster. Uniformly smooth and cylindrical with well rounded ends. Flesh thick preventing splitting in the center and hollow sides in the pickles. Size 7x3 inches, 1¼ pounds. Postpaid: Pkt. 5c; V.G.B.P., 15c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$2.00.

228 Chicago Pickle. One of the most popular pickling varieties; also good for slicing. Mid-season. Fruits medium green, uniform in size. Postpaid: Pkt., 5c; V.G.B.P., 15c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$2.00.

229. Early Fortune. 60 days. An excellent home or market garden variety. Very prolific, uniform, and attractive. Fine slicing or dill pickles. Holds its firmness and dark green color for a long time. Pkt. 5c; V.G.B.P. 15c; oz., 21c; ¼ lb., 65c; ½ lb., \$1.15; 1 lb., \$2.20.

232 Snows Perfection. 54 days. A fine pickling variety. Blunt ends and blocky shape even when small. Extremely productive. Pkt., 5c; V.G.B.P., 15c; oz., 21c; ¼ lb., 65c; ½ lb., \$1.15; 1 lb., \$2.20.

233 Boston Pickler. Very early and prolific; uniform size, slightly tapered, weigh about 1½ lbs. Dark green. Fine for table. Postpaid: Pkt., 5c; V.G.B.P., 15c; oz. 20c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$2.00.

234 Improved White Spine. Vigorous and productive, fruit uniform, seven to nine inches long, very showy. Postpaid: Pkt., 5c; V.G.B.P., 15c; oz. 20c; ¼ lb., 60c; ½ lb., \$1.05; 1 lb., \$2.00.

239 Straight 8. The highest award winner of the All-America trials in 1935. The best new cucumber. Fruits are of excellent quality, uniform size, dark green color. About 8 inches long, 2 inches wide. Vines vigorous and productive. Ideal for the home garden, local market, or shipping. Postpaid: Pkt., 5c; V.G.B.P., 18c; oz., 25c; ¼ lb., 72c; ½ lb., \$1.30; 1 lb. \$2.50.

236 Improved Long Green. Standard late variety. Splendid for slicing, excellent quality. Fruits dark green, weigh 3 to 3½ lbs., flesh white, firm and crisp. Postpaid: Pkt. 5c; V.G.B.P., 18c; oz., 25c; ¼ lb., 72c; ½ lb., \$1.30; 1 lb., \$2.50.

231 White Wonder. 58 days. A distinct variety grown for its novel pure white color. Fine for pickles or slicing. Grows about 7 inches long, blocky shape with rounded ends, pure white at all stages. Pkt., 5c; V.G.B.P., 15c; oz. 21c; ¼ lb. 65c; ½ lb., \$1.15; 1 lb., \$2.20.

POP CORN

WHITE JUMBO POP CORN

The New Giant Pop Corn No. 305

Here is something new and different in pop corn. Everyone who likes pop corn should be sure to grow some of it. Great big creamy white grains that pop into immense, crispy, delicious, snowy white puffs. Kernels as big or bigger than the South American but white instead of yellow in color.

This sensational white Jumbo was developed by an Iowa farmer and is just now being released to the public. Now is the time to start. Sell what you don't need for popping to your neighbors for seed. Produces tremendous yields—grows from Minnesota to the Gulf and from the Rockies to the Atlantic. Grows up to 7 feet.

Be sure to get started this year and have something extra fine in the newest thing out. Pkt., 10c; ½ lb., 20c; 1 lb., 35c, postpaid.

304 South American. (Dynamite.) Kernels are yellow, pop to immense size. Stalks grow larger than field corn, with two or three ears on a stalk. Popped corn has a rich cream color, flavor is excellent. Pkt., 10c; ½ lb., 18c; 1 lb., 30c, postpaid.

303 White Hull-less. Dwarf grower, small ears. Kernels hull-less, snowy white when popped; very tender, finest flavor. An old favorite with thousands of our customers. Pkt., 10c; ½ lb., 18c; 1 lb., 30c, postpaid.

Berry's Champion
Pickle Cucumber

ONION SEED and ONION SETS

NEW CROP—HIGH GERMINATION

Grow your yearly supply of Onions from seed. A profitable crop for your own use or for sale. Yields of from 500 to 600 bushels per acre are possible. This crop can be grown in any state. Write to your State Horticulture Department for best growing instructions for your region. Buy your seed from Berry's and get New Crop High Germinating Seed in the varieties best suited to your region. Sow 2½ to 3 lbs. per acre or 1 oz. per 100 feet of row. Thin out so plants stand 2 to 3 inches apart.

Onion is an important vegetable to good health. One ounce will plant 100 feet of row the need of an average family. We suggest raising some onions from seed, plants and sets. Sets are best for early green onions, plants produce the later milder varieties.

YELLOW VARIETIES

431 Early Yellow Globe—95 days. Matures 2 to 3 weeks earlier than other yellow globe varieties. This is a fine globe shaped onion with a beautiful yellow skin and pleasingly flavored light cream flesh. An excellent keeper. **Pkt., 10c; V.G.B.P., 30c; oz., 55c; ¼ lb., \$1.60; ½ lb., \$2.90; 1 lb., \$5.50, postpaid.**

435 Yellow Globe Danvers—105 days. A splendid variety for home gardens and market. Nearly globe shaped with pure yellow skin, white flesh, and mild flavor. Very productive with fine keeping qualities. **Pkt., 10c; V.G.B.P., 30c; oz., 55c; ¼ lb., \$1.60; ½ lb., \$2.90; 1 lb., \$5.50, postpaid.**

436 Southport Yellow Globe—115 days. Usually grown for commercial purposes. A large, mild, white fleshed type with rich yellow color. An excellent keeping onion (pictured at bottom of page). **Pkt., 10c; V.G.B.P., 30c; oz., 55c; ¼ lb., \$1.60; ½ lb., \$2.90; 1 lb., \$5.50, postpaid.**

437 Brigham Yellow Globe—115 days. Also called Michigan Yellow Globe. This is a fine onion noted for its long keeping qualities. A very heavy dark yellow skin and pleasing flavor, with high yielding ability make this a fine main crop shipping and storing onion. **Pkt., 10c; V.G.B.P., 35c; oz., 60c; ¼ lb., \$1.75; ½ lb., \$3.10; 1 lb., \$6.00, postpaid.**

425 Yellow Sweet Spanish—110 days. The most popular onion grown. Golden yellow, extra large and mild, very pleasant flavored white flesh. An unusually heavy yielder. **Postpaid: Pkt., 10c; V.G.B.P., 45c; oz., 85c; ¼ lb., \$2.35; ½ lb., \$4.40; 1 lb., \$8.50.**

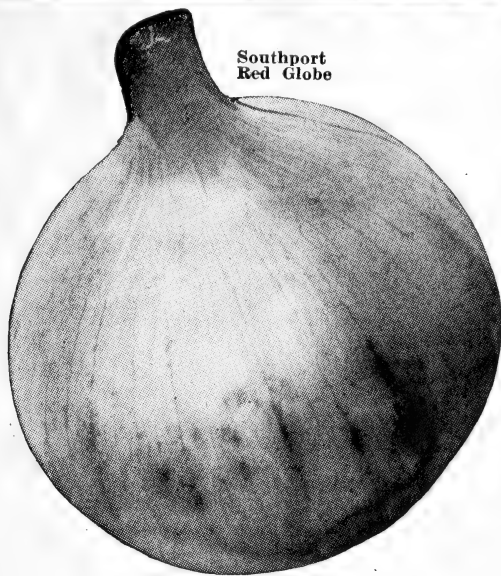

WHITE VARIETIES

434 White Sweet Spanish—110 days. The largest and mildest of all onions. Globe shaped, pure white flesh, very firm and mild. An unusual producer. **Prepaid: Pkt., 10c; V.G.B.P., 45c; oz., 85c; ¼ lb., \$2.35; ½ lb., \$4.40; 1 lb., \$8.50.**

440 White Bermuda or Crystal Wax—93 days. Clear white, mild, delicate flavored large flat onion of superior quality. You can grow Bermudas from seed. **Prepaid: Pkt., 10c; V.G.B.P., 40c; oz., 70c; ¼ lb., \$2.15; ½ lb., \$3.65; 1 lb., \$7.00.**

433 Southport White Globe—

Southport
Red Globe

110 days. A splendid commercial onion, attractive in color, size and shape. A smooth globe type, flesh mild, fine grained and tender. A very heavy producer. **Prepaid: Pkt., 10c; V.G.B.P., 40c; oz., 85c; ¼ lb., \$2.35; ½ lb., \$4.40; 1 lb., \$8.50.**

441 White Portugal or Silverskin—100 days. The most widely used white onion. This all purpose variety can be used for sets, pickling, green bunching or storage. Bulbs are medium size, flat, clear white, hard, fine grained, and of pleasing flavor. At pickling stage bulbs are small, smooth and round. Raise your own this year. **Postpaid: Pkt., 10c; V.G.B.P., 40c; oz., 65c; ¼ lb., \$1.85; ½ lb., \$3.40; 1 lb., \$6.50.**

RED VARIETIES

432 Southport Red Globe—110 days. The finest of the red onions. Good for sets or storage. Uniform in size, handsome perfect globe shaped. An excellent keeper. Skin glossy red, flesh white, fine grained and tender. **Postpaid: Pkt., 10c; V.G.B.P., 27c; oz., 55c; ¼ lb., \$1.60; ½ lb., \$2.90; 1 lb., \$5.50.**

426 Red Wethersfield—100 days. Large flattened bulbs with purplish red skin, flesh white with pink tinge, very firm. One of the best keepers, an excellent commercial variety. **Postpaid: Pkt., 10c; V.G.B.P., 27c; oz., 55c; ¼ lb., \$1.60; ½ lb., \$2.90; 1 lb., \$5.50.**

FINEST GROWN ONION SETS

Produce Larger Onions of Highest Quality

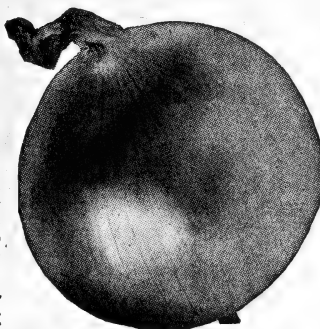

Our onion sets are Colorado grown. This means they are produced under the most ideal conditions. Berry's sets are long keepers, uniform in size and of finest quality. We guarantee delivery of your set order free from sprouts.

GARLIC SETS

448 Garlic Sets. A bulbous root of the onion type, easily grown, used for flavoring. When leaves turn yellow, dig and dry in shade. **Postpaid: ½ lb., 32c; 1 lb., 60c.**

Yellow Sweet Spanish

Southport Yellow Globe

MUSK MELONS

Musk melons are rich in vitamins—an excellent health food. They thrive under varied conditions and soils. Plant in hills six feet apart each way or if in drills have six feet between rows and thin plants to 12 inches in the row. Plant thick and thin out after plants are up. The average family needs at least 1 ounce which will plant 100 hills or drill 200 feet of row.

SALMON FLESHED

402 Berry's Favorite. (Center Picture.) A large size melon with quality equal to any. Early, luscious flavored, finest eating qualities for the home garden. Size about 6¾ by 7¾ inches, weighs about 6¾ pounds. Prominent ribs, good netting. **Postpaid: Pkt., 15c; V.G.B.P., 22c; oz., 29c; ¼ lb., 85c; ½ lb., \$1.50; 1 lb., \$2.75.**

407 Benders Surprise—90 days. An extra large deliciously flavored melon weighing about 7 pounds. Skin hard and greenish yellow when ripe. Flesh is thick and bright salmon colored. The best of the big musk melons. You'll really enjoy this one. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 55c; ½ lb., \$1.00; 1 lb., \$1.80.**

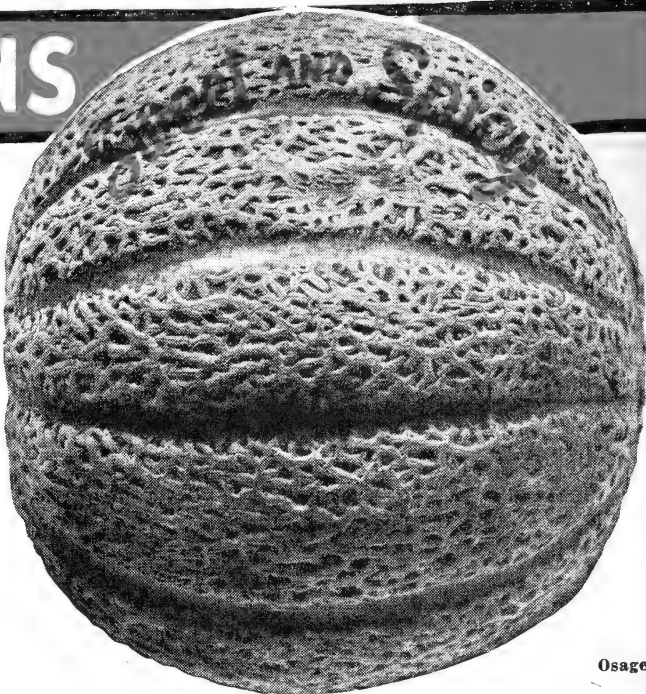

420 Hales Best #36—80 days. An outstanding shipping and market variety. Fruits 3 to 4 pounds. Very thick deep salmon colored flesh with a sweet aromatic flavor and fine texture. The most popular muskmelon grown. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 55c; ½ lb., \$1.00; 1 lb., \$1.80.**

414 Imperial #45—Mildew Resistant—87 days. A Hales Best type with resistance to powdery mildew. A good keeper after ripening. A melon with unusual qualities. Thick, sweet, orange flesh. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 55c; ½ lb., \$1.00; 1 lb., \$1.30.**

411 Honey Rock—81 days. All American winner in 1933. Has been most popular for the home garden since. Very early, weighs about 4 lbs., flesh thick and very sweet. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 16c; ¼ lb., 50c; ½ lb., 90c; 1 lb., \$1.60.**

413 Hoo-doo (Hearts of Gold)—90 days. Fruits round, about 3 lbs. Very small seed cavity. Tender, juicy, sweet with delightful flavor. A superior home garden melon. **Postpaid: Pkt., 5c; V.G.B.P., 12c; oz., 25c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.**

418 Osage or Miller's Cream—95 days. The finest flavored. "Queen" of salmon fleshed melons. Exceptionally thick, tender and sweet flesh. Oval shaped fruits about 5½ pounds. A superb home garden variety. **Postpaid: Pkt., 5c; V.G.B.P., 11c; oz., 20c; ¼ lb., 50c; ½ lb., 90c; 1 lb., \$1.60.**

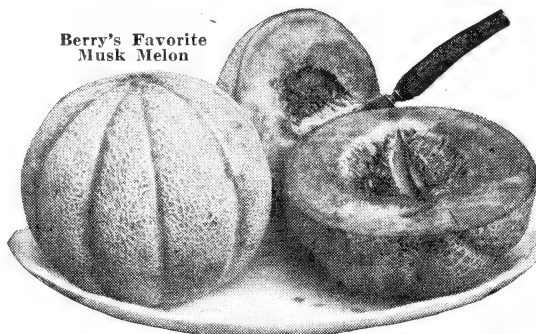

Osage

GREEN FLESHED

Musk melon seed is short this year. This applies to other vine seed crops in Colorado. We believe you will find we have the year's biggest values on all garden seeds for the Home Victory Garden. We save you \$1.00 on the Victory Garden Collection, page 53, which is adapted for every American gardener.

417 Gold Lined Rocky Ford. In delicious flavor Gold Lined far exceeds the regular Rocky Ford. It is slightly longer and a few days later. Oval in shape, small seed cavity. Flesh thick and firm. **Postpaid: Pkt., 5c; V.G.B.P., 12c; oz., 18c; ¼ lb., 55c; ½ lb., \$1.00; 1 lb., \$1.85.**

412 Extra Early Hackensack—80 days. A most popular variety for home use and truck gardening. Fruits large, globular, flattened. Flesh is thick, very sweet and spicy. **Postpaid: Pkt., 5c; V.G.B.P., 12c; oz., 25c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.**

Every family should plant as much musk melon seed as 2 V.G.B.P. to insure enough for their needs.

401 Select Rocky Ford—92 Days.—(Pictured at left). Probably the most widely grown cantaloupe. Almost round. Green flesh of delicious flavor. Fruits weigh about 2½ pounds. **Postpaid: Pkt., 5c; V.G.B.P., 12c; oz., 18c; ¼ lb., 55c; ½ lb., \$1.00; 1 lb., \$1.85.**

403 Honey Dew—112 days. Green fleshed fruits 7"x8"; skin smooth, hard, and creamy white, flesh very thick, sweet, juicy and distinctly flavored. A good keeper. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 55c; ½ lb., \$1.00; 1 lb., \$1.80.**

MUSTARD

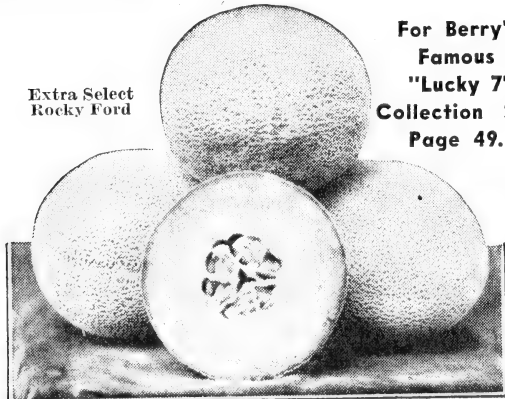

712—Tendergreen or Spinach Mustard—50 days. A quick growing variety that does not go to seed as soon as other varieties. Resistant to heat and drought. Distinctive superior flavor. Rich in vitamins and iron. **Postpaid: Pkt., 5c; V.G.B.P., 11c; oz., 15c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.**

713 Southern Giant Curled—65 days. The most popular and best known mustard for greens. Leaves long, wide, light green, heavily crumpled and curled at the edges. Best known in the South. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.**

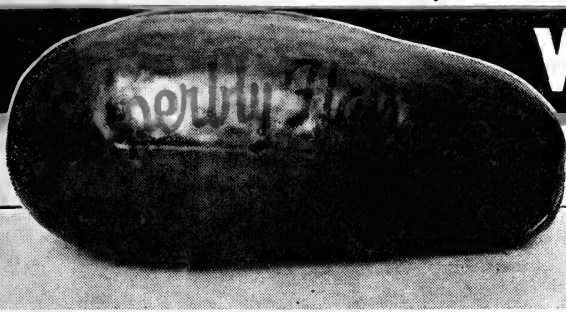

711 Florida Broad Leaf—55 days. A large upright plant with unusually large, thick, bright green, smooth leaves. A popular variety. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.**

Extra Select
Rocky Ford

WATER MELONS

Berry's Improved Kleckley Sweet

Plant in hills about 8 feet apart each way. One V.G.B.P. will plant about 15 hills. The average family if space permits should plant twice that much. Don't disturb the vines after they start to run. Don't plant until ground is warm and cover only about 1 inch. Because of long growing season required in northern states plant only early varieties.

368 Berry's Improved Kleckley Sweet. Finest melon for home and market gardens. An improved type of the old popular strain; larger and wilt-resistant. Medium early, dark green skin, with bright red flesh very tender and melting. **Postpaid: Pkt., 5c; V.G.B.P., 7c; oz., 9c; ¼ lb., 27c; ½ lb., 49c; 1 lb., 89c.**

351 Berry's Mammoth Melting Sugar. Very early for such a large melon. Sweetest; most delicate flavor of any. (Pictured page 52.) **Postpaid: Pkt., 15c; V.G.B.P., 20c; ¼ lb., 75c; ½ lb., \$1.35; 1 lb., \$2.25.**

370—Georgia Rattlesnake. A large long melon, striped light and dark green. Rind rather thick; flesh red, of good quality. Very prolific and drought resistant. **Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 12c; ¼ lb., 35c; ½ lb., 65c; 1 lb., \$1.10.**

Halbert's Honey

352—Halbert's Honey. One of the best for home and local markets; not a good shipper. Color dark green. Thin rind, rich red sugary flesh of fine texture. **Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; ¼ lb., 30c; ½ lb., 55c; 1 lb., 95c.**

355 Hawkesbury—85 days. A wilt-resistant, long, light gray melon with very good shipping qualities. About 35 pounds. Black seed, dark pink, good quality flesh. **Postpaid: Pkt., 5c; V.G.B.P., 9c; oz., 14c; ¼ lb., 45c; ½ lb., 80c; 1 lb., \$1.35.**

360 Tom Watson. Very popular shipping melon of the long type. Early; keeps well. Flesh bright red, of excellent flavor. **Postpaid: Pkt., 5c; V.G.B.P., 7c; oz., 9c; ¼ lb., 27c; ½ lb., 49c; 1 lb., 89c.**

369 Golden Honey. Dark green, medium sized, long oval shape. Cream colored flesh which is very tender and delicious. **Pkt., 5c; V.G.B.P., 12c; oz., 17c; ¼ lb., 55c; ½ lb., 95c; 1 lb., \$1.75.**

353 Coles Early—75 days. A leading home garden variety for the North. Weight about 20 pounds. Red Flesh. Black Seeds. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 12c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.**

377 Stone Mountain. Light veined with dark green. Fruits round, weigh about 45 lbs. Flesh rich red of fine texture, tender, sweet, luscious. (See picture at right.) Wilt-resistant. **Postpaid: Pkt., 5c; V.G.B.P., 9c; oz., 12c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.**

Berry's "Sweet As Honey" Melons

Just enough seed in our best varieties to insure favorite melons over a longer season. Plant all at same time. 1 V.G.B.P. Golden Honey, Dixie Queen and Berry's Mammoth Melting Sugar—regular price 42c—No. 380—only 32c, postpaid.

374 Dixie Queen. A recent introduction of finest quality. Early, it attains an average size of 15x12½ inches, weight 32 pounds. Color light green striped with darker green. Flesh dark pink with very few seeds—white. Deliciously flavored. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; ¼ lb., 45c; ½ lb., 75c; 1 lb., \$1.35.**

375 Mixed. Finest for the boy's melon patch. Old favorite varieties—something to please everybody. 25c for ¼ lb. will pay big returns. Will plant 120 hills of about 15 varieties. **Postpaid: Pkt., 5c; V.G.B.P., 6c; oz., 10c; ¼ lb., 25c; ½ lb., 45c; 1 lb., 75c.**

357 Harris Earliest. Extra early, ready to pick in about 80 days, melons weigh about 20 pounds. Very red, firm flesh, of most delicious flavor. Fruits round, dark green striped with light green. **Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 12c; ¼ lb., 35c; ½ lb., 65c; 1 lb., \$1.10.**

358 Sweetheart. Vines vigorous and productive. Fruits large, oval. Rind thin, flesh bright red, firm, sweet and tender. A very fine shipper. **Postpaid: Pkt., 5c; V.G.B.P., 7c; oz., 9c; ¼ lb., 27c; ½ lb., 49c; 1 lb., 89c.**

371 Winter Queen. A melon of finest quality that will keep until Christmas. Nearly round, pale yellow. Flesh is bright red and sweet as honey. **Postpaid: Pkt., 5c; V.G.B.P., 11c; oz., 16c; ¼ lb., 50c; ½ lb., 90c; 1 lb., \$1.65.**

376 Early Kansas Red Seeded. A remarkably early melon for its large size. Finest quality, flesh rich red of delightful flavor. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 14c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.**

354 Early Canada—75 days. A new Ice-box size 11x11 inches, 10 pounds. The finest quality in an early melon. Brown seeds, red flesh. Really an outstanding variety for home gardens and local markets. **Postpaid: Pkt., 5c; V.G.B.P., 11c; oz., 16c; ¼ lb., 50c; ½ lb., 90c; 1 lb., \$1.65.**

SAVORY GARDEN PEAS

EXTRA EARLY VARIETIES

454 Mardelah. Something different in an extra early Pea. Produces peas for the table or canning in 53 days. Exceptionally sweet and tender. Wilt resistant. **Postpaid: Pkt., 15c; ½ lb., 27c; 1 lb., 45c; 2 lbs., 80c.**

455 Alaska Wilt Resistant. Extra early. Smooth seeded pea, ready to use in 53 days. Ideal for first market and home garden use. An old reliable variety. **Postpaid: Pkt., 10c; ½ lb., 16c; 1 lb., 24c; 3 lbs., 66c.**

EARLY VARIETIES

463 Little Marvel—18 inch—63 days to picking. The home gardener's favorite in the Middle West. Excellent quality and high yielding ability. This pea produces when many varieties fail. **Postpaid: Pkt., 10c; ½ lb., 19c; 1 lb., 33c; 3 lbs., 85c.**

459 American Wonder—12 inch—63 days to picking. A good reliable early variety. A favorite of many home gardeners for years. A very heavy bearer. **Postpaid: Pkt., 10c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c.**

457 Premium Gem—24 inch—66 days to picking. We think this is the best of the Gem Peas. Early, and with the fine sugar flavor usually found in later varieties. Reliable for the home garden. **Postpaid: Pkt., 10c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c.**

460 Thomas Laxton—30 inch—61 days to picking. A very popular home garden variety in the East and South. Fine for canning or market garden. Large and sweet flavored, an exceptional yielder. **Postpaid: Pkt., 10c; ½ lb., 19c; 1 lb., 29c; 3 lbs., 79c.**

478 Laxton Progress—15 inch—64 days to picking. A standard early variety for market and home gardens. Large podded, large seeded. A good variety for freezing or home canning. **Postpaid: Pkt., 10c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c.**

476 Dwarf Grey Sugar or Edible Pod. Grows 2 to 2½ feet tall—65 days. A sweet, tender, and delicious edible podded variety that is very productive and wilt resistant. Small, smooth, sweet flavored. **Postpaid: Pkt., 10c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c.**

MID-SEASON VARIETIES

468 Everbearing—28 inch—75 days. A long bearing, large seeded variety for home and market gardens. Wilt resistant and hardy, with a superior flavor. A very popular mid-season variety. **Postpaid: Pkt., 10c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c.**

465 Fillbasket or Potlatch—26 inch—80 days. An excellent variety for home and market garden. Unusually large seed, with delicious flavor. Very tender. **Postpaid: Pkt., 10c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c.**

473 Stratagem—28 inch—79 days. A very productive, large podded, large seeded pea of excellent flavor. A home garden variety. **Postpaid: Pkt., 10c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c.**

471 Tall Telephone or Alderman. A climbing or pole pea, grows to 5 foot. Ready for table use in 74 days. A handsome large podded variety. Excellent for home and market gardens. Wilt resistant. Pods contain 8 to 10 large peas of highest quality. The best tall pea. **Postpaid: Pkt., 10c; ½ lb., 22c; 1 lb., 38c; 3 lbs., \$1.00.**

474 White Eyed Marrowfat—5 foot—80 days. A leading variety for dry use. Very good for pea soup. Large, round, creamy white seed of delicious flavor. Wilt resistant and very productive. **Postpaid: ½ lb., 17c; 1 lb., 30c; 3 lbs., 80c.** Write for prices on larger quantities.

Pea Culture

Plant as early as anything in garden—light freezing does not hurt Peas. In the South plant two crops—early spring and fall; in the north make successive plantings about one week apart. Peas will grow on poorer soils than most crops. Smooth varieties are hardiest, wrinkled varieties of finest quality. Plant about 1 inch apart, 3 inches deep. 1 pound will drill 50 feet of row. You can double row peas about 8 inches apart spacing between double rows about 36 inches.

Berry's Best 4

An all season pea collection. Plant these 4 outstanding varieties on the same day and have a succession of peas for table and canning. They will mature in the order listed.

Little Marvel

New Laxtonian Pea

Uniculture inoculant will give your peas the boost that counts at picking time. Get increased yields by inoculating this year. A 10c packet will inoculate 10 pounds of seed.

LETTUCE CRISP, HEALTHFUL AND DELICIOUS ALL THE TIME

Lettuce Culture

Plant as soon as ground can be worked, light frosts do not harm this crop. Some gardeners have good success with lettuce seeded in the late fall just before the ground freezes. Sow seed sparingly, usually lettuce is seeded too heavy. In leaf varieties plants should be thinned to 4 or 5 inches. Heading varieties should be 1 foot apart. Rows should be 12 to 24 inches apart. This is a cool weather plant and will grow best in the early spring or fall. Start heading varieties in a coldframe or hotbed and set out as early as possible. A packet of seed will plant 50 feet or more.

LOOSE LEAF VARIETIES

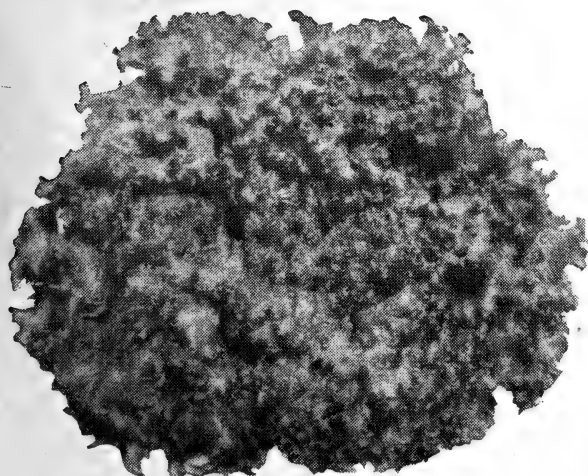

329 Early Prizehead or Brown Leaf—40 days. In our trials this variety has proved most satisfactory. As early as other leaf varieties. Prizehead remains crisp and tender longer than others. Plant at least one row and see the difference. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.**

326 Black Seeded Simpson—46 days. Most popular light green variety. Very good for forcing. A heavy producer of large curled leaves. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.**

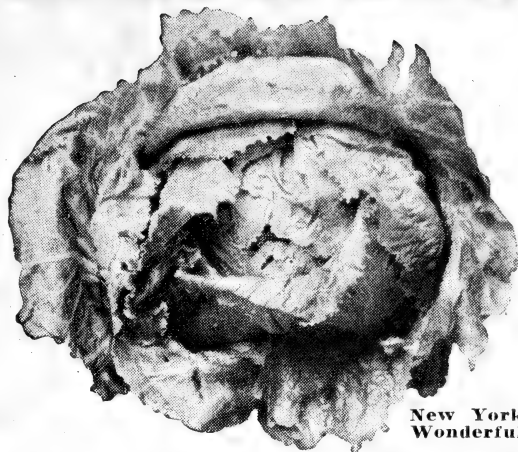

327 Early Curled Simpson—45 days. A widely used home garden variety. Excellent flavored, curly, crisp, and tender leaves. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.**

330 Chicken Lettuce. A hardy tall growing, non-heading, dark green variety. Producing the largest amount of leaves of any lettuce. Ideal for poultry and rabbit feed. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.**

328 Grand Rapids—40 days. Excellent for greenhouse forcing and early planting outside. Superior quality with beautiful appearance. Light green heavily fringed leaves. (Picture below.) **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.**

Grand Rapids Lettuce

New York
Wonderful

HEADING VARIETIES

335 Berry's New Bountiful—76 days. Something different in a head lettuce. This special selection will head when other varieties fail. Has the ability to resist tipburn and make heads in summer weather. The best for the middle west. A real home garden variety. **Postpaid: Pkt., 15c; V.G.B.P., 25c; oz., 33c; ¼ lb., 98c; ½ lb., \$1.75; 1 lb., \$3.25.**

332 Improved Hanson—80 days. An old favorite for home and market gardens. A sure heading, hardy type. Large, compact, tender, sweet heads. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.**

333 Big Boston—75 days. A popular butter-head variety for forcing and outside culture. Will not stand hot weather. A medium sized, compact head with creamy yellow heart. Leaves smooth glossy tinged with reddish brown. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.**

336 Iceberg—84 days. A large late variety. Conical shaped heads—interior, white, sweet, and crisp. Outer leaves light green tinged with brown. A home garden variety. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 65c; ½ lb., \$1.10; 1 lb., \$2.00.**

337 New York Wonderful #12—77 days. Earlier than regular New York, but with all the good qualities of the older type. The outstanding shipping variety. Best for market gardens. Large solid heads, crisp and of excellent quality and fine flavor. (Pictured above.) **Postpaid: Pkt., 5c; V.G.B.P., 20c; oz., 33c; ¼ lb., 92c; ½ lb., \$1.65; 1 lb., \$3.10.**

ENDIVE

315 Green Curled Endive—96 days. A delicious variety with finely curled compact heart. Very desirable for salads. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.**

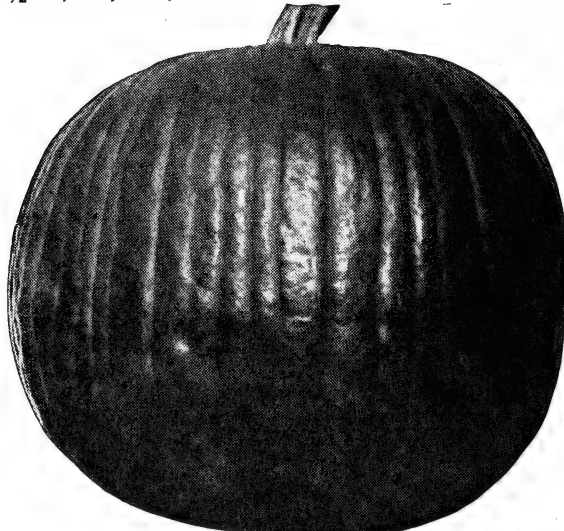

317 Broad Leaved Batavian or Full Heart—86 days. A medium large plant with a very compact, full heart. The leaves are broad and well blanched. Handsome in appearance, superbly flavored. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.**

LARGER YIELDS-BETTER QUALITY

2 V.G.B.P. of Pumpkin is enough for average needs. They will plant 30 hills in between the Corn or will drill 100 feet of row. Plant shallow when ground is quite warm. On peppers we recommend 2 V.G.B.P. for average family needs. Plant the same as Tomato. See page 51.

PUMPKIN

- 481 Mammoth Prize.** The largest of all Pumpkins. Valuable for stock feeding, but is also fine for pies. Flesh is thick of a beautiful bright yellow, fine grained, solid and tender. **Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.**
- 483 Sweet, or Sugar Pie.** Standard variety for pies. Flesh thick, dry and sweet, orange-yellow, and of superior quality. Fruits weigh 6 to 8 lbs., keep well. Will make pies that will melt in your mouth. **Postpaid: Pkt., 5c; V.G.B.P., 9c; oz., 12c; ¼ lb., 40c; ½ lb., 65c; 1 lb., \$1.00.**
- 485 Kentucky Field.** Used largely for canning. Grow large, flat, weigh 10 to 15 lbs. Flesh deep yellow, coarse, thick and nutritious, and of good flavor. Also used for stock feeding. **Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; ¼ lb., 26c; ½ lb., 42c; 1 lb., 68c.**
- 486 Connecticut Field.** (Picture below.) The standard cornfield pumpkin. Fruits grow large, weigh 15 to 25 lbs. Smooth, hard, orange-red skin; flesh orange-yellow, thick, coarse, and sweet. Fine for pies, canning, or feeding to stock. **Postpaid: Pkt., 5c; V.G.B.P., 9c; oz., 12c; ¼ lb., 32c; ½ lb., 50c; 1 lb., 85c.**
- 484 Cushaw or Crookneck.** Very popular variety. Very large, often 2 ft. long, crookneck shape. Creamy white shell; flesh yellow, solid, sweet. Excellent for pies; used also for stock feeding. **Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c.**
- 487 Green Striped Cushaw.** Cream with dark green stripes. 16-20" long, weight 12-16 lbs. Yellow Flesh. **Postpaid: Pkt., 5c; V.G.B.P., 9c; oz., 12c; ¼ lb., 40c; ½ lb., 65c; 1 lb., \$1.00.**
- 489 Mixed.** A combination filling all practical purposes: for pies, local markets and stock feed. The boys will find just the right size for Hallowe'en too. **Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c.**

Connecticut Field Pumpkin

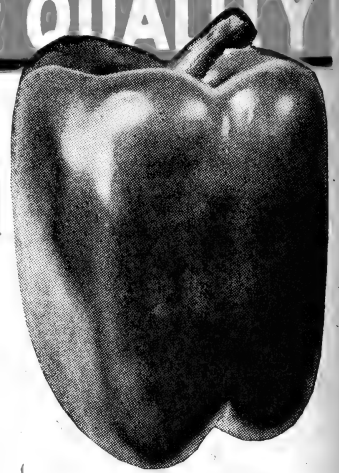

PEANUTS

Should be shelled before planting. Plant in rows 2½ to 3 ft. apart, 10 inches apart in the row. Cover one to two inches. A sandy soil is best.

621 New Mammoth Virginia. Of upright growth. Large pods and kernels. Always yield less imperfect pods than any other variety. Vines good for stock. **Postpaid prices: ¼ lb., 15c; ½ lb., 25c; 1 lb., 40c; 3 lbs., \$1.00.**

PEPPERS

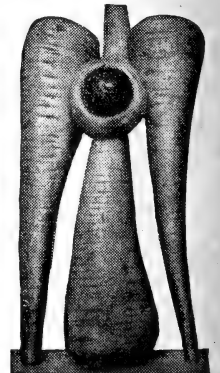

- 510 Sweet Mountain.** Plants very productive, growing upright, about 2 ft. tall. Fruits large, smooth, handsome. Green turning to rich red, when ripe. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 25c; ¼ lb., 82c; 1 lb., \$2.65.**
- 511 Large Bell or Bull Nose.** Plants small, erect, prolific, early. Large fruits bell shaped, deep green turning to scarlet, mild and sweet in flavor. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 25c; ¼ lb., 77c; 1 lb., \$2.40.**
- 515 Ruby King.** Excellent for home and market garden and shipping. Plants medium dwarf, erect, productive. Fruits dark green turning to ruby red. Flesh thick, mild and sweet. Used for mangoes. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 20c; ¼ lb., 65c; 1 lb., \$2.15.**
- 518 California Wonder.** One of the finest mild sweet flavored peppers, with thicker flesh than other varieties. Upright, prolific, vigorous grower. Very attractive, smooth, uniform and deep green. Excellent for shipping, home or market gardening. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 34c; ¼ lb., \$1.00; 1 lb., \$3.50.**
- 516 King of the North.** A sweet pepper like Ruby King but earlier. 65-70 days from time of setting out until fruit is ready to use. Plants 22-26" tall, erect, very heavy yielding, and hardy. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 32c; ¼ lb., 95c; 1 lb., \$3.10.**
- 509 Chinese Giant.** 80 days. An extremely large, sweet pepper for home and market garden. Plants are short and stocky. Fruits are deep green changing to deep scarlet. **Postpaid: Pkt., 10c; V.G.B.P., 25c; ¼ lb., \$1.25; 1 lb., \$4.00.**
- 520 Sunnybrook.** 73 days. A home garden variety with unusual flavor. Fruits are tomato shaped, smooth, with thick mild flesh. Deep green turning to deep red. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 30c; ¼ lb., 90c; 1 lb., \$3.00.**
- 514 Golden Queen.** 78 days. A large yellow variety with sweet and mild flavor. Resembles Ruby King in size and shape. A deep green turning to attractive yellow. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 32c; ¼ lb., 95c; 1 lb., \$3.10.**
- 517 Pimiento.** A good canning variety. Fruits heart shaped and very smooth; color dark green changing to crimson. Flesh thick, sweet and mild. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 20c; ¼ lb., 60c; 1 lb., \$2.00.**
- 512 Cayenne.** A favorite hot variety used largely for canning, pickles, and drying. Plants large and productive. Fruits long, tapering; deep green changing to brilliant red. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 25c; ¼ lb., 77c; 1 lb., \$2.40.**
- 519 Chili.** Used for canning and drying. Fruits long and tapering, deep green changing to bright scarlet; extremely hot. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 25c; ¼ lb., 77c; 1 lb., \$2.40.**

Ruby King Pepper

PARSNIPS

502 Improved Hollow Crown or Guernsey. 95 days. Roots long, white and smooth; hollow crowned. Tender and of excellent flavor. A good keeper. Grows 10 to 12 inch roots. Many gardeners prefer to leave parsnips in the ground over winter. Freezing is not harmful to this vegetable and improves the flavor. **Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 20c; ¼ lb., 60c; ½ lb., 95c; 1 lb., \$1.65.**

Hollow Crown Parsnip

ALL TESTED AND GUARANTEED SEED

RADISHES

Radish can be planted several times at intervals in early spring and again in the fall. Plant several different varieties. One V.G.B.P. will drill 50 feet of row. Plant $\frac{1}{2}$ inch deep, 1 inch apart in row.

535 BERRY'S BEAT-EM-ALL RADISH—21 Days. Consistently this variety has been the quickest producer in our trials. For those first crisp tender radishes plant a row of Beat-Em-All. An all red, round root with short tops. A home garden special. Postpaid: Pkt., 15c; V.G.B.P., 20c; $\frac{1}{4}$ lb., 75c; $\frac{1}{2}$ lb., \$1.35; 1 lb., \$2.25.

526 CRIMSON GIANT—28 Days. The largest early radish. Will still be crisp and tender after growing to a huge size. We have had radishes two inches in diameter that were still sweet and crisp. The best all season radish in our trials. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 12c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 60c; 1 lb., \$1.00.

525 SPARKLER OR SCARLET TURNIP WHITE TIP—26 Days. The best of the white tip radishes from our observation. This variety did exceptionally well in the trial garden in 1943. A very solid, tender, sweet, flavored radish second only to crimson giant in ability to withstand pithiness. A most attractive variety, the Scarlet Top contrasts with the white bottom producing a showy product. Very popular with market gardeners as well as home gardeners. Prepaid: Pkt., 5c; V.G.B.P., 8c; oz., 12c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 60c; 1 lb., \$1.00.

528 EARLY SCARLET TURNIP—25 Days. An early maturing variety. Roots small, round, with red skin. Flesh very white, mild and crisp. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., 90c.

538 IMPROVED SCARLET GLOBE—23 Days. Our seed is extra select. One of the best forcing varieties. Roots bright scarlet, globular, crisp, tender and of fine quality. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 55c; 1 lb., 90c.

533 FRENCH BREAKFAST—25 Days. A popular variety for forcing or early outdoor planting. Gets hollow in warm weather. Medium sized, olive shaped, Scarlet with white tip. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 11c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 60c; 1 lb., \$1.00.

541 ICICLE—27 Days. The most popular white radish. Grows long and slender, free from side roots. Flesh clear white, brittle, mild flavored. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 11c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 60c; 1 lb., \$1.00.

540 MIXED RADISHES. We offer a mixture of the best varieties of radishes. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; $\frac{1}{4}$ lb., 30c; $\frac{1}{2}$ lb., 50c; 1 lb., 90c.

542 CHINA ROSE WINTER—52 Days. Bright rose-red in color, 4 to 6 inches long, two inches in diameter, cylindrical shape. Flesh white, crisp, and mild flavored. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; $\frac{1}{4}$ lb., 50c; $\frac{1}{2}$ lb., 80c; 1 lb., \$1.50.

3 DELICIOUS SNAPPY RADISHES

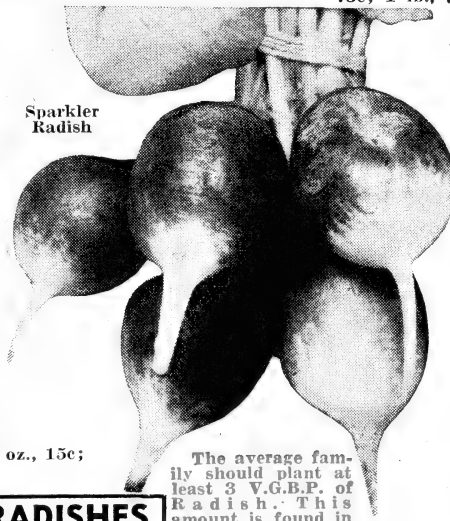

The 3 best radishes for the home garden. Extra early, tender, snappy, delicious. Each one a superior variety. No. 540—36c value—only 25c, postpaid.

Sparkler Radish

Icicle Radish

The average family should plant at least 3 V.G.B.P. of Radish. This amount is found in the Approved Home War Garden, page 53.

flesh is light yellow, firm, sweet and tender. Postpaid: Pkt., 10c; V.G.B.P., 10c; oz., 15c; $\frac{1}{4}$ lb., 52c; $\frac{1}{2}$ lb., 95c; 1 lb., \$1.55.

TURNIPS

1 V.G.B.P. will plant 50 feet of row. Drill seed about 2 inches apart—cover very lightly.

601 PURPLE TOP STRAP LEAF—46 Days. An early, very productive variety. One of the most extensive grown kinds for home or market gardens. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 75c; 1 lb., \$1.45.

607 PURPLE TOP WHITE GLOBE—57 Days. The most popular home and market garden variety. A good shipper. Very attractive appearance, fine in quality. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 75c; 1 lb., \$1.45.

606 GOLDEN BALL—65 Days. An attractive, different variety for home gardeners, and truckers. Roots medium sized, round, smooth, yellow, flesh deep yellow, of fine texture and flavor. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 75c; 1 lb., \$1.45.

604 SNOWBALL—75 Days. A late white variety grown largely in the South. Tops are large with cut leaves. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 75c; 1 lb., \$1.45.

603 SHOGGIN—30 Days. The most popular foliage turnip. Grown for early greens and small roots. Tops 18 to 20 inches tall, erect, bright green, strap leaved. Roots round, white, tender and mild. The fastest grower of all. Postpaid: Pkt., 5c; V.G.B.P., 12c; oz., 18c; $\frac{1}{4}$ lb., 54c; $\frac{1}{2}$ lb., \$1.00; 1 lb., \$1.75.

609 COWHORN—70 Days. A stock feeding turnip. Roots 12 to 15 inches long, tapering. Flesh is sweet and tender. A good keeper. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; $\frac{1}{4}$ lb., 40c; $\frac{1}{2}$ lb., 75c; 1 lb., \$1.45.

612 RUTABAGA, AMERICAN PURPLE TOP—90 Days. A dependable variety for home or market garden. Roots are large, round, yellow with purple top;

HERBS

681 Anise. An annual grown for the seeds and leaves. Seeds used for flavoring cakes and cookies; leaves for garnishing. Pkt., 10c, postpaid.

682 Borage. An annual grown for its fuzzy leaves of cucumber flavor. A bee plant. Pkt., 10c, postpaid.

683 Caraway. A biennial grown for its seed. Used for spices and condiments. Pkt., 10c, postpaid.

685 Dill. An annual grown for seed and leaves which are used in pickles and for flavoring. Pkt., 5c; oz., 15c, postpaid.

686 Florence Fennel. Plant grows about 30 inches tall, with broad overlapping stalks similar to celery but forming

a flat-oval, bulb at the base of the stem. This bulb or "apple" is used as celery. It is sweet and anise flavored. Pkt., 10c, postpaid.

687 Sage. A perennial. Leaves are used for seasonings, medicines and soap perfumes. Pkt., 10c, postpaid.

688 Sweet Basil. An annual. Flower buds and leaves are used for seasoning. Pkt., 10c, postpaid.

693 Sweet Marjoram. An annual used in seasonings; yields a fragrant oil. Pkt., 10c, postpaid.

692 Summer Savory. An annual. Leaves are used in salads and dried for soups. Pkt., 10c, postpaid.

VEGETABLE FAVORITES OF THOUSANDS

WINTER SQUASH

Winter Squash, particularly yellow fleshed varieties, is an excellent source of Vitamin A. Squash is also easily kept in dry storage. A family should have 50 pounds a year. We recommend 1 V.G.B.P. of Summer Squash and 2 V.G.B.P. of winter varieties. Plant in hills summer types about 4 feet apart, winter about 8 feet apart. One V.G.B.P. will plant 25 hills.

The following five varieties of winter squash:

Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 70c; ½ lb., \$1.20; 1 lb., \$2.00, postpaid.

552 GOLDEN HUBBARD—100 Days. Earlier than improved Hubbard. Fruits 8 to 10 pounds with a hard warty orange skin. Thick, yellow, fine grained, dry flesh; excellent quality for canning and freezing. A good keeper.

554 IMPROVED HUBBARD—105 Days. Standard winter variety for home and market gardens. The best shipper. Our strain is very early. Dark bronze-green, rind hard and tough, slightly warted. Fruits weigh about 12 pounds, flesh very thick; orange-yellow, fine grained, sweet and dry.

555 BLUE HUBBARD—110 Days. Like Improved Hubbard but the color is a clear blue grey. Flesh is bright yellow, thick, fine grained, very dry and sweet. Splendid for pies. A good keeper.

556 BUTTER CUP—100 Days. A new introduction just the right size for baking. Grows exceptionally well in the Great Plains region. Of excellent quality, flavor is similar to sweet potatoes. Flesh dry, deep rich orange, texture and keeping qualities the best.

557 TABLE QUEEN OR DES MOINES—58 Days. Individual size squash. Desirable for home or market garden; also a good shipper. Fruits acorn-shaped, smooth, thin shelled, dark green. Six inches long, 3 inches diameter. Flesh light yellow, with sweet flavor. Makes splendid pies, bakes well.

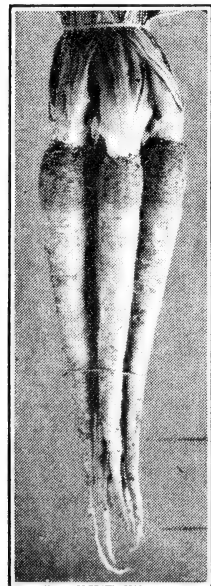

SUMMER SQUASH

These three varieties: Pkt., 5c; V.G.B.P., 10c; oz., 15c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.

561 MAMMOTH WHITE BUSH SCALLOP—56 Days. A favorite with all our trade. An early maturing round flat squash, largest of the summer varieties. Fruit a clear white, and excellent for stewing.

553 GIANT GOLDEN STRAIGHT NECK—55 Days. A new variety selected from the crookneck. The straight neck permits easy packing and handling. Fruits 18 to 20 inches long, heavily warted, deep orange color. Thick and meaty flesh.

551—BLACK ZUCCHINI—60 Days. Fruits very nearly cylindrical, straight, smooth, dark green-black. Flesh greenish white at eating stage, very good flavor.

Vegetable Oyster
Salsify

565 MIXED SQUASH. The assortment you want. Has all standard varieties in our regular quality seed. Both summer and winter types. Pkt., 5c; V.G.B.P., 10c; oz., 12c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.20.

SALSIFY

571 Mammoth Sandwich Island. Vegetable Oyster. An improved variety with roots 6 to 8 inches long, thick, tapering, smooth. Decided oyster-like flavor. Fine for soups, etc.

Postpaid: Pkt., 10c; V.G.B.P., 15c; oz., 50c; ¼ lb., \$1.50; ½ lb., \$2.75; 1 lb., \$5.00.

TOBACCO

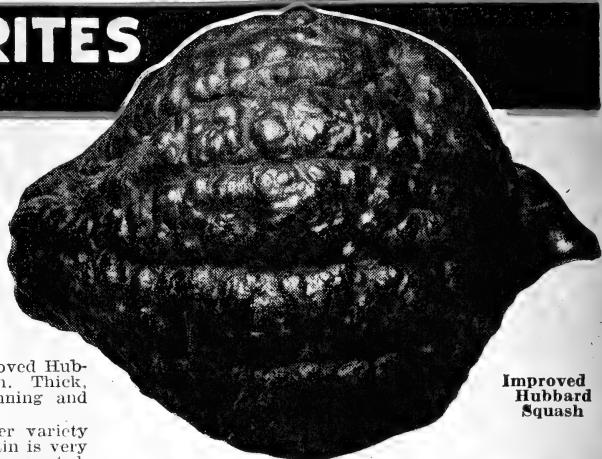

Postpaid price on each of the following four varieties: Pkt., 10c; oz., 40c; ¼ lb., \$1.25; 1 lb., \$1.00.

726 Connecticut Seed Leaf.

727 Havana. An early variety used largely for cigar wrappers on account of thinness, and fine quality.

728 White Burley. Very popular.

729 Judy's Pride. Broad attractive leaves. Easy to cure. Used for fillers and wrappers; smoking or chewing.

Improved
Hubbard
Squash

SPINACH

Every garden should have this famous health food. Important source of vitamins, calcium and iron. Spinach thrives under cool, moist, conditions. Plant both in early spring and fall. The average family should plant from two to four ounces of seed. Plant at least 150 feet of row about 1 inch deep. 1 ounce will plant 100 feet.

585 NOBLE GIANT. Easy to wash. Leaves medium thick, green, very large, broad and smooth, with slight crumpling. Very good quality. The best of the large smooth leaved type. A long standing variety. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 13c; ¼ lb., 40c; ½ lb., 65c; 1 lb., \$1.15.

583. BLOOMESDALE SAVOY. An early variety. Popular for local and long distance markets, for canning, and home use. A long keeper after cutting. Leaves medium size, crumpled, glossy dark green. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 12c; ¼ lb., 33c; ½ lb., 55c; 1 lb., 90c.

582 LONG STANDING. A quick growing, long bearing variety for mid-summer use. Plants grow low and spreading, with pointed dark green leaves. Very crumpled. May be seeded in spring or fall. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 13c; ¼ lb., 40c; ½ lb., 65c; 1 lb., \$1.15.

MISCELLANEOUS

690 Kale, Dwarf Green Curled Scotch—55 Days. A member of the cabbage family, used for greens. Leaves large and crimped. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 65c; ½ lb., \$1.15; 1 lb., \$2.00.

691 Kale, Tall Green Curled Scotch—60 Days. Similar to the dwarf variety but grows larger. Very tender after first frosts. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 20c; ¼ lb., 65c; ½ lb., \$1.15; 1 lb., \$2.00.

720 Okra, Long Green Podded—55 Days. Plants dwarf and very productive. Valuable for soups and stews. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.00.

721 Okra, White Velvet—60 Days. Early, prolific, with creamy white pods. Meaty, tender, smooth, very attractive. Postpaid: Pkt., 5c; V.G.B.P., 8c; oz., 10c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.00.

706 Broccoli, Italian Green Sprouting—70 Days. Forms large head consisting of a cluster of small heads. Both heads and stems are cooked and served like cauliflower but is easier to raise and has more delicate flavor. Postpaid: Pkt., 10c; V.G.B.P., 18c; oz., 30c; ¼ lb., 90c.

705 Collards, Georgia. A good substitute for cabbage which succeeds on poor soil, grown especially in the South. Can be boiled like cabbage or used as cole slaw. Postpaid: Pkt., 5c; V.G.B.P., 10c; oz., 15c; ¼ lb., 50c; ½ lb., 85c; 1 lb., \$1.50.

695 Kohlrabi, White Vienna—62 Days. Dwarf variety. Excellent for home and market garden. Bulbs 2 to 3 inches in diameter, globular, flesh white and tender. Postpaid: Pkt., 10c; V.G.B.P., 25c; oz., 40c; ¼ lb., \$1.25.

495 Parsley, Moss Curled—70 Days. A compact plant with dark green finely cut and curled leaves. Very desirable for garnishing and decorating. Prepaid: Pkt., 10c; oz., 15c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.

496 Parsley, Hamburg Rooted—90 Days. Forms thick, fleshy, edible roots, 8 to 10 inches long, used for flavoring, like celery or celeriac. Prepaid: Pkt., 10c; oz., 15c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25.

BEAUTIFUL FLOWERS

Cost so Little and Mean so Much!

Beautiful Illustrated Planting Booklets Free

1270 Job's Tears. (A.) Curious ornamental grass, cornlike leaves. Seed used for beads. Pkt., 10c.

1120 Joseph's Coat (Amaranthus). (A.) Mottled leaves of red, yellow, and green. A beautiful foliage plant. Easy to grow. Pkt., 10c.

Single Early Cosmos

ROCK GARDENS BORDERS & EDGINGS

We have carefully selected a group of annuals and perennials best suited for planting rock-gardens, borders, and edgings. These plants range in height from 2 inches to one foot. These smaller plants take much less garden space than other varieties.

1514 Perennials for Rock Gardens. A mixture of low growing plants that will start early and bloom throughout the growing season. They grow from the old roots each spring, save replanting every year. Pkt., 15c.

1320 Annuals for Rock Gardens. A carefully prepared mixture of low growing, many colored, free flowering annuals which will supply color in your rock garden all summer. Pkt., 10c.

1110 Ageratum, Blue Bedding. (A.) Blooms profusely. Splendid for pot culture, rock gardens, and bedding. Pkt., 10c.

1112 Alyssum, Violet Queen. (A.) A beautiful shade of violet. Does not fade in hot weather. Pkt., 10c.

1129 Butterfly Flower, Dwarf. (A.) A fine mixture of popular shades. Plants 6" tall, free flowering. Pkt., 10c.

1115 Carpet of Snow (Alyssum). (A.) 2-3" high. A solid mass of white all summer. Pkt., 10c.

1282 Flax, Scarlet (Linum). (A.) Flowers brilliant red. Pkt., 10c.

1295 Marigold, Miniature Mixed. (A.) 9". A delightful mixture. Pkt., 10c.

1301 Nasturtium, Lilliput Mixed. (A.) 9", single mixed in a wide range of hybrid colors. Pkt., 10c.

1327 Pansy, Giant Mixed. (A.) Beautiful range of colors. Pkt., 15c.

1387 Pansy, Viola Mixed. (A.) Small flowered, quaint faces. Pkt., 10c.

1317 Petunia, General Dodds. (A.) A blood red. Large flowers. Pkt., 10c.

1324 Petunia, White King. (A.) Large pure white blossoms. Pkt., 10c.

1322 Petunia, Blue Bee. (A.) A large flowered true blue. Pkt., 10c.

1323 Petunia, Rose of Heaven. (A.) (Nana compacta) rose pink. Pkt., 10c.

1325 Petunia, Howard Star. (A.) Purple with white Star. Pkt., 10c.

1316 Phlox (Drummondii) Mixed. (A.) 1 ft. Large early blooming. Will last until frost. Pkt., 10c.

1310 Portulaca (Moss Rose). (A.) Single. Dainty little flowers which thrive on poor soil, bloom even in hottest weather. Pkt., 10c.

1311 Portulaca (Moss Rose). (A.) Double. Grow like single, but have double flowers. Pkt., 15c.

1355 Sweet Peas, Cupid Mixed. (A.) A 6 in. rock garden sweet pea with a good range of color. Pkt., 10c.

EVERBLOOMING ROSES

2 year medium. The grade we recommend as our biggest value. You will find it the equal to what many sell as their No. 1 or best grade. These are good heavy well rooted plants, 2-year field grown that will bloom this year.

2 year heavy. The finest Rose bushes you can buy at any price. Often sold at several times our very low price.

BERRY'S VICTORY ROSES

Berry's special selection of medal winners. These beauties, old and new, will win a warm place in the heart of every American Rose lover.

2 yr. Medium—59c each; 3 for \$1.65, postpaid.

2 yr. Heavy—75c each; 3 for \$2.15, postpaid.

No. 5031—**AMI QUINARD**—Dark Red. A new rich deep maroon. Very fragrant, vigorous, free blooming and disease resistant.

No. 5042—**McGREDY'S YELLOW**. A sturdy vigorous rose with chrome yellow blooms of striking beauty.

No. 5041—**THE DOCTOR**—Pink. Beautiful, large, brilliant, satiny pink with gold base. Very fragrant.

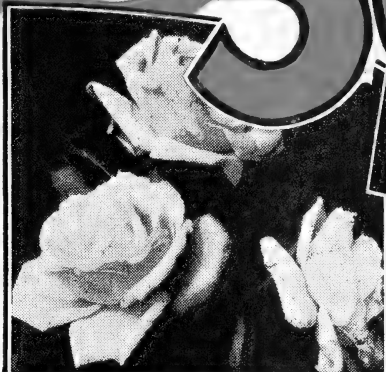

No. 5033—**CALEDONIA**—White. One of the finest white roses grown. The long snowy white buds are beautifully shaped and the blossoms possess a delicious fragrance.

No. 5032—**GRENOBLE**—Scarlet-Crimson. The buds are crimson, but the open flower is brilliant red, almost scarlet. A bed of Grenoble stands out like a fire.

VICTORY ROSE GARDENS

No. 5212—1 each of above. 5—2 yr. Medium size—5 for \$2.50, postpaid.

No. 5211—1 each of above. 5—2 yr. Heavy size—5 for \$3.25, postpaid.

ARCTIC ROSES

2 yr. Medium—Each 55c; 3 for \$1.50
2 yr. Heavy—Each 70c; 3 for \$2.00

Extra Hardy. Very vigorous and dependable. These Hybrid perpetual Roses will produce many beautiful, fragrant blooms on large, sturdy bushes. These Arctic Roses thrive on severe climates.

TALL HEDGES for Screens

Will Grow to
4 ft. or Higher
See Description

TRIMMED and NATURAL LOW HEDGES

See Page 73 for Low Prices on Tree Seedlings for Windbreaks

These taller, rapid growing varieties are best for screens to conceal undesirable buildings, alleys, unsightly situations next door, etc. Where room is available, they are excellent for mass plantings or as background for Shrub borders, etc.

No. 5508 **HONEYSUCKLE**—Bush. (12 to 15 ft.) One of the most attractive of the taller hedges. Perfectly hardy, vigorous grower—beautiful flowers followed by bright red berries. The ideal screen. Plant 2 to 3 ft. apart.

12 to 18 inch—10 for \$1.35; 25 for \$3.00; 100 for \$10.75.

18 to 24 inch—10 for \$1.75; 25 for \$3.85; 100 for \$13.95.

No. 5504 **RUSSIAN MULBERRY**. A very useful variety at unusually low cost. Quick growing and absolutely hardy. Useful for both hedge or screen as it can be kept pruned down to 4-5 ft. (when planted 15 to 18 inches apart), or allowed to grow to 12-16 ft. high (when planted 3-5 ft. apart).

12 to 18 inch—10 for 35c; 25 for 75c; 100 for \$2.50.

18 to 24 inch—10 for 45c; 25 for \$1.00; 100 for \$3.50.

No. 5618 **RUSSIAN OLIVE**. Another very useful, attractive yet inexpensive variety. When planted 15 to 18 inches apart, it makes a good tight, silvery grey hedge; kept pruned down to 4 to 6 ft. high. For effective screen, plant it 3 to 5 ft. apart and it will grow 15 to 18 ft. tall.

12 to 24 inch—10 for 75c; 25 for \$1.60; 100 for \$5.50.

2 to 3 foot—10 for 96c; 25 for \$2.15; 100 for \$7.50.

IMPORTANT. Your Hedge will never be tight, close to the ground unless you prune it severely immediately after planting. Always prune off at least 1/2 of the top branches. Smaller sizes should be left only about 4 to 6 inches taller than ground—larger sizes about 10 to 12 in.

No. 5506 **PRIVET**—**AMOR RIVER NORTH**. Most popular Hedge plant—Hardy Russian Privet. Dense, glossy green foliage on numerous upstanding branches. Can be kept pruned down to a thick Hedge only 2 feet high or will grow over 4 feet if not pruned.

18 to 24 inch—10 for \$1.75; 25 for \$3.85; 100 for \$13.95.

2 to 3 foot—10 for \$2.35; 25 for \$5.25; 100 for \$19.95.

No. 5500 **TRUEHEDGE COLUMBERRY**. Hardly ever needs trimming. As beautiful as Boxwood with the protective qualities of Barberry. Patent No. 110.

12 to 15 inch—5 for \$2.00; 10 for \$3.65; 25 for \$8.50.

15 to 18 inch—5 for \$2.45; 10 for \$4.50; 25 for \$10.50.

No. 5505 **BARBERRY**—Green. A very compact, dense growing, thorny, protective Hedge. Can be kept pruned to 2 feet or allowed to grow to 4 feet. In Fall, the leaves turn red and bright red berries appear.

12 to 18 inch—10 for 85c; 25 for \$1.85; 100 for \$6.45.

18 to 24 inch—10 for \$1.20; 25 for \$2.65; 100 for \$9.85.

No. 5502 **BARBERRY**—Red. Like green but with brilliant red foliage when planted in full sun.

12 to 15 inch—5 for 98c; 10 for \$1.75; 25 for \$4.15.

15 to 18 inch—5 for \$1.25; 10 for \$2.25; 25 for \$5.35.

No. 5511 **SPIREA V.H.—BRIDAL WREATH**. One of the most beautiful Hedges—in the Spring, its graceful arching branches are a mass of lovely white bloom. Very hardy—grows to 4 to 6 ft. high. Prune very severely when planted but, after the first year, prune out only the dead wood.

12 to 18 inch—10 for \$1.20; 25 for \$2.35; 100 for \$9.50.

18 to 24 inch—10 for \$1.50; 25 for \$3.55; 100 for \$13.75.

No. 5507 **CARAGANA**. Best ornamental Hedge for severe northern climates. Strong, upright, growing thornless branches with dense foliage and yellow blossoms insure a beautiful hedge. Keep pruned from 3 to 6 feet or you may let it grow higher.

12 to 18 inch—10 for 45c; 25 for 95c; 100 for \$3.15.

18 to 24 inch—10 for 59c; 25 for \$1.25; 100 for \$4.45.

2 to 3 feet—10 for 75c; 25 for \$1.65; 100 for \$5.75.

The above varieties listed under Tall Hedges are also ideally suited for windbreak plantings because of their quick growth. On page 73 we have them priced in larger quantities that will save you money. Plant these in combination though with slower growing Evergreen Seedlings which will make a more permanent windbreak for you. Get our Free Evergreen Circular for full details.

BERRY'S GUARANTEE SATISFACTION AT MONEY SAVING PREPAID PRICES

We have always guaranteed satisfactory quality. See page 75. This year we can assure you of more. Because we don't use expensive illustrative color pictures and free gifts you may not care about we can save you real money on the best quality nursery stock that can be grown.

In comparing our prices remember they are all prepaid. In ordering you can save then at least 20% over other nurseries who may have just as low a price but ship collect.

VINES

Strong 2 Yr. Plants for Rapid Vigorous Growth For Trellis, Arbors, Porches, etc.

These 7 varieties, 35c each; 3 for 95c, postpaid

Vines with their luxuriant foliage and lovely blooms relieve the monotony of bare walls and give quick shade on porches and arbors.

No. 5538—**BOSTON IVY**. Best clinging vine for brick, stone, cement or stucco.

No. 5540—**HONEYSUCKLE**—Scarlet Trumpet. A strong growing vine with bright red, trumpet-shaped flowers.

No. 5537—**ORIENTAL BITTERSWEET**. Better than the American because it produces many more lovely red berries for winter bouquets. A sex plant that requires cross-pollination—always plant from 4 to 6 nearby.

No. 5539—**HONEYSUCKLE**—Halls. A very hardy, rapid growing vine covered with creamy white flowers in season. Fine for porch, arbor or fence. Best vine for ground cover in shady places, on steep banks or terraces.

No. 5531—**CLEMATIS**—Paniculata. The hardy, vigorous growing Clematis. Covered with fragrant flowers in late summer and fall.

No. 5542—**WISTERIA**—Purple. The most magnificent of all vines—lasting for generations and increasing in beauty each year. Long clusters of lilac flowers in summer. Requires some protection in severe climates.

No. 5541—**TRUMPET VINE**—The Old Favorite hardy Trumpet Vine. Vigorous growing, hardy vine is covered with larger trumpet shaped, scarlet flowers in summer.

Some Vines of Special Beauty

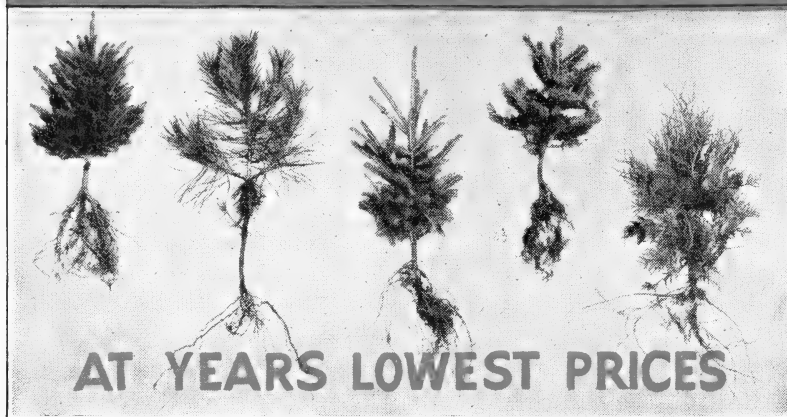

No. 5532—**SILVER LACE VINE**. The fastest growing, most beautiful hardy vine. Often grows 20 ft. per year. Glossy green foliage covered with snowy white flowers. Each, 45c; 3 for \$1.25.

No. 5526—**CLEMATIS JACKMANI**—Purple. A beautiful perennial vine with its mass of large, rich, purple bloom. Considered the most beautiful vine for trellis. Requires protection in severe climates. Each, 75c; 3 for \$2.00.

No. 5528—**CLEMATIS**—Romana. Lovely light blue flowers completely cover the plant. One of the most beautiful of all the Clematis. 75c each; 3@2.00.

No. 5525—**HONEYSUCKLE**—Gold Flame. New everblooming Honeysuckle. Masses of deep scarlet trumpets lined with gold from early summer until frost. Attractive blue green foliage. Plants are vigorous, hardy and disease resistant. Each, 65c; 3 for \$1.75.

SPECIAL EVERGREENS FOR HOME PLANTINGS

Large Evergreens for Windbreaks

This special offer of twice transplanted windbreak stock is our biggest value of the year. We make this offer only on American Arbor Vitae and Norway Spruce as these two Evergreens alone make a fine two row windbreak. These extra large trees that cost so little may be planted in their permanent location, the American Arbor Vitae should be your outside row and the trees 8-10 feet apart. On the inside the Norway Spruce may be planted 14-16 feet apart.

AMERICAN ARBOR VITAE. A very hardy rapid grower that thrives on heavy soils. Densely branched, bright green color, grows 40 to 50 feet.

NORWAY SPRUCE. A very hardy rapid grower, fine for windbreaks. This tree branches close to the ground and has a very dense deep green foliage. Grows 60 to 70 feet tall, and lives 50 to 60 years

WINDBREAKS

at LOW COST

from SEEDLING TREES

A MONEY MAKING INVESTMENT

For just a few dollars you can now plant several hundred Evergreen and Forest Tree seedlings; to protect your home, farm buildings, and feed lots, from sweeping winds in winter and summer. Windbreaks from these seedlings will greatly increase crop production from the protection given, also production of your livestock. Nearly every farm has some waste land that will grow all the fence posts you need, all the wood you can burn, and at the same time, prevent soil erosion and provide shelters for grazing livestock. A fine investment needed on every farm at such low cost.

EVERGREEN SEEDLINGS

Evergreen seedlings should be planted in beds and cultivated like garden plants. Rows may be 18 to 24 inches apart with the Evergreens 10 to 15 inches apart in the row. Provide some shade for the first year. A covering of lath spaced about 1½ inches apart with slats running north and south is good. After about 2 years or when 18 to 24 inches high, transplant into permanent location. For further planting instructions and windbreak ideas ask for our Free Circular on Evergreens giving a full description of all varieties.

Berry's Evergreen seedlings are grown in northern Wisconsin. They are vigorous with a strong root system guaranteed to be hardy and adapted anywhere. We ship direct to you prepaid at proper planting time furnishing planting instructions and guaranteeing satisfaction.

25 each: Norway Spruce, Am. Arbor Vitae, Colo. Blue Spruce, Ponderosa Pine.

No. 722—all 100—4/6"—only \$1.98 postpaid.

TREE SEEDLINGS

These are more rapid growing than Evergreens so should be used in combination with Evergreens as they are not nearly so permanent as Evergreens.

Our tree seedlings are well rooted, hardy and vigorous. They are easy to start, planting instructions being furnished. We ship prepaid at proper planting time early in the Spring and guarantee satisfaction.

We suggest planting all sizes of tree seedlings in rows where it is convenient to cultivate them often the first 2 or 3 years—rows about 36 inches apart with the seedlings 12 to 24 inches apart in the row—they grow more bushy when planted 24 inches apart. After 2 years, when the trees are well rooted and about 5 feet tall, transplant into permanent location.

1 yr. No. 1. 55c 2.50 5.75 21.00

No. 6606—**BETA**. The hardest of all grapes—consistent bearer of juicy black fruit for jelly, juice or wine. Rich, full flavored but rather tart for table use. Fine for Arbors.

No. 6607—**DELAWARE**. A red grape, very sweet and highest quality. Not quite as large size as Caco.

No. 6608—**MOORE'S EARLY**. Earlier than Concord. This large blue-black full flavored grape brings premium prices on any market.

No. 6609—**NIAGARA**. Enormous bunches of large greenish white, sweetly flavored fruit. Best white for market—good shipper. Requires protection in severe climate.

No. 6610—**WORDEN**. Extra high quality blue grape of Concord type but clusters are often larger and the berries sweeter and of finer quality. Extremely hardy and productive.

No. 6601—**CONCORD—AMERICA'S CHOICE**. The best commercial grape for the Middle West. Vines vigorous, extremely hardy and dependable bearers of large crops of big, blue-black fruit. 2 yr. No. 1: 2 for 49c; 10 for \$2.10; 25 for \$4.75; 100 for \$15.95, prepaid. 1 Yr. No. 1: 2 for 39c; 10 for \$1.59; 25 for \$3.35; 100 for \$11.65, prepaid.

2 yr. No. 1. 45c \$2.10 \$3.95 \$9.35

1 yr. No. 1. 32c 1.45 2.65 6.15

No. 6602—**CACO**. Red. The hardest red Grape. Vigorous grower, bearing young, heavily and regularly. Fruit is extra large, beautifully colored, sweet and juicy.

No. 6603—**PORTLAND**. White. Earliest of all Grapes! Large, white fruit with luscious, spicy flavor. Hardy and finest quality.

No. 6604—**FREDONIA**. Black. Destined to be America's favorite black Grape! Vigorous, productive and hardy. Large bunches of big juicy, deliciously flavored fruit—ripening 2 weeks earlier than Concord.

No. 6605—**SHERIDAN**. (An improved Concord). A promising late-keeping grape to extend the season of Concord. In many places under the same conditions as Concord, the plants have been found to be just as vigorous, healthy, hardy, and more productive. The bunches of Sheridan are larger and more compact; and the berries are firmer and as large as Concord; the flavor is sweeter and richer; the season is a week later and the grapes do not shell as readily.

No. 6622—**NEW GRAPE ARBOR**. 1 each of above 4—2 yr. No. 1 and 1 Golden Muscat 1 yr. No. 1—all 5 for only \$2.15. Postpaid.

No. 6600—**GOLDEN MUSCAT**. A new hardy Grape combining the extra high quality and distinctive flavor of the California Muscat Grape, with the hardness of Concord. The bunches are large and well filled. Berries are large, sweet, meaty and juicy. Vines are vigorous, hardy, and heavy bearers after the second year. Recommended for home or commercial plantings. Prepaid: 1 Yr. No. 1—79c each; 4 for \$2.95.

SAVE 15% to 20%

We are fair to every customer regardless of the amount of order. 100% value in the best nursery stock America can grow. Accurate grades, true descriptions and a fair and square deal always is guaranteed you. Order with safety at Berry's. Prices are lowest and quality highest so don't delay—act now. Remember our Prepaid Prices save you 15-20% over other nurseries.

HIGHEST QUALITY - LOWEST PRICES

FINEST QUALITY

Our enviable reputation is built on high quality at low prices—superior values. We have developed the largest business of its kind in the country, on this sound policy.

These same high standards maintain in our nursery department. Each and every item is carefully tested before Berry's will put their name behind it. You can order our Nursery Stock with full confidence that it is accurately and honestly described, that the quality is of the highest and the prices, the lowest.

Berry's guaranteed nursery stock is grown by experts, wherever possible in northern sections for extra-hardiness. Transplanted, pruned and root pruned to insure sturdy, well rooted, well branched plants that will thrive anywhere. Do not be misled by claims of superior quality—we offer high quality at very low prices.

LIBERAL GUARANTEE

Berry's guarantee their nursery stock to be exactly as represented and to be delivered to you in good planting condition. If not, we will replace it free of charge but you must notify us within 10 days after you receive it.

If any nursery stock is proven not true to name, we will, upon proper proof, replace all such stock or refund the exact amount paid, but, in no case, shall we be liable for any sum greater than the amount originally received for said nursery stock.

If any Berry's nursery stock fails to grow with proper care, we will replace it at half price IF you notify us within 90 days after you receive it.

PLANT THIS YEAR

Get your fruit from the tree and the vine. With canned goods short, and fresh fruits scarce, due to transportation difficulties, now is the time to insure your share of good things to eat. Plant now, harvest next year.

WHEN WE SHIP

In the spring, we study the weather reports and ship at the proper planting time in your locality. Don't be alarmed if your shipment is not received on the first warm day, for you may be sure your order is having careful attention.

When Spring opens up all over the central states, we are not always able to ship as promptly as we would like because of the manpower problem. As your order will be shipped as soon as possible, it is not necessary to write us. You may be sure that even in the rush season, your order will be received in time for successful planting.

Strawberries, cannas, dahlias, Peonies, Gladiolus, and Perennials are shipped separately and not included in the same package with Fruits, Shrubs, etc.

In the fall, we can supply all Nursery stock except Strawberries, Cannas, Dahlia, and Gladiolus. Most kinds of Nursery stock can be very successfully planted in the Fall, even in severe climates.

Berry's send you complete instructions for planting your nursery stock. These are included in the package. Read them carefully and you will succeed.

SAVE WITH SAFETY AT BERRY'S NEW PREPAID PRICES

STRAWBERRIES FOR EVERY HOME GARDEN

SURE CROP

BLAKEMORE

New, early market berry. Extra vigorous grower, heavy bearer, very drouth resistant, healthy and good plant maker. Recommended for Northern States. Mild flavor, beautiful color, early maturity. For market or home.

SENATOR DUNLAP

Old reliable favorite for home or market. Strong, extra hardy grower—heaviest yielder of big, solid, red berries. Mid-season.

Above 2 varieties postpaid.

Postpaid! 25 for 55c; 50 for 95c; 100 for \$1.75; 300 for \$4.95; 500 for \$7.55.

EVERBEARING

"All Everbearers start fruiting 90 days after planting."

MASTODON

A well known variety which produces extra large fruit. The berries are not as well colored nor as fine flavored as Gem. Prepaid: 25 for \$1.15; 50 for \$2.10; 100 for \$3.75; 500 for \$14.15.

WAYZATA

One of the newer and better varieties of everbearing strawberries. The fruit is of about the same size and quality as Gem. The plants cost more because Wayzata does not produce as many plants as Gem. Prepaid: 25 for \$1.85; 50 for \$3.45; 100 for \$6.50; 500 for \$30.50.

THORO-BREDS

FAIRFAX

A new variety that is making thousands of friends. It wins because of its greatly superior flavor and astonishing yields. Has produced over 5000 quarts per acre. Large firm berries. Bright red color. Excellent shipper.

PREMIER

Famous for flavor and huge crops in any soil or climate. Berry's plants are true early strain—heavy bearers, big red berries.

Above 2 varieties postpaid.

Postpaid: 25 for 65c; 50 for \$1.15; 100 for \$2.15; 300 for \$6.15; 500 for \$9.35.

No. 4014—EVERBEARING STRAWBERRY GARDEN—75 Gem and 25 Mastodon—100 for \$2.95, Prepaid.

No. 4012—SPRING STRAWBERRY GARDEN—100 @ \$1.75, Ppd. 25 Dunlap, 25 Blakemore, 25 Premier, 25 Fairfax.

GOOSEBERRIES CURRANTS

Delicious for pies, sauce, jelly or canning. Lots of fruit with no work. Extremely hardy, bear every year—disease resistant and long lived. Require very little room in the garden.

Prepaid Prices All Varieties 2 6 10
2 yr. No. 1.....75c \$2.00 \$3.15

No. 6842—CHAMPION. Good commercial variety. Strong, hardy, fewer thorns. Good for pies and canning. Color green.

No. 6841—DOWNING. Very large, light green, juicy berries of extra quality. Strong, vigorous, hardy. Commercial variety.

No. 6840—GLENDALE. The Glendale Gooseberry is "unique, in the regions to which it is adapted, because a single mature bush often produces enough fruit for an ordinary farm family." Has been known to produce 10 or more quarts of berries on a single bush, sometimes growing as high as 6'.

PREPAID PARCEL POST

We ship nursery stock by prepaid Parcel Post whenever possible. Some trees are too large for Parcel Post. Be sure to give your nearest Express office address when ordering large sizes.

RHUBARB

Nature's best Spring tonic! You can't beat Rhubarb for tasty, snappy sauce and pie. Good for canning, too!

No. 6861—GIANT VICTORIA. ½ inch, whole roots. 5 for 59c; 10 for 95c; 25 for \$1.95; 100 for \$6.00, Prepaid.

No. 6862—MCDONALD SEEDLESS. The best flavored Rhubarb you ever ate. The new Rhubarb that never goes to seed. Berry's send you strong divisions (part of a root with eyes) that quickly develop into big, strong hardy plants.

No. 6863—RUBY RED. One of the best of the newer Rhubarbs. The stalks are brilliant ruby-red. The sauce is also an attractive red, sweet, and of a more pleasing flavor. It is propagated from divisions—blossoms but does not produce fertile seeds.

PRICES FOR McDONALD AND RUBY RED

DIVISIONS—Each 55c; 4 @ \$1.98; 10 @ \$4.50, Postpaid.

RHUBARB GARDEN

3—Victoria, 1—McDonald, 1—Ruby
M419—5 plants for \$1.00, Prepaid.

No. 6864—CANADA RED RHUBARB. Newest and best of all Rhubarb! Extra large, tall stalks of juicy, very sweet, red meaty Rhubarb. Best for sauce, canning, or pies. Requires practically no sugar! Divisions—Each \$1.19; 4 for \$4.45; 10 for \$10.00, Prepaid.

PLANT BERRIES THIS YEAR PICK BIG FRUIT CROPS NEXT YEAR

No. 4000—GEM

"Eat Tasty Vitamins"

Gem—the best by test, in any climate, under all growing conditions. Year in and year out, Gem will produce more marketable fruit and more plants than any other Everbearer. The berries are large, firm, well colored and of delicious flavor. Berry's new price saves you money. Some varieties cost more than Gem but no variety of Everbearing Strawberry surpasses Gem. Order Now. These prepaid prices save you at least 20%: 25 for \$1.00; 50 for \$1.75; 100 for \$3.25; 500 for \$12.50.

No. 4011—All Season Strawberry Garden

150 plants for \$3.35, postpaid. 50 each, Gem, Premier, and Dunlap. A special money saving collection designed for families who enjoy strawberries all summer. Saves you 50c from regular catalog prices.

Order Strawberries early this year. Plants are very short. Early spring planting gives best results so we'll ship at proper time, furnish you full planting instructions and guarantee satisfaction.

Every variety offered on these pages (76 & 77) will start next year—crops to eat, can, or sell. Or fruit, asparagus, and Rhubarb next year when your needs will be greatest.

GEM

"Queen of Everbearers"

WE PREPAY ALL NURSERY STOCK EAST OF ROCKY MOUNTAINS. THIS SAVES YOU AT LEAST 20%. We do not ship Nursery Stock to Arizona, California, Florida, Idaho, Nevada, Oregon and Washington.

YOUNGBERRY

No. 6805

A wonderful berry becoming a favorite everywhere. A cross of Loganberry and Dewberry. Dark wine colored fruit, sweet and delicious, highly flavored. A superb delicacy fresh, and the finest sauce you ever tasted. A tremendous bearer. Protect in severe climates by mulching. No. 1 tips prepaid; 10 for \$1.10; 25 for \$2.50; 100 for \$8.95.

"THORNLESS YOUNGBERRY"

No. 6806

Has all the qualities of the regular youngberry but the canes are smooth—without thorns. An improvement your hands and clothing will appreciate. Prepaid: 5 for 95c; 10 for \$1.79; 25 for \$4.35; 100 for \$16.50.

BOYSENBERRY

No. 6800

The finest and most profitable fruit ever developed. The largest of all with the most delicious juicy, richly flavored fruit yet known. The plant is a vigorous grower, fruiting in early summer and bearing 8 to 10 weeks.

No. 1 plants will bear the next season after planting. Prepaid: 5 for \$1.29; 25 for \$2.98; 100 for \$11.00.

THORNLESS BOYSENBERRY—No. 6801

Has the same wonderful qualities of the regular Boysenberry, but with thornless canes. Prepaid: 5 for \$1.55; 10 for \$2.85; 25 for \$6.85; 100 for \$25.00.

Giant Berry Garden—15 Plants

A special combination offer to save you 20% from regular catalog prices on these two delicious fruits. 10 Boysenberry \$1.29; 5 Youngberry 55c. Regular price \$1.84. No. 6804—all 15 plants only \$1.50, postpaid.

Boysenberry

RASPBERRIES

INDIAN SUMMER New Variety bears 2 crops— SUMMER and FALL!

No. 6706—CUMBERLAND—Black

The favorite commercial black. Never fails to bear a big crop of extra large, glossy black raspberries. Strong plants for best results—low cost. 10 for \$1.25; 25 for \$2.85; 100 for \$10.25.

No. 6707—NEW LOGAN—Black

The "Ace" of Blacks! Yields more fruit, larger and firmer. Bush extra hardy, very vigorous—resists drought and disease. The best Black! Top grade plants—lowest prices. 10 for \$1.35; 25 for \$3.00; 100 for \$10.95.

No. 6712—SODUS

The newest and best of the Purple Raspberries. Fruit reddish purple, firm, and of extra fine flavor. Plants are vigorous, hardy, disease resistant and consistent, heavy bearers, early in the season. Very profitable for home or commercial planting. 10 for \$1.60; 25 for \$3.65; 100 for \$12.95.

No. 6702—MORRISON

The Largest Black Raspberry ever produced—fruits often measure 1 inch in diameter. Bigger berries, fewer seeds, more juice, better flavor—all these super qualities on a vigorous, more hardy bush. Prepaid, 5 for 95c; 10 for \$1.79; 25 for \$4.35; 100 for \$16.50.

No. 6701—NEW GIANT WASHINGTON—RED

A new Western Raspberry. Best for canning, freezing, or eating fresh. Extra large, juicy, full flavored berries on a very vigorous, disease resistant bush. New and extra good. Postpaid: 5 for 89c; 10 for \$1.69; 25 for \$3.95; 100 for \$15.00.

No. 6700—SUNRISE—RED—EARLIEST

Ripens fruit earlier than any other variety. This proven new variety has outstanding merit. Berries are deliciously flavored; bushes are hardy, vigorous and disease resistant. Postpaid: 10 for \$1.45; 25 for \$3.35; 100 for \$12.75.

No. 6705—INDIAN SUMMER (see picture)

A new, almost everbearing Raspberry, producing two good crops each season. First crop same as Chief. Fall crop usually lasts until frost. Fruit is extra large, red, firm, of excellent quality. Very hardy. Postpaid: 10 for \$1.35; 25 for \$3.00; 100 for \$10.95.

No. 6704—LATHAM—RED

Hardy—thrives in any climate. Largest, reddest, best flavored—very productive. Plant with Chief for long season. Postpaid: 10 for \$1.10; 25 for \$2.50; 100 for \$8.95.

No. 6415—RED HAVEN. The peach with all the "extras"—extra early, extra hardy, extra juicy, extra red, and extra heavy bearer. New and highly recommended.

No. 6101—CHAMPION. Hardest Peach. Large, creamy white with red cheek. Freestone. Very high quality—juicy and sweet. Tree vigorous and thrifty.

No. 6107—J. H. HALE. Earlier and larger than Elberta. Unusually fine flavor. Good yellow with red blush. Good keeper. Plant with other varieties.

No. 6413—POLLY. Originated in Iowa and considered the hardest peach. White freestone of good quality. Tree is vigorous, hardy, and productive. Midseason.

No. 6406—HALEHAVEN. Best early freestone. Strong grower, very hardy—heavy bearer of fine flavored yellow peaches.

No. 6403—ELBERTA. Best known freestone, commercial variety. Yellow with reddish cheek. Excellent for canning.

No. 6402—EARLY ELBERTA. Freestone. Large golden yellow with red cheek. Yellow flesh, firm, juicy, luscious flavor. Hardier than Elberta.

No. 6409—SOUTH HAVEN. Large Yellow freestone, attractive blush and yellow flesh. Ripens 10 days earlier than Elberta.

No. 6405—GOLDEN JUBILEE. Yellow freestone, firm, juicy, full flavored. Ripens 15 to 20 days earlier than Elberta.

QUINCE

No. 6925—CHAMPION. 3 to 4 foot size. Large well flavored, orange yellow fruit, hardy, young bearing, vigorous trees. Each \$1.15; 3 or more \$1.05; postpaid.

APRICOTS

Prepaid Prices:	1 to 3	4 to 7	8 to 11
Commercial $\frac{3}{4}$ ft.; $\frac{5}{16}$ - $\frac{7}{16}$ "	\$1.19	\$1.14	\$1.10
Home Orchard $\frac{3}{4}$ ft.; $\frac{7}{16}$ - $\frac{9}{16}$ "	1.35	1.30	1.26

CHINESE EARLY GOLDEN. Favorite commercial variety in many sections. Large, full flavored, heavy bearer.

No. 6916—MOOKPARK. It is considered to be the best flavored, best quality of all apricots. Fruit is extra large, round, deep orange in color, with a blush on the sun side. The flesh is firm, fine grained and fairly juicy. The fruit is unexcelled for eating fresh and commands a premium price on the market.

Prepaid Prices:	1 to 3	4 to 7	8 to 11
Commercial $\frac{3}{4}$ ft.; $\frac{5}{16}$ - $\frac{7}{16}$ "	\$1.29	\$1.24	\$1.20
Home Orchard $\frac{3}{4}$ ft.; $\frac{7}{16}$ - $\frac{9}{16}$ "	1.49	1.44	1.40

No. 6920—MANCHU. Can be grown in the North where other varieties will not yield. The quality of fruit is not equal to the above varieties.

SPECIAL PEACH ORCHARDS

4 VARIETIES—3 SIZES OF TREES

In three different sized trees—at 3 different prices. We offer the four best varieties of peaches for an all purpose Home Orchard. There are early, mid-season, and late varieties carefully selected for hardiness, long bearing season, and cross pollination. In each collection we have 2 Elberta, 2 J. H. Hale, 1 South Haven, and 1 Golden Jubilee. Six of the best trees available at Berry's money saving prices.

BERRY TREES of EXCEPTIONAL QUALITY

ALL NURSERY PRICES ARE PREPAID

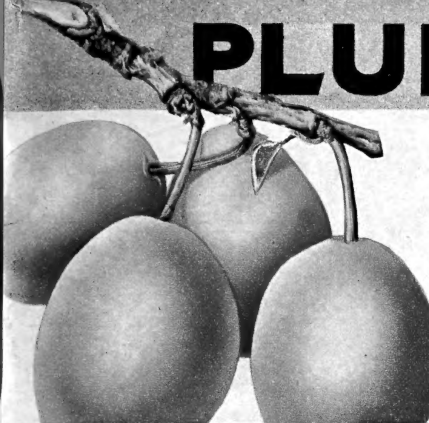

Berry's give you 100% value and you're the judge. Every grade is described just as we guarantee you will find it. Honest descriptions—honest values. Remember this in comparing our quality with more colorful layouts. The money we save you enables us to prepay our nursery stock shipments and save you up to 40%.

GIANT SIZE. 5 to 7 ft. tall— $\frac{1}{2}$ to 1 inch diameter—extra heavily branched and well rooted. Plant this size for quicker crops—best results.

HOME ORCHARD SIZE. Strong $\frac{3}{8}$ to $\frac{1}{2}$ inch diameter—4 to 6 ft. tall. Very well branched and well rooted. Commercial size. Being lower priced, usually preferred for large Orchard planting. 3 to 5 ft. tall, $\frac{1}{8}$ to $\frac{3}{8}$ inch diameter. Extra value at Berry's lowest prices in years.

ECONOMY GRADE. In Peach Trees, we offer this smaller size—2 to 3 ft. tall, $\frac{1}{8}$ inch caliper (diameter), lightly branched trees. Recommended for larger Orchards in warm climates.

PLUMS 2 YEARS 97¢ EACH 3 to 5 Ft. POST PAID 12 OR MORE

PLANT PLUMS THIS YEAR / PICK FRUIT NEXT YEAR

Hardy plums are one of the easiest fruits to grow. Big crops of luscious fruit to eat or can the second year after planting. Under our Nutrition Program it is recommended the average family have at least 25 quarts per year. They are fine for canning or plum butter.

Plums are very low in price in comparison with other fruit trees. Get your order in early though as stocks are limited and choose at least one good pollinator (marked P) in planting two or more varieties.

EUROPEAN AND ASIATIC

These favorite varieties are not as hardy as American varieties so are especially suited for Central, Eastern and Southern states. They are exceptionally high in quality for eating or markets. Plant at least 2 of this group for proper cross-pollinization.

Grades Same as Apple.

Prepaid Prices	1 to 3	4 to 7	8 to 11	Over 11
Commercial 3/4", 7/16-9/16"	\$1.19	\$1.14	\$1.10	\$1.06

Quick Crop 5/4", 1 1/16"	1.55	1.49	1.44	1.39

No. 6510—BURBANK

The best commercial variety in mild climates. Fruit is extra large, free-stone, bright cherry red, very juicy, and deliciously flavored. Trees are vigorous growers and heavy bearers. Excellent for home orchard, too.

No. 6506—BLUE PRUNE

The old favorite Italian dark blue Prune plum, for commercial or home orchards. Juicy and very well flavored. Excellent for eating fresh or canning, but not used for jelly.

No. 6508—STANLEY PRUNE

The most profitable Plum for commercial or Home Orchards. Earliest Prune, insuring top prices. Hardest European variety. Consistent bearer of large, blue, richly full flavored fruit. Free-stone, subacid. Best for eating and canning.

HARDY AMERICAN PLUMS

No. 6500—SUPERIOR

All the qualities of the finest California Plums on an extra hardy tree that will quickly bear large crops in any climate. The huge dark red plums have juicy, full flavored, tender, yellow meat. The best of all Plums for eating fresh, for canning or for plum butter.

No. 6515—SAPA—P

Early, heavy bearer of rich purplish-black Plums of medium size. Extra hardy. Juicy. Good for jelly, preserves.

No. 6502—UNDERWOOD

Heavy bearer of large, red, juicy, full flavored plums, excellent quality. Early.

No. 6503—WANETA—P

The largest, most attractive and highest quality of the red Hardy American and Hybrid plums. Vigorous, extra hardy and big cropper. Mid-season.

No. 6505—GOLDEN MINNESOTA

The greatest of the new, extra hardy plums. The large fruit is golden yellow with red cheeks, juicy, and unusually fine flavored. Trees are vigorous, hardy everywhere, heavy bearers, with crops starting the second year.

No. 6501—RED WING

An unusually large, dull red Plum developed in Minnesota. Flesh is rich yellow, firm, juicy and sweet. The skin can be removed easily and the pit is so free that the plum may be sliced like a peach. A fine home orchard variety for dessert or home canning.

"BEST 10" Home Orchard

Selected by our customers and recommended by State Experiment Stations as being the 10 best varieties for the Home Orchard. Plenty of Apples, Cherries and Plums for eating, canning or jelly all season. See page 80 for description of varieties and sizes.

No. 6302—NAPOLEON (Royal Anne)

The favorite sweet cherry for canning. Large amber colored, with red cheeks. Thrives in mild climates.

No. 6301—BLACK TARTARIAN

Very large purplish-black cherries of finest flavor. Rich, juicy. Popular in east.

No. 6307—BING

Unusually large, heart-shaped, dark maroon fruit that is extremely attractive for market. Flesh is firm and juicy, full of rich, delicious flavor. Vigorous grower. Ripens in late June.

No. 6304—YELLOW GLASS

Hardest of all sweet cherries. Golden Yellow fruit is juicy and well flavored.

Read our guarantee of satisfaction page 75.

SOUR CHERRIES

These varieties are hardy anywhere and bear young. A big profit crop used for eating, canning, preserves and pies.

No. 6310—LARGE MONTMORENCY.

Does well everywhere. Extra hardy, it bears large crops regularly ripening 10 days after Early Richmond. Very large fruit, firm flesh and finest flavor.

No. 6308—EARLY RICHMOND

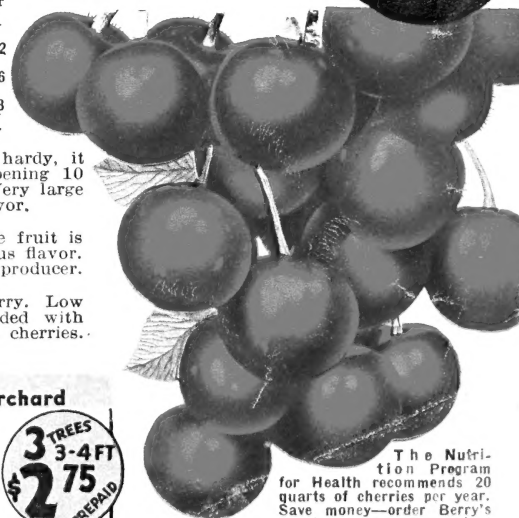

The favorite early cherry. The fruit is bright red, juicy and of delicious flavor. Hardy, prolific grower, heavy producer.

No. 6309—ENGLISH MORELLO

Best late, dark red, hardy cherry. Low growing trees are always loaded with large, juicy, well flavored tart cherries. Later than Montmorency.
